OLD STANDARD MILL COLLAPSES.—The old Standard flouring mills building, at Mil-waukle, collapsed yesterday afternoon at 2 o'clock, after having stood for nearly half a century. For several years its foundation has been insecure, and its fail had been expected. It went over with a crash. The collapse was witnessed by a large number of nearly witnessed by large number of people at Milwaukie, was one of the landmarks of the state. The mill was designed and built under the supervision of Captain Joseph Kellogg in ploneer days, and at that time it was the product days, and at that time it was the best mill in the state. All through the mines of Idaho and Eastern Oregon the Biandard brand of flour was the popular brand. The burrs used were among the first brought to this Coast. For a great many years the building has been idle and cobwebs and dust were many inches thick cobwebs and dust were many inches thick. It was explored before the machinery and old iron were removed, and it was found just as it was when the water had been turned off and the mill stopped. It was packed full of curious things, a veritable relic of the past. The old frame simply swung over into the water, and had not floated away yesterday. There is no dan-ger that it will float down the river and wreck the bridges.
