The school is rather crowded this year, having 350 pupils, which gives teachers little time to give individual attention to the child; but parents are urged to visit class rooms and see what work is being done.

Washington has always ranked high in the number of savings accounts. Parents can do much toward encouraging thrifty habits in children by having them start an account as soon as they enter school.

Having studied with Professor Teichmuller, one of the most eminent European piano teachers, for four years, is in itself a guarantee of excellence, as only students of fine ability are accepted. Mrs. Willett teaches the Teichmuller system of pianoforte, playing with all her pupils, and acting independently as a teacher. Her sole aim is to train and make fine players of her pupils, so they can receive due recognition from accomplished musicians anywhere. All pupils are trained according to their individuality.

Mrs. Willett has had wide experience with students, having been for several years at the head of the piano department at De Pauw university, Indiana.

Young pupils from 10 years also will be accepted, "as the correct technical development cannot be started too soon," says Mrs. Willett, "and is most important, to say nothing of the saving of valuable time and much discouragement, to older pupils."

Principal B. Conkle Addresses Junior High Parent-Teachers

B. H. Conkle, principal of the high school, met with a small but very appreciative group of Junior High Parent-Teachers on Friday afternoon. Mr. Conkle talked informally on a subject that causes not a little anxiety among parents as evidenced by the many questions asked, "The Course of Study in the High School," and gave many helpful suggestions as to how to advise son or daughter about their high school course.

Mr. Conkle mentioned seven aims held by educators—health, command of fundamental processes, worthy home memberships, vocational preparation, citizenship, worthy use of leisure, ethical character.

The hours from seven to ten in the evening were called a springboard from which we spring to meet success or fall into failure.

Students intending to enter college should choose studies from the academic group as vocational courses will not lead to college, said Mr. Conkle. However, it is possible so to chance the course that students who later decide to enter college can meet the requirements.

The councilor system now being worked out, makes a point of contact between pupil, parent and faculty, the speaker explained, that will prove very helpful to students at this changing period in their lives.

Junior High Parent Teacher meetings set a very high standard last year and this first program did not fall below. There is so much information that parents need to know before their children enter high school that it is hoped to give a further opportunity to acquire it.

It was voted to give a reception to the faculty at a date to be announced soon.
