arrive from California.

The greatest interest in the hop trade n all parts of the world now centers in the to nazard any prediction as to the outcome, that price, most for the weather in the Summer months may at 102 10% cents. pset all calculations, but on the basis of the manner in which the roots wintered and that everything favors a good yield, from th The total production, however, will pro-

ably not be as large as last year, for in Eng nd the conditions are not as good as a the Continental crops. There is also som trouble in the yards of New York State. The rop of the Pacific Coast, unless some unforeseen accident happens, promises to be record-breaker. On the whole, the prossect at the present time is not favorable for such high prices as have in some past years ok as if the low prices of last year can be repeated. But as everyone who has any ain can be said about the crop until it is

With the right kind of weather from now Oregon will astonish the world with its 906 yield of hops. The aureage is larger than before, and the vine never looked bet-Dealers have already begun to estimate crop and the figures run anywhere from 125,000 to 140,000 bales. Last year the state produced about 113,000 bales. Washington ditions are similar to those in Oregon, and an estimate of a 60,000-bales yield for the Northern state has been made by one dealer, though others think this too high. The Cali-

All eyes, however, are on England, where the growth of the hops has been backward, caused by unseasonable weather. In reviewing the estuation, the Kentish Observer of

Owing to the recent cold and freety weather the hop plant is somewhat backward and tying is only just commencing. But the milder temperature of the last few days has given the young shoots a good start and they appear to be coming away strong and healthy. There has been considerable grubbling of the hop area in Kent and Sussex since the close of last season, and the returns for the current year may be expected to show a marked accrease in the acreage as compared with 1905. Hop cultivation, however, still finds favor with a large number of farmers, many of whom have extended their grounds during the past Winter. The wire and string system of training is mill on the increase, especially in East and Mid Kent.

The following extracts from New York papers explain conditions in that state:

As the season advances and work progresses As the season advances and work progresses in the yards additional news of Winter killing of the roots is received. The prevalence of this seems to be widespread and the effect unusually severs. Many growers, discouraged by this and the low prices prevailing, have plowed up their yards. Tying is now in progress.—Cobieskiii Infex.

Reports from all sections of Schoharie County all agree that the old yards have shown a large percentage of dead hills. Many growers are replacing these with sets and new roots, but in many places the yards have been plowed up. The cold weather has re-

m plowed up. The cold weather has re-ded the growth of the vinc, but the warm ather now with us has caused them to mb, and tying will be general this week.—

Schonarie Republican,
Attention is chiefly devoted to the new
crop, which was reported as doing well until the recent cold snap, which has retarded
its growth. It is chained by some that the
front was so heavy on Sunday night as to damage the vine somewhat. Others this they will soon outgrow it.—Waterville Tim

A statistical statement of the hop crop of the world for the last three years, just is sued by the Department of Agriculture, will prove of interest to growers and dealers. The pounds: 1903. 1904.

ticularly beans and peas. Most of the inter were in good shape and cleaned up well, but some had become overheated and had to be sucrificed. The rains in California will cause lighter shipments to be made to reach here Wednesday.

Receipts of local strawberries were very heavy and weakened the market for shipments from more distant points. Hood Riv-ers were quoted at \$2.75g3 and Roseburg and Salem berries at \$252.25 a crate. Cher-ries were abundant and sold well. The first Royal Anne of the season were received and brought \$1.50. Two crates of apricots arrived and sold for \$2.50.

The potato market is amgnant with no immediate prospect of improvement, though it is thought San Francisco may want some old

ADVANCE IN BUTTER.

One City Creamery Will Raise Its Price To-

day-Egg Market Slow.

The announcement was made by a lead ing city creamery yesterday that it would advance the price of butter today to 214 cents, which is 1% cents above the price that has been prevailing. Other creameryen considered the market weak, so there will probably be more or less objection to the advance. The production of butter has been very heavy of late and considerable difficulty has been experienced in some quarters in disposing of the surplus make. A change in the weather that would stimulate the consumption of ice cream would help the butter market generally, but no settled period of warm weather is looked for yet.

The egg market was described by most dealers as sluggish. Receipts were not heavy, but the local demand was backward and very few shipping orders were received An attempt was made to hold the market at 20 cents, but only a few sales were made at

stocks today sank into apathy. There was a sport of slight activity in the first hour of trading. The llon's share of attention was given to Reading, and if the congreted dealings in this stock were deduced, the volume of the market would make a smaller showing even then on last Monday, the dullest day thus far in the present year.

Heading is in the hands of an elaborate market organization, and is closely responsive to control. It opened lower than on Saturday, but was quickly turned upwards. News regarding the movement was not forthcoming beyond what has done duty at previous stages. Something was made of a published runter of the Pennsylvania, to be succeeded by the present head of the Reading, and the assumption was added of closer relations between the two properties.

LINSEED—Raw, in harrels, 45c; in cases, 35c; bolled, in harrels, 50c; in cases, 35c; gallon lots, 1c less. assumption was added of closer relations between the two properties.

Some of the extreme duliness of the trading was attributed to the breaking of the week by a holiday on Wednesday, habitual operators disliking an interval of closed markets which deprive them of opportunity to sect on sudden developments. The fact that subscriptions fall due temorrow on the \$50.000,000 of Pennsylvania notes also had the effect of deterring some traders from operatone, oo of Pennsylvania notes also had the effect of deterring some traders from operating. Money rates were firm today, but the money market showed no signs of disturbance from the pendency of this transaction. Assurance has been given that the funds paid for the notes will be left on deposit with the banks and only drawn upon in limited amounts as required for the purposes of the company. This would reduce the operation largely to one of book transfers of accounts and would lessen the chance for disturbance in the money market. Some shifting of loans is always necessary, however, in a financial transaction of this magnitude, and as it is to be followed by the month-end settlement and on Friday by the payment of subscriptions on the new Chicago & Northwestern stocks, the professional traders in stocks were inclined to operate cautiously.

The Lendon market was in a conservative mood on account of the stock exchange settle-

nood on account of the stock exchange settle-nent this week, and was disturbed by the

Heppner Stock Shipments.

The movement of stock from Heppner has been quite lively the past ten days, says the Heppner Times, and will continue so for a few weeks. Thus far there has been about 40,000 sheep shipped out besides as few carloads of horses and cattle, but the shipment of sheep has only just fairly begun.

W. M. Res. the Montana sheepbuyer, shipped out 56 carloads of sheep from Heppner the past week. There were about 20,000 sheep in the two trainloads one train going out Sunday and the other Monday. They will be unloaded at Forsyth, Mont., for Summer range. It required just three days to dip this entire lot, the dipping crew averaging about 7000 a day. ment this week, and was disturbed by the Russian outlook. The only interest in our market was due to movements in special stocks. American Sugar and American Beet Sugar started upwards together as they did several weeks ago and revived some rumors of intended changes in trade relations. The rumors were without any confirmation. The usual Monday rise in Brooklyn Transit on the strength of Sunday seasible traffic was reversed, owing to yesterday's inclement weather and poor traffic.

There was quite a sharp decline during the There was quite a sharp decline during the

first hour of the trading. The rise in Read-ing had the effect of checking this and partly overcoming it. But when prices got back to about Saturday's closing level, the trading became listless and indifferent and the drift CHICAGO, May 28.—Cattle-Reccipts, 22.

000; strong to 10c higher; beaves, \$458; stockers and feeders, \$2.7594.50; cows and helers, \$1.7565.35; calves, \$5.2596.75; Texas fed steers, 2494.60.

Hessian Fly in Polk County. Hessian Fly in Polk County.

DALLAS, May 28.— The alarming report comes from Oak Grove, this county, that the Hessian fly is destroying some of the wheat fields of that vicinity. No complaint has as yet been heard in the vicinity of Dallas, but great anxiety is felt that the greatest crop of wheat seen in Western Oregon for years may be attacked. Reports from farther couth indicate that considerable damage has already been done, and that some fields are being clowed un. Small Fruits Pientiful at Chemawa.

CHEMAWA, Or., May 28.—Small fruits are plentiful in this section. Strawberries are now on the market, and are very large in size, but lack their usual flavor, owing to continued cold rains. Other small fruits, such as blackberries, logan berries, etc., will be very plentiful in this neighborhood. New York Cotton Market.

YEW YORK, May 28.—Cotton futures sed steady at a net decline of 428 points.

LIVERPOOL, May 28. — Hops in London, Pacific Coast, firm; 1363 15s. Fire Destroys at Chilliwack.

BELLINGHAM, Wash., May 28.—Nine buildings in the business district of Chilliwack, B. C., were destroyed by fire today, according to a special from Vancouver, B. C., to the Heraid. For a time the whole town was in danger, but the newly installed water system proved the means of saving it. The total loss is about \$25,-000, with insurance of about \$15,000. The business houses wiped out were Grossman's grocery, Gillander's tobacco store, Mrs. Carroll's millinery, Knight's ary goods, Smith's butcher shop, McIntosh's harness shop, Henderson's under-taking establishment and Ashwell's gen-

Governor Mead at Exercises.

eral store.

CHEHALIS, Wash., May 28.-(Special.)-Memorial day was appropriately observed in this city yesterday. A large crowd was present at the exercises held in the Opera-House at II. A. M. Governor Mead was present at the service. The address was delivered by Rev. Donald A. Mackenzle, of the Presbyterian Church.

of the Presbyterian Church.

A feature of the day was the funeral of Captain M. W. Forrest, an old veteran, and one who had always taken a prominent part in the exercises of the day in

Fluctuations in Wheat in the Chicago Pit.

JULY IS FRACTION LOWER

Sentiment in Market Is Bearish, but Selling Is Held in Check by Fresh Damage Reports

From Kansas City. CHICAGO, May 28.—Sentiment in the wheat pit today was bearish, but selling was held in check by fresh damage reports. The open-ing quotations were at the lowest point of the day, local traders who were prompted by

ing quotations were at the lowest point of the day, local traders who were prompted by absence of rain in the Spring wheat territory selling freely. The fact that rain had fallen in Illinois, Indiana and the Ohio Vailey also created bearish sentiment early in the day. Toward the end of the first hour shorts bought freely because of an official forecast of rain tonight in Minnesota and other sections of the Spring wheat country. Later came dispatches from Kansas City claiming that many damage reports were coming in from Weatern Missouth, Southwestern Nebraska and Northeastern Kansas. This strengthenout prices somewhat, and during the last half of the assion the feeling in the pit was firmer. The market closed steady, July opened 1,5% to, to 1,0% to lower, at \$25,6834c, advanced to \$34c, and closed 1,0 lower, at \$4,683%c.

Increased local receipts and wet weather in the Middle West caused some weakness in the corn market during the early trading. Later, bowever, the market became strong on covering by shorts and buying by cash houses. The market closed strong at the highest point of the day. July opened 1,6% to 1,6 lower, at 47% the 1,7% the lighest point of the day. July opened 1,6% to 1,6 lower, at 47% to 1,7% the ligher, at 48% of 1,6% to 1,6 lower, at 47% to 1,7% the ligher, at 48% of 1,6% to 1,6 lower, at 47% to 1,7% the ligher, at 48% of 1,6% to 1,60 lower, at 47% to 1,7% the light at the pointing, but lister a firmer feeling developed in sympathy effect on the oats market at the opening, but lister a firmer feeling developed in sympathy

Wet weather in Hilnois had a depressing effect on the oats market at the opening, but later a firmer feeling developed in sympathy with the strength of corn. July opened to lower at 33%c, advanced to 33%c, and closed the later at 33%c 33%c. Notwithstanding a 5c decline in the price of live hogs, the provisions market was firm

all day, local packers were free hidders for lard and ribe, but offerings were small. This started active covering by shorts. At the close July perk was 20c, lard was up 10g 12½c, and ribs were 17½c higher.

The leading futures ranged as follows:
