A Steel Windmill and Steel Tower every 3 minutes. ☞ These figures tell the story of the ever-growing, ever-going, everlasting Steel Aermotor. Where one goes others follow, and we "Take the Country."

GALVANIZED

The Aermotor Pneumatic Water Supply System combines every part of your house with water without the aid of wind, the best form, shape, curvature and number of fan surface, the minimum of air to rotation, obstructions in the wheel, such as heavy wooden arms, obstructions before the wheel, as in the windmill, and many other such absurdities, though not less important particulars. These investigations proved that the power of the best wind wheels could be doubled, and the AERMOTOR daily demonstrates it has been done.

☞ To the liberal policy of the Aermotor Co., that guarantees the goods satisfactory or pays freight both ways, and to the enormous expense of its factory which enables it to buy the best material at less than the poorest is sold for. To we furnish the most perfect bearings ever put in a windmill, and have made an exhaustive revision of the Aermotor and Towers.

If you want a windmill, don't, don't, don't fail to read the above, you don't have to climb the Steel Tilting Tower, and the Wheel that read when all others stand still, and the Steel Pump Jack, that will not freeze up, and the Steel Pump Jack, that will not freeze up, and the Steel Pump Jack, that will not freeze up
