Good — Adverse — Neutral

The Medical Roundup

by Walter Alvarez

Emeritus Consultant in Medicine, Mayo Clinic
Emeritus Professor of Medicine, Mayo Clinic

Significance of Good Work Record

When I was teaching graduate medical students, I found it difficult to induce in them the habit of asking many a patient if he had ever worked, or if he had worked for years, steadily, and perhaps for one firm. As I kept saying to my assistants, one of the most important things a doctor can know about the man of 40 sitting on the other side of the desk is that, when he started out in life, his parents had to force him to take jobs. Each time he soon quit, and then he settled down to live off of his mother.

DR. ALVAREZ

One of the last patients I just saw with a work record like that was a shy, odd-looking man of 50, who would not look me in the eye. For two years he had been going from one stomach specialist to another complaining of sudden brief spells of "diarrhea." I promptly drew from him the fact hat he had never in his life worked at any job, and soon I had from him the typical story of a schizophrenic. His spells of diarrhea were due to the panics he went into when, occasionally, he thought he was going completely insane, like his aunt and his brother.

The reverse of this picture, which will show the great diagnostic importance of an excellent work record, is to be found in the story of Tony, a coal miner who was brought me from near Pittsburgh by his foreman who thought the world of him. For years Tony had been the best workman in his "shift," until one day when he had slipped and gone down a chute with a ton of rock. After that, any movement in his back had produced such pain that he could not work, and support his wife and six children. Because x-ray studies had shown nothing, an industrial accident commission had finally decided that Tony was suffering from hysteria, and with this, had denied him further compensation.

I said, "Absolutely not; any able and hard-working man who, for years, has never missed a day from work, can't be 'gold-bricking'; he must have a broken place in his spine." When I ordered oblique films made of his back, there it was: one of the interlocking processes on a vertebra had been broken off, and the piece was like a jagged bit of concrete sticking into the man's muscles. I got a surgeon to take the thing out, and with this Tony lost his pain. He was so happy to go back to work.

Booklet Advises On Handling of Mental Patients

New York – Science Service) – Do's and don'ts for giving assistance to troubled persons are offered in a new free booklet "How to Deal With Mental Problems" issued jointly by the National Association for Mental Health and The Advertising Council here.

Written by Harry Milt, the psychologist who is the association's director of public information, the booklet replaces "How to Deal With Your Tensions," by the same writer. More than 1,500,000 copies of the latter booklet have been distributed in the past three years.

Milt suggests a number of ways to be helpful to a person with emotional problems. These are the Do's:

1. Do let the person know you're interested and care.

2. Do be a good listener.

3. Do try to help out with some practical problems.

4. Do send for and read other literature.

5. Do get help from an expert, if necessary.

These are the Don'ts:

1. Don't set yourself up as a judge.

2. Don't tell him to "snap out of it."

3. Don't argue him down.

4. Don't try to be an amateur phychiatrist.

It is estimated that about 17 million persons in the United States (one out of ten, approximately) require professional attention for mental or emotional disorders.

Signs of emotional trouble include selfishness and greediness, helplessness and dependency, poor emotional control, day dreaming, and fantasy and hypocondria. Persons who continuously have a chip on the shoulder, those who are excessively moody, anxious or suspicious are very likely to be suffering from a mental illness.

CONGO TROOPS READY

Ottawa –(UPI)– Defense Minister George Pearkes said Wednesday night Canada has a battalion of battle-equipped troops ready to fly to the Congo at 48 hours notice if needed.

Court Records

DISTRICT COURT

John F. McKee, passing with insufficient clearance, $15.

Darlene Z. Peabody, no operator's license, $5.

Arlis G. Cate, failure to stop, $15.

James B. Berriman, failure to transfer title, $5.

Robert F. Morley, illegal parking, $5.

Steve Crippen, illegal parking, $5.

Donald B. Taylor, failure to heed right of way, $25.

William R. Snyder, excessive noise, $20.

Frank Grimes, driving while license suspended, $150.

Patricia E. Beymer, expired registration, $5.

Adjustment of Hormones Tested

Copenhagen–(Science Service)–A new application of an older principle may help doctors understand how to adjust abnormal levels of hormone secretion in cases of illness, pregnancy and infertility, Dr. Egil Bojesen, head of the division of endocrinology at the University of Copenhagen, told Science Service here.

Dr. Bojesen said that scientists in his division have succeeded in measuring steroid hormones in the blood that are present only in very minute quantities. This was not possible until an analytical principle based on isotopes first developed in the United States was used, he said.

Dr. Bojesen called this principle the isotopic derivative method. He said it was applied to steroid hormones in the blood because it is more sensitive and possibly more specific than other analytical methods. However, he said, it is difficult and expensive.

As a result of using this method for measuring the steroid hormones in the blood, it will be possible to find out more about the mechanism that regulates the hormone secretion rate.

J'S HAVE IT

Merrill, Wis. –(UPI)– To keep things straight, Jack Wendt and his wife, Joyce, will call their newborn daughter Jenny. The couple's other seven children are Jerry, Joel, Jim, Jan, Jill, Jeannie and Julie.
