DIED.

HUDKINS—At Dairy, Or., Aug. 24 1899, Jacob Hudkins; aged 69 years.

Mr. Hudkins has been a resident of this county for about twelve years, having come to this county from West Virginia. He was elected Justice of the Peace shortly after his arrival here, and has held the office until the time of his death.

Funeral services were held at the home of the deceased on the 25th. Burial was made in the Dairy cemetary.

Interesting Statistics.

At a reception tendered to Chaplain Gilbert, of the Oregon Volunteers, recently in Eugene, among other things he gave the following statistics concerning the Oregon regiment: Total number of enlisted men, 1811; average age, 24.98 years; average weight, 148½ pounds; married 89; students, 156; clerks, 141; lawyers, 15; bookkeepers, 15; carpenters, 29; farmers, 123; laborers, 175; mechanics, 66; teachers, 28; merchants, 34; college graduates, 114; employed when enlisted, 1190; members of the church, 531.

Horses For Uncle Sam.

It was learned from a reliable source, says the Reno Gazette of the 24 inst., that the War Department has issued orders for the purchase of 50,000 horses for the Department of the Pacific, 10,000 for the Department of the Lakes and 5,000 for the Department of the East.

This will mean a big increase in the value of horses, especially as large numbers have been taken out for service in the Philippines. A Lieutenant and two enlisted men of the Sixth Cavalry who have been here for several days for horses have secured about three carloads from here and Battle Mountain. They will leave town tomorrow, but other officers will arrive next week to make further purchases.

Willful Waste Of Fish.

We have been told by reliable parties that hundreds of pounds of trout were caught and burned this summer at Pelican bay. Tourists that were stopping there would go out and catch boat loads of fine trout, when they could not use them, and as the weather was warm the fish would soon spoil after being taken from the cold water. The only way they could get rid of the fish then was to build large fire and burn them. Why is this allowed, when at the rate fish are being taken from the streams in Klamath county, it will only be a matter of time until there will not be any good fishing here. Spring creek and Williamson river the celebrated fishing streams are being fish out. One party that camps there every year for a month at a time, catch hundreds of pounds every day, and throw them away or give them to the Indians.

Here is a mighty good story, and probably a true one, that Captian Coghlan told at the Winfield meeting: Dewey sailed into Manila harbor, fought his battle and then cut the cable. The English admiral wanted to help him, but didn't dare But he thought that Dewey might take a hint. So the English admiral sailed over to Dewey and said, "Ah, I see you have cut a cable." "Yes" answered Dewey. "Which one?" asked the innocent English admiral. And then Dewey, knowing for the first time there were two cables, rustled back, grappled for the second cable, and cut it.

Oregon Industrial Exposition,

This exposition which is to be held at Portland from Sept 28 to Oct. 28, is to be representative of the entire Northwest.

The amusement and elevating features of the exposition are never neglected, and all will admit that they are all first class. The committee pays out $10,000 for the music and amusement features alone.

Among the special features of this year's exposition will be the reunion of all of Oregon's veteran soldiers and sailors, and a probable presentation of a sword to Captian Clarke, of the battleship Oregon. The National Guard of of Oregon will have exhibition competition drills for $75 cash prizes.

The amateur photographers will be encouraged to place their best work on exhibition, and will be awarded $150 in prizes.

The railroad and steamboat lines are going to give special low rates during the exposition, so that thousands of people may make special trips to Portland between Sept. 28 and Oct. 28.

Stranded Volunteers.

The fortunes of war or the misfortunes of military service have left ten men, formerly members of the Second Oregon, discharged for physical disability, stranded in San Francisco, says the Oregonian. Governor Geer, promptly upon application, notified the president of the Red Cross State Association that these luckless veterans would be brought home at the expense of the state. While we could do no more, and would not do less, this is another item that the pull that San Francisco has with the war department as a military shipping point saddles upon the state for the benefit of interested parties. Bring the disabled soldiers home, by all means, and draw upon the state military fund for the cost of their transportation. The state can look after the nation's defenders if the latter fails through carelessness or mismanagement to do so. This is a tenet of states' rights which is not likely to be disputed.

A Salt Palace.

Salt Lake City has a palace built of salt which was opened to the public last Monday. It has a midway plaissance and in many features resembles the Columbian Exposition. This magnificent place was made from the brine of the great inland sea, Salt Lake. Those who have seen the edifice pronounce it a greater curiosity than Lots wife who could not resist the temptation to look back when Sodom was burned, and as a consequence turned to salt. For those who are too fresh it will be a splendid opportunity to be cured.

Potatoes Scarce.

The potato crop in this county will probably be shorter this year than last. As seed was scarce and sold for two cents last spring the farmers did not plant as many as usual, and with the heavy frosts that occured the middle of this month all over the county, which killed or else set them back so they cannot ripen, they will bring a good price this fall. The Tule Lake section is about the only place that escaped the frosts, and that will be the only place that will have potatoes this year to amount to anything.

August Weather.

No sooner does the anxious chronicler get the weather and crops valuation sized up in the interests of the farmers than atmospheric conditions scheduled as a movement eastward or westward, as the case may be, of the storm area are noted with disastrous results. The plain fact is that we have November weather in August—presistent and permcious. The results so far as the grain crop is concerned, is not hard to figure out.
