Now It is Said That Hill Is Trying to Secure Control.

NEW YORK, March 6 .- The Commercial Advertiser says:

"The heavy buying of Chicago, Burling-ton & Quincy railroad shares within the past few days is partly explained today by the report from a trastworthy source that James J. The efforts of outside parties to secure control of the Chicago, Burling-ton & Quincy have been stoutly resisted by some of the largest stockholders, who have been connected with the property for many years, and who have a strong faith in its future growth. These inside interests have thus far provented the comers from securing a majority of the Burlington stock. Whether their resistance to a change in the control will continue to be effective remains to be

"It is an interesting fact that one of the strongest interests in the Burlington, which is seeking to preserve the inde-pendence of that property, is the same pendence of that property, is the same interest that was largely instrumental in preventing J.
