A Steel Windmill and Steel Tower every 3 minutes. ☞ Those figures tell the story of the ever-growing, ever-going, everlasting Steel Aermotor. Where one goes others follow, and we "Take the Country." Though old, we now undertake to make all of the 20,049 Aermotors in '91. Orders often waited weeks to be filled, but now we have vastly increased our plant and are prepared promptly to place our Aermotor in every desirable position of the globe.

Are you desirous to know how the Aermotor Co. in the six years it has existed, came to make many times as many windmills as all other makers combined? How we came to introduce the Steel Windmill, the Steel Flag Tower, the Steel Tilting Tower?

In 1888 we engaged in a field in which there had been no improvement for 40 years, and in which there seemed no room or need for improvement, and now has yet been shown equals in public imitation of our inventions.

Before commencing the manufacture of our Aermotor we made exhaustive scientific investigations and experiments were made by a skilled mechanical engineer, in which over 3,000 experiments of forty days were made on the different forms of wheels, propelled by artificial air currents, which settled definitely many questions relating to the proper speed of wheel, the best form, angle, curvature and number of sails, the resistance of air to motion, the friction in the wheel, such as many models since, that worked before the wheel, as in the modern mill, and many other more obvious, though not less important questions. These investigations proved that the power of the best wind wheels could be doubled, and the AERMOTOR daily demonstrates it has been done.

To the liberal policy of the Aermotor Co. that manufactures the goods satisfactory or pays freight both ways, and to its immense output of its factory which enables it to furnish the best article at less than the price it sold for, I ascribe its success. We furnish the most perfect bearings ever put in a windmill, and have made an exhaustive revision of the Aermotor and Towers.

If you want a windmill, with Steel Fixed Towers, if you want more than one, if you want to climb the Steel Tilting Tower and see the Wheel that runs when all others are still, if you want a mill that spins you less than wood and lasts ten times as long, (The Steel Aermotor) or if you want a Geared Mill, that pumps water, turns grindstones, saws wood, churns, shells corn, and does the work of 4 horses at the cost of one, write for elegantly illustrated printed matter, showing every case-made steel windmill construction and work, to
