CIRCUS SETS A **NEW STANDARD**

Performances Equal the Promises That Were Made Beforehand.

DURBAR OF DELHI FEATURE

Hippodrome Events, Large Menagerie and All Incidents Which to Make Up Show Are Not Lacking.

The first visit of Barnum & Balley's to Portland will long be remembered here for it set a new standard for circus excellence. The performances given yesterday and last night and to be repeated twice today, are the best ever seen under canvas. To a remarkable extent the show comes up to advance notices.
At the matinee yesterday there were 14.-

BSI tickets taken up at the main entrance, and the night more than 16,000, the mammoth main tent being crowded to its utmost capacity. All records of circus attendance in this city are broken and it seems probable that the occurrence of yesterday will be duplicated today. In all more than \$1,000 attended the two performances yesterday, exceeding all rec-ords of the circus since its season opened

The performance yesterday afternoon began promptly with the spectacle known as the "Durbar at Delhi," a reproduction of the memorable pageant that passed in review before the Viceroy and Vicreine of India on the occasion of the coronation of King Edward VII. It is a beautiful spectacle, produced under the direction of Bolossy Kiralfy, who has spent the Summer at the Fair.

In Barbaric Splendor.

Many performers, in gorgeous costumes, appear in it. The native cavalry of India form the greater portion of the pageant. There are also scores of dancers and men representing the populace. Two elephants, carrying gorgeously decorated howdahs, in which the principal personages ride, complete the scene of barbaric splender. The richness of the costumes orn, the elaborate paraphernalia and the realistic handling of the subject, entities the "Durbar" to first place among circus spectacles.

Of course, the much-exploited "Dip of Death" is the most remarkable fortier Death" is the most remarkable feature of the show, and it certainly supplies a great enough sensation to satisfy the most ardent admirer of daredevil feats. successfully accomplished yesterday, Mile. De Tiers, the young French woman, making the terrible ride in a fullsized touring our with apparently the utmost unconcern. This makes all other ncline riding stunts seem tame by comparison. It is the acme of all death-defying performances, and seemingly must always stand as such. Human ingenuity could hardly conceive of anything more

The hippodrome events were splendid and in every respect realistic, especially is this true of the charlot races.

Increasing Among Women, But Sufferers Need Not Despair

THE BEST ADVICE IS FREE

Of all the diseases known, with which the female organism is afflicted, kidney disease is the most fatal, and statistics show that this disease is on the increase

Unless early and correct treatment is applied the patient seldom survives when once the disease is fastened upon her. Lydia E. Pinkham's Vegetable Compound is the most efficient treat-ment for kidney troubles of women, and is the only medicine especially

prepared for this purpose.

When a woman is troubled with pain or weight in loins, backache, frequent, painful or scalding urination, swelling of limbs or feet, swelling under the eyes, an uneasy, tired feeling in the region of the kidneys or notices a brickdust sediment in the urine, she should lose no time in commencing treatment with Lydia E. Pinkham's Vegetable Compound, as it may be the means of saving her life.

For proof, read what Lydia E. Pinkham's Vegetable Compound did for Mrs.

Sawyer.
"I cannot express the terrible suffering I "I cannot express the terrible suffering I had to endure. A derangement of the femals organs developed nervous prestration and a serious kidney trouble. The doctor attended me for a year, but I kept getting worse, until I was unable to do anything, and I made up my mind I could not live. I finally decided to try Lydia E. Pinkham's Vegetable Compound as a last resort, and I am to-day a well woman. I cannot praise it too highly, and I tell every suffering woman about my case." Mrs. Emma Sawyer, Conyers, Ga.

ECZEMA FIRE

Those afflicted with Eczema know more than can be told of the suffering imposed by this "flesh fire." It usually begins with a slight redness of the skin, which gradually spreads, followed by blisters and pustules discharging a thin, sticky fluid that dries and scales off, leaving an inflamed surface, and at times the itching and burning are almost unbearable. While any part of the body is

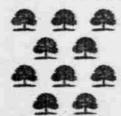

liable to be attacked, the hands, feet, back, arms, face and less are the parts most often afflicted. The cause of Eczema is a too acid condition of the blood. The circulation becomes loaded with fiery, acid poisons that are forced through the

the disease is in the blood it is a waste of time to try to cure it with local applications; the cause must be removed before a cure can be effected. S. S. S. has no equal as a remedy for Eczema; it enters the blood and forces out the poison through the natural channels, and builds up the entire system. The skin becomes smooth and soft again, and the Eczema is cured. Cases that have persistently refused to be cured under the ordinary treatment yield to its purifying, cooling effect on the blood.
