THE COURT GREATLY ALARMED

General Tung Fu Sian, Commander of the Northern Armies, is at the Head of the Movement.

PEKIN, April 8.—The rumors which have been current during the past few days of the outbreak of a rebellion, headed by General Tung Fu Sian, the ex-com-mander of the Northern army, in the pro-vinces of Mongolia and Shen-Si, have been absolutely authenticated.

Li Hung Chang and Prince Ching have received information on the subject which, though indefinite, still proves that the court is seriously alarmed.

General Fu Sian was, according to last General Fu Sian was, according to last accounts, about 150 miles from the court with 11,000 regular troops, all supposed to be devoted to himself. The court has about the some number of soldiers at Singan Fu, but it is probable that the troops of Tung Fu Sian are better drilled and better armed. It is believed that the Mongolian rebellion was brought about through the agents of Prince Tuan and General Tung Fu Sian. Li Hung Chang General Tung Fu Sian. Li Hung Chang thinks there are about 5,000 regular troops in Mongolia, and inclines to the bellef that they have not joined in the rebellion. He does not think the court is in any danger, and thinks the object of Prince Tuan (who was last reported at Ning Hsu Sian with 10,000 men prepared to resist arrest) and General Tung Fu Sian is to create a diversion of interest in or-der to force unconditional protection of

Unofficial Chinamen of intelligence regard the rising as most unfortunate at the present time to the interests of China, and as of possibly meaning the use of foreign troops to protect even the court itself. The ministers of the powers do not think that, provided foreign interests do not suffer, any present interference is likely. If the dynasty should be over-thrown, it would, to a certain extent, de-lay the peace negotiations, but they con-sider that a regime not bound by tradi-tions like those of the present court prob-ably would be much easier to deal with eventually, as the ceremonial could be much curtailed.

Prince Ching, who, as a relative, may be considered to take the court view of If the dynasty should be over-

be considered to take the court view of the situation, thinks the rebellion is a storm in a teapot. He says the present court is loved and esteemed by nine-tenths of the population of China, and that the same proportion of able-bodied men in China would rise to protect the existing dynasty. The Empress Dowager, as the adviser of the Emperor, holds the affections of the people, not dreamt of

According to expert opinion, would be able to pay from £20,000,000 to £30,000,000 without crippling her financial resources, while the amounts which the powers at present demand range fro £80,000,000 to £100,000,000,

## NOT EASILY SETTLED.

Indemnity Question Bound to Consume Much Time.

WASHINGTON, April 8.—A brief dispatch from General Chaffee was received today, but beyond the record of a cassolary, but beyond the record of a cas-ualty to a private soldier, its contents are withheld from the public. It is under-stood that the unpublished portion refers to the disinclination of the foreign mili-tary commanders to reduce the number of fortified posts and the strength of the garrisons between Pekin and the sea to the proportions suggested by General Chaffee.

Mr. Rockhill's advice to the State De-partment regarding the negotiations at Pekin are more hopeful in tone than they were a week ago, but it is still apparent that the subject of indemnity is bound to consume much more time. This is owing to the original difficulty, namely, the exgreat European powers. A minimum, claimed by one nation for indemnity to the amount of \$70,000,000, with conditions attached that might swell it to \$100,000,000, would, if allowed, leave all the other pow-ers in the aggregate about an equal sum for division between them. The Ministers have been assured by the best technical authority that China's ability to pay a money indemnity is limited to the sum of about \$200,000,000 or \$250,000,000.

The Chinese Minister was an early caller at the State Department today, to seek information as to the report based on advices to the State Department, that there had been an interruption of the diplomatic intercourse between Russia and China. Minister Wu had not been advised of any such developments, and the infor-mation before the State Department was so contradictory that it did not permit a clear explanation of the real state of af-fairs. The State Department maintains its attitude of doubtful expectancy, and is not yet prepared to admit that there has been an interpretation of interconhas been an interruption of intercourse between the two countries, either limited

Aside from the telegraphic advices, there are some attending circumstances which indicate that at least some strain or partial interruption of intercourse has occurred. The fact developed in Washington about a week ago, that Russia had delivered to China what amounted to an ultimatum on the signing of the Manchuria agreement. This followed the us-ual course of ultimatums and fixed a definite limit of days in which China could act. It also conveyed the clear in-timation that unfavorable action by China would lead to a severance of diplomatic relations between the two countries. The limit of time fixed is believed to have been one week, and to have expired Wednesday. China did not sign within the time limit, and the next-day, Thursday, Russia addressed her note to the powers which has been accepted as removing the pressure over the Manchuria agreement. This at first seemed to be a waiver of her prior intimation of an interruption of diplomatic intercourse, and yet there was no such explicit waiver, and the latest advices received seem to be directly in line with the threat previously would lead to a severance of diplomatic rectly in line with the threat previously

BLOW TO RUSSIAN PRESTIGE. The More Severe Because Japan Had the Leading Share.

LONDON, April 8.—In a dispatch to the Times from Pekin, dated Sunday, Dr. Morrison comments upon the blow to Rus-sian prestige in China, resulting from the check to Russia's ambitions regarding Manchuria.
"This blow is all the more severe," he

says, "because Japan, whom the Russians have affected to treat with the ut-most contempt, has had the largest share in dealing it. There is little doubt that Russia will renew the struggle in some shape. It is a remarkable outburst of popular feeling which has thus enabled China to withstand Russia. All the ap-peals were addressed to the Emperor. It is, therefore, difficult to believe that the Empress Dowager has not been affected by the defeat of the policy of which her nenchman, Li Hung Chang, is the strong-

est exponent.
"The Emperor has summoned the president of the board of revenue from Pekin to prepare for the removal of the court. Probably this only means a removal to Kalung, in the Province of Ponan, which would bring the court into closer contact with the Yangtse Viceroys."

China an American Colony. VIENNA, April 2.—The French economist, Paul Leroy Beaulleu, in an article in the Neues Wiener Tagesblatt, discus-

in the Neues Wiener Tagesblatt, discussing which civilized nation is likely to exploit China, says:

"It is probable that the chief role will fall to the United States, especially when the Nicaragua Canal has been cut, China will then, for economic purposes, become an American Colony. The Americans know this, and their whole attitude during regent events has been marked by ing recent events has been marked by finesse and foresight."

#### Japan is Relieved.

YOKOHAMA April 8.—The news of Russia's decision not to press the Man-churia agreement was received here with a feeling of relief. In anticipation of com-plications that might ensue had Russia reached another conclusion, the government had resolved to postpone a number of important state undertakings involving arge expenditures.

A Boxer Appointment. SHANGHAI, April 8 .- Yu Yin Lin, Governor of Hupel province, has been ap-cointed Governor of Kwang Si province in succession to Huang Husi Sen, who has been ordered to resign. This is interpreted to indicate that the reactionists of Singan Fu intend to introduce the Boxer movenent in the Southern province.

### An Incendiary Fire.

ST. LOUIS, April 8.-It is believed that the fire yesterday which caused the destruction of a grain elevator owned by the St. Louis Elevator & Storage Company, was of incendiary origin. Several boys whom the watchman just previous to his discovery of the fire had ordered from the premises are thought to be guilty. The fire started in the oil room.

Wholesale Drug House Burned. BALTIMORE, Md., April 8.—The whole-ale drug house of Gilpin, Langdon & Co. was destroyed by fire with its con-tents today. The roof of the machinery establishment of Thomas Bashnor & Co was also burned and the contents of the latter building badly damaged by water.

#### RIOT IN A MEXICAN TOWN.

Government Sends Troops to Queel a Small Insurrection.

LAREDO, Tex., April 8.-Reliable reports of a serious riot yesterday at Lam-pasas, a station on the Mexican Central Railroad, 70 miles distant, have reached nere. It appears that the Government of Mexico had suspicions about a reported revolutionary occurrence at that place, and yesterday morning the military stationed there arrested four citizens. When to Monterey, a mob, headed by Francisco Maranjo, son of the famous General Maranjo, appeared at the station. In the excitement that followed one of the pris-oners escaped. When the train left the leaders of the mob repaired to General Maranjo's castle, where they are at pres-ent surrounded. As soon as the government heard of the disturbance 500 soldiers from Monterey were dispatched to the scene by special train,

#### PLAGUE STRICKEN STUDENT Ann Arbor Patient Is a Young Man From Nebraska.

ANN ARBOR, Mich., April 8 .- The university authorities refused to make known the name of the student in the university hospital pesthouse with the mysterious disease supposed to be bubonic plague, but it was learned tonight from a medical student that the young man is Charles B. Hare, of Pawnee City, Neb. He is a sophomore medico, and has been taking special work in bacteriology, and has been han...ng culture tubes. It is supposed that in performing this work he became inoculated. Dr. Novoy said tonight that ease all right, but again refused to make a definite statement as to its nature.
"It will take several days for the anima experiments which we are making to be in shape so I can state the

young man's complaint," said he.

INDIANAPOLIS, April 8.—The Indi-na Epworth League is the first to make official arrangements for the trip to San Francisco for the international convention in July. Northern Indiana will rendezvous at Chicago, leaving there July 9; Central Indiana will meet at Bloomington, Ill., and Southern Indiana at St. Louis, all in case there proves to be an interruption of the relations between Russia and China, it is not expected to disarrange the negotiations between the powers and at Sait Lake City. This state will send a delegation of 600 to the convention

#### THE PERRY NOT A SUCCESS. Francisco - Built Destroyer

Failed on Her Speed Trial. WASHINGTON, April 8.—Secretary Long was informed today that the torpedo-boat destroyer Perry, built by the Union Iron Works, of San Francisco, failed to meet contract speed requirements on her official trial. Under the contract the vessel was required to develop a speed of 29 knots an hour, but the best she could do on her trial run was 28.2 knots an hour. The failure to make the speed required will not result in the rejection of the ship, as the contract provides a penalty for deficiency in speed between 29 and 28 knots. The boat will, therefore, be accepted, the price being \$259.000, instead of the full contract price of \$283,-

#### FLOOD SCARE IS OVER.

Loss by Freshets in New England Will Not Be as Great as Feared.

BOSTON, April 8.-The flood scare all over New England, due to rising waters from five days of heavy rains, has died out, and tonight the reports indicated that a change for the better would come pefore daylight. The losses will be heavy, no doubt, but nothing to be compared to the freshets of recent Springs. The rea-son is obvious to people in Southern New England for the early Spring left the ground open for a good soaking, and this natural absorption of the rain is taking care of much of the water, while the great surplus of the overflow, being un-impeded by ice, is rushing forward.

#### Building Trades War.

NEW YORK, April 8.—The World says: The board of walking delegates and the members of the Building Trades Coun-cil intend to make a bitter war against each other. The announcement was made at the Central Federation Union last night. President Pattison, of the board of walking delegates, stated that he in-tended to order strikes on every building in the course of erection in the city where members of the Trades Council are em-ployed. Hundreds will quit their em-ployment, leaving only members of the Trades Council at work. The council will endeavor to fill the places of those on strike among the unions represented in the board of delegates and then there will be trouble. It was stated that the trouble was started by the Elevator Construc-tors' Union, which filled the places of striking elevator constructors who are connected with the board of walking delegates."

#### WOULD MAKE A GLACIER.

Ohio Scientist's Scheme for Produc ing Rain in the Southwest.

SPRINGFIELD, O., April 8.-Dr. C. W. Woolridge, a well-known Ohio scientist advocates the creation of a glacier at the top of the San Bernardino Mountains that would change the arid lands of Arizona and Southern California into a garden. He would have the standing army ployed, and suggests as one of its tasks that it erect an immense chimney on the Pacific Coast, of such height that the upper air could be carried to the top of the San Bernardino Mountains, who atmospheric action could be used at an extremely low temperature, thus form ing, according to Dr. Woolridge, an im-mense glacier. The presence of this glacier would cause a sufficiency of rainfall, which in that country is now lacking because the upper stratum of the atr
