## Lewis and Clark Fair Has City's Support.

ALBANY IS LOYAL

# DISAPPROVES OF REFERENDUM

Business Men Belleve Oregon Should Unite in Making the Exposition a Success-Statement Is Numerously Signed,

ALBANY, Or., March 26 .- (To the Ed Itor.)-Owing to statements published in The Oregonian concerning the attitude of the people of Albany toward the Lewis and Clark Fair, an erroneous impression has gone abroad that we are opposing the efforts of the people of Portland to inaugurate the fair, and we are intending to inaugurate proceedings to have the matter submitted to a vote under the referen

in order to ascertain the truth concern ing this matter I have obtained the state ment, which I inclose herewith, signed by about 20 per cent of the business men of Albany, showing that they do not favor any attempt at this time to interfere with the work of establishing the Lewis and Ciark Fair; that in their opinion the sublasion of the matter to a vote at this time would be a mistake.

We do not like the idea of being held up to the world as being unprogressive, as we think that we have shown commendable efforts in the past toward building up the state as well as our own institutions. We have never received assistance by wey of building state institutions in our midst, but have been compelled to depend upon our own resources. We hope that you will, through The Oregonian, call attention to this matter, in order that we may be placed in a proper attitude before your readers. The statement and signatures follow:

signmtures follow: The undersigned citizens of the City of Al-bany and vicinity, believing that any attempt at this time to discourage the moryment to establish the Lowis and Clark Fair by invok-ing the referension in reference thereto would be derivation in the prospectivy of the State of Oregon, do hereby express our disapproval of such a movement, and declare our belief that, as so much has been done to insugurate such a Fair, the people of Oregon should units in mak-ing its success. That many thousands of dol-Fair, the people of Oregon should unite in mak-ing it a success. That many thousands of del-lars required to hold a special election under such referendum would offset the small amount which the holding of such a Fair might cost over and above the benefit which would not-urally accrues therefront. That if this chance to commensorate a great historical event is overthrown, no such opportunity in likely to be presented to the people of this state in this generation.

generation. We therefore think that any attempt to have the matter submittd to a vole would, by caus-ing great delay and expense, be a great mus-take

### NOT TO PREVENT STEALING.

#### Train Agents on Southern Pacific Merely to Relieve Conductors.

SALEM, Or., March 25.-(Special.)-A radical change in the method of train management on the Southern Pacific lines in Oregon will go into effect April 15 when conductors will be relieved of the duty of taking fares. A new position, that of "train agent," has been created, and the agent will take tickets and collect farcs. This will leave the conductors with no other duty than the management of their trains.

It is understood that the purpose of the change is to leave the conductors free from duties which take their attention from the management of the train, and thus lessen the possibility of wrecks. It has been rumored in railroad circles here for several days that this change was to made, and it is now learned that orders have been issued for the establish-ment of the new system. Whether train establish will be put on from San Francisco north is not known definitely, but it is believed that the new plan applies in California as well as in Oregon. The position of train agent is second in

importance to that of conductor only, so that it is probable that brakemen will be promoted to the new position. The only duty of the train agents will be to take tickets and fares and keep the records. This system is in force on some Eastern lines, but it is understood that in those instances the agents are employed for the purpose of placing a check upon the re-capts, so that 'rake-offs' will not be pos-sible. The object of the Southern Pacific is said to be to prevent collisions.
