NEW TRIANGLE PLAY 'BETWEEN MEN' TONIGHT

Triangle plays continue to be the sensation of the Page theater. For many weeks they have been the topic of conversation as well as the admiration of movie fans throughout the entire country. The principal offering, "Between Men," on the new program for tonight reveals one of the most finished productions yet shown at the Page. William S. Hart needs no introduction to Triangle theatergoers. He is assisted by End Markey and House Peters in his newest Ince vehicle, "Between Men." Mr. Hart journeys to the east and shows Wall street; how little they know about their own game when a new and wise player decides to take part.

The stock exchange scenes are faithfully produced and are probably the largest of the kind ever shown on the screen. The dictagraph—that modern instrument—is used prominently and its introduction into the Ince play is sure to attract attention and make more interesting a feature that combines so many attractive novelties.

Mack Sennett is there with the humor, as is witnessed in his comical efforts with Chester Conklin in the Triangle Keystone, "Dizzy Heights and Daring Hearts." There is a great explosion scene, wrecking of a two hundred foot chimney and then a laugh-provoking rescue in an aeroplane.

MARY PICKFORD AT THE STAR THEATER TONIGHT

It is rarely that motion picture spectators are privileged to witness so exquisitely artistic a performance as that of Mary Pickford in "Madame Butterfly," the Famous Players Film company's magnificent adaptation of John Luther Long's classic, which has already become familiar through the medium of opera, novel and play. All the poetic beauty of this sad tale has been preserved and enhanced in the film production which is the Paramount picture at the Star theater today.

ASHLAND AND VICINITY

That three quart bottles in one's kit in Ashland are not worth one phial in Hornbrook, was exemplified in the case of a traveling salesman last Friday evening, who represents a Portland leather house. LIGHT up an OWL and puff slowly on its even-burning fragrance.

See how freely it draws! Note that the OWL gives you its best from the very first. Note that the smoke ridges form perfect circles on the outer edge of the ash. This is the test of an even-burning cigar.

Why does the OWL burn so evenly?

—because the long leaf filler runs straight down to the square-nosed tip, allowing the *whole* cigar to become alight at once.

—because the OWL is shaped by hand and always allows a free draught of air.

Because of this careful hand-workmanship you get all the mellowness which makes the OWL the satisfying smoke it is. You can smoke your OWL without having to light a second match the way you sometimes do with a poorly made cigar.
