LOCAL AND PERSONAL

Engineer J. W. Hall, from the office of the public roads and rural engineering of the federal department of agriculture, is preparing to begin the work of survey of the Medford Crater Lake highway. Field work will begin on April 10, with a crew of about twelve men. The work will cover a period of probably five months. The route will, in all probability, follow the course of the Rogue as nearly as possible; but that, of course, is among the official details to be worked out in preliminary surveys. The scenic value of the highway will be taken into account, to be sure. Engineer Hall began the organization of his forces Monday.

OUTPOST SKIRMISHES OCCUR IN GALICIA

BERLIN, March 27. — Only outpost skirmishes have occurred in Galicia in the last few days, and the situation remains as it was, according to an official report from the war office at Vienna. The statement, under the date of March 26, follows:

"The engagements near Jacobeni on the Dniester, described in Russian reports, were merely vanguard skirmishes. Austro-Hungarian reconnoitering detachments withdrew to the main positions when strong Russian forces advanced. During the last week the Russians have attempted no attack against the main army of General Pflanzer.

"Italian front: Italian artillery shelled Doberdo heights and the Folla district, as well as some points on the Tyrol front. East of Plezzo some Austro-Hungarian troops captured an Italian position. Attacks of the enemy in the Sugana valley were repulsed."

FULL CONFESSION BY WAITE

(Continued from page one)

The body of Peck was sent to Grand Rapids.

Then a telegram, addressed to Peck's son in Grand Rapids and signed only with the initial "E" was found and investigation started. The telegram, the police say, read: "Suspicions aroused. Demand autopsies. Examine body. E."

An autopsy, performed at the direction of District Attorney Swann, disclosed that Peck's stomach contained arsenic.

Died Upon a Visit.

The police say in January Mrs. Peck visited the Waites in New York at Waite's invitation, that Mr. Peck died January 26, that Waite had the body shipped to Grand Rapids the same day and had the body cremated.

The police say Peck had made a will in which half his fortune was to go to his son, Percy, and half to his daughter, Catherine, the wife of Waite. They also say Waite induced his wife to make a will in which he was named beneficiary.

Waite is 26. He was born in Grand Rapids of parents of moderate means, went through high school, then was graduated from Michigan university with honors. He went abroad and is said to have returned with stories of great wealth he had earned through practice of surgery in South Africa.

He had known Catherine Peck in Grand Rapids. Last winter he met Miss Peck and her mother at Palm Beach, Fla., and after a short courtship Waite and the girl of 20 childhood acquaintances were married.

Waite was popular in society and one of the best indoor tennis players of the country.

When sought by detectives in connection with the Peck death mystery, Waite was found in his apartments. The police say he was in a stupor as a result of taking opiates.

U. S. FURNISHES NEWS OF MARKETS

WASHINGTON, March 27. — Four men of the office of markets and rural organization have left Washington to inaugurate the department of agriculture's market news service on perishable crops this year. Branch offices have been established in New York, Boston, Philadelphia, Buffalo, Pittsburg, Chicago, St. Louis, Minneapolis and Kansas City, to collect and distribute information to record to marketing conditions. Other men are stationed in the producing sections of Florida, Louisiana and Texas, where onions, tomatoes and strawberries are already being shipped in carload lots to the big markets.

By collecting in this way information concerning conditions in producing districts and marketing centers, the market news service of the department of agriculture is designed to aid both shippers of and dealers in perishable crops. The information collected is sent out free by telegraph to all those who are sufficiently interested to pay the telegraph charges and by mail to those who do not care to incur this expense, but have a good reason for wishing the reports. Each of the field men in the marketing and producing centers acts as a distributor of this information and, in addition, it is sent out direct from Washington.

LABOR AGITATORS OUSTED BY BRITISH

LONDON, March 28. — Six leaders of a body calling itself the Clyde workers' committee, which has been attempting to foment strikes among munitions workers on the Clyde, have been removed from the district by government officers. It was said the committee had attempted to stop work in factories where large guns were made and had succeeded in five cases. The strikes were so crippling to important returns and were declared by leaders among workers.

It was expressed that the object of the committee was to compel the government to repeal the conditions of war and military service acts and to withdraw all limitations upon increases of pay, strikes and freedom of action without government control.
