Relatives in Tilla-mook County will take charge of the rethe railway officials have been looking mains. This is the third death at the prison resulting from typhoid.

Superintendent Ciark, of the State School for Deaf Mutes, says that there has not been a case of typhoid fever at sure he was many miles from Bearthis institution this season. At the Re-form School, a mile distant, there have been many cases. The immunity of the pupils of the mute school is supposed to be due to the fact that the drinking water at the latter institution is drawn from a spring in the hillside. Superintendent Bickers, of the Reform School, will ask the Legislature to provide for bringing water to the Reform School from the spring above the mute school. The record of sickness at the two institutions seems to indicate that the impure water at the Reform School has been the source of the many cases of typhoid.
