NEEDS OF OREGON NORMAL PRESENTED

By MRS. C. O. BRANSON.

Monmouth, Ore., March 12, 1920.

Editor Outlook:—Many of the voters of the state do not understand the nature of the College Millage Act, to be voted upon at the primary election May 21, 1920. There may be voters who do not think there is a necessity for this extra money. Perhaps this article will answer some of these inquiries.

The one twenty-fifth of a mill tax that now maintains the State Normal School has never been sufficient for the needs of the Normal. When it was first granted it was expected this sum would increase as the state grew and keep pace with the expanding needs of the school. But the amount received has stood practically stationary since that time. One or two years it even went below the amount received the first year. It has been constantly necessary to go to the legislature and ask for funds for buildings and for the additional expense which the different training schools have entailed.

Since the war the expenses of operating the Normal have mounted to a degree that cannot positively be met with the original sum. Fuel and incidentals have doubled in price. It has been found impossible with the money available to get suitable new faculty members unless increased salaries were paid and in fairness the members of the faculty of longer service must have salary raises as well.

The city of Portland has drawn several of the Normal faculty away because of higher salaries.

At the time of the draft law the physical health of our young men was found to be greatly below par. A law was enacted by the state that each teacher in the public schools of Oregon give not less than twenty minutes a day to physical education. Teachers must be able to give this compulsory training.

The state of Washington has four well equipped Normal schools. The one in Oregon should be better equipped than it is.

It is said nearly 20 per cent of our rural schools are not receiving the instruction they are entitled to in a civilized commonwealth because of lack of trained teachers.

We hope the voters of our great state will accede to the needs of their teacher training school, which will give back more than value received.

MELROSE AND VICTORY

The Parent-Teacher association will meet at Cedar next Saturday evening, March 20, at 8 oclock.

A very entertaining program has been prepared by the teacher, Miss Caroline Tallman. Miss Otelia Henderson of Portland will sing a solo and the children will sing an original club song. Yells by the cooking and sewing clubs and a potato paring contest by the cooking club will form an entertaining feature of the evening. A prize will be offered for the one who wins the cracker race. This contest will be open to all and will consist in eating a soda cracker and then whistling "Yankee Doodle." There is plenty of time to practice. After the other numbers the audience will join in a community sing.

The Victory Parent-Teacher association will meet at the schoolhouse Friday evening, March 19. The usual good time is promised and many plans are to be discussed.

Refreshments will be served but everyone is requested to bring their own cup as the association hasn't any cups or dishes at present.

Guests at the home of Rev. and Mrs. J. H. Wood Sunday afternoon were Mr. and Mrs. Gus Richey, Mr. and Mrs. Lester Richey of Pleasant Valley and Mr. and Mrs. H. C. Larsen of Gresham.

Almost everyone has recovered from the recent epidemic of grip and influenza which prevailed in this part of the country the past few weeks.

Frank Swanson and family are moving on the J. H. Bush place which they purchased some time ago. They have been living in Portland.

Encourage your boy to join a standard club and raise a pure bred pig or calf, or grow some good potatoes or corn. Then watch his additional interest in the farm and home.

WHY THE ELECTRIC CLEANER?

There is really no comparison between the ease and thoroughness with which an Electric Cleaner removed dirt and the difficulty of sweeping.

True, one CAN clean rugs and carpets without an electric cleaner. A broom or carpet sweeper will brush up SOME of the dirt; and if you like the exercise and have plenty of time and strength a broom and a carpet beater will do the work after a fashion.

In the same way one can wash without soap. Water alone will remove some dirt if applied with enough "elbow grease."

But people use soap because it cleans more easily and better than water alone.

For the same reason people use Electric Cleaners because they clean more easily and far better than other methods.
