HER RADICAL STEP

Japan Makes Great Stride on Road to Socialism.

NATION ENTERS BUSINESS

Follows Nationalizing of Railroad by Partnership of Government With Individuals in Industrial Work of Manchuria.

WASHINGTON, July 18.—According to notices received by the Bureau of Manufactures, the Japanese Government has undertaken one of the greatest experiments in the world's history, which indicates a clear purpose to protect, supervise, develop and nationalize all Japanese industries. It is stated that the provision for the nationalization of railways was but a single step in the great plan of industrial nationalization toward which the country is fast approaching.

The movement for Manchurian nationalization has received careful attention, and it is now proposed that a company shall be formed by the Government and private capitalists jointly for the purpose of operating the railroads, forests and mines in Manchuria.

If successful along the lines Japan is now working, it is said that the individuals and corporations of America that are striving for the trade of the Orient will discover that they are not competing for this trade against individuals and corporations of Japan but that they are in commercial conflict with the Japanese nation itself.

LOANS TO AID FOREIGN TRADE

Japanese Plan to Exploit Manchuria and Corea Revealed.

WASHINGTON, July 18.—Information received by the Bureau of Manufactures is to the effect that a great guild of cotton, manufacturing companies of Japan has been formed to capture the Manchurian trade. In connection with the enterprise the government has decided to make loans through the Yokohama Specie Bank without limitation as to the amount, not only on cotton textiles but on matches, cement, beer, marine products, lumber and other goods to be exported to Manchuria, at 4 per cent per annum. As soon as a single company has effected a large yearly export, the government will refund 5 per cent of this interest. As regards freight, the government will carry out negotiations with the Chinese Eastern Railway and the subsidized Japanese lines.

The government will pursue a similar policy with regard to Corea, where the Daifuk Ginko (First Bank) is to act as the Specie Bank in Manchuria. The Bureau of Manufactures has received reports from Ambassador Wright at Tokio and from other sources confirming this new movement by Japan.

Ameer Wants Educated Nation. LAHORE, India, July 18.—The Ameer of Afghanistan has issued a notable pronouncement on the subject of education in his domains. He says education is retarding, but that the fault is not with the teachers, but with the government officials, who discourage education, dreading its leveling tendencies. The Ameer

warns the high-born officials that they must either change their attitude in this connection or be left behind. Henceforth, he says, education will be the sole path to state's service.

SEATTLE SORRY, SAYS HILL

(Continued From Page 1.) cerned, Seattle is not in a position to handle much of the business. On the Great Northern is estimated to be 3,000,000 bushels. Hill put the figures at 3,000,000, but grain men say this is too high. It is about one-fourth the amount the Northern Pacific handles. Everett Is Logical Wheat Port. Logically, the wheat trade of the Great Northern ought to go to Everett to save the long haul to Seattle. Moreover, cheap property can be had there, while there is nothing available in Seattle. What Northern Pacific wheat comes to the Sound will go pretty much to Tacoma if the Northern Pacific can divert it there. With the competition of the north-bank line it will probably be handled by way of Vancouver, for Hill is determined that a water grade be had that will enable him to haul twice as many cars with one engine by that road as he can over the Cascades, by way of either the Northern Pacific or Great Northern. It is unreasonable to expect the Northern Pacific to haul its wheat by Tacoma to Seattle. Hill has it in his power to retaliate in scores of ways, and it is declared that he proposes to call upon all his resources to rebuke Seattle, if it is necessary to do so, to make this city respect his wishes in the future. Harriman May Get Franchise. It is quite likely the Harriman line will get its franchise. The Hill proposal that a first-venue depot be built is answered easily enough by the Harriman people. Councilmen question whether they should undertake to force the St. Paul and Harriman lines to build a joint depot, and even if they did there is not enough room to offset the Hill depot grounds. Between Oriental avenue and Whatumo avenue, where Hill would put all railroads, there is, exclusive of streets, 178 feet of ground, in width. Of this, the Northern Pacific and Great Northern jointly own 170 feet. This leaves but 8 feet available for the other roads. Viewed from another standpoint, either of the depot sites Hill proposes to the Council to force Harriman to accept is too small. One piece of ground, which is cut in two by a street over which railroad franchises now hold, is 288 feet in width. There is not room enough for depot purposes in the length offered. The only block Harriman men believe could be reached satisfactorily is but 160 feet in width. Hill's depot grounds at the south end are 750 feet wide and at the north width is 950 feet. An answer to his position is found in these figures. Harriman will fight for the franchise as he asked for it, and the Council is apt to grant it. Then Hill may make it "a sorry day for Seattle." That is the way the situation stands now.

Prepare Plans for Channel Tunnel.

LONDON, July 18.—Sir Douglas Fox, past president of the Institute of Civil Engineers, has been invited to prepare plans for a channel tunnel. Parliamentary sanction for the scheme will be sought at the next session.

Grafting in War With Japan.

ST. PETERSBURG, July 18.—M. Bratseff, the former employe of the controller, today printed the first of his promised exposures, giving chapter and verse to prove that the government was, during the war with Japan, swindled out of \$100,000 for the rent of fictitious barracks.

SOCORRO IS RUINED

Successive Shocks Shake Down Earthen Walls.

PEOPLE FLEEING IN PANIC

Walls of Hotel Fall While Guests Dine and All Stampede—Extinct Volcano Suspected of Reviving and Causing Shocks.

EL PASO, Texas, July 18.—(Special)—Earthquake shocks numbering between 50 and 60 have practically made a ruin of the town of Socorro, 150 miles north of this place. The courthouse is a mass of ruins and practically all the houses in town are damaged. According to reports received, there is no loss of life. The damage has been wrought by a continuation of slight quakes, which have caused the walls of structures already cracked to tumble to the earth. The first shocks were felt on Sunday, but the real damage has been confined to the last two days. E. M. Fink, a cattle buyer who came from Socorro today, declares he was sitting at dinner at the Winkler Hotel on Monday, when the entire side wall of the dining-room fell in, and the guests and all the waiters scattered in every direction. "The people are in a panic and all who can do so are leaving town." "There is a crater of what is thought to be an extinct volcano not more than eight miles from Socorro, and the inhabitants think that perhaps the volcano has something to do with the remarkable series of shocks. The temperature of the water in Hot Springs at Socorro has increased over ten degrees and it is thought that this furnishes new evidence of internal upheaval of local nature, and that the earth is disturbed at great depths in the immediate vicinity of the town. The National Railroad is sending boxcars into the town to take the people away so great is their desire to leave the town. Huge boulders have been jarring on the track from the mountain sides and trains have been delayed thereby. The bridge abutments have been affected to such an extent that orders have been issued to Santa Fe to reinstate to proceed with great caution over bridges within a radius of 20 miles of Socorro.

TWO-THIRDS OF TOWN GONE

San Marcia and Magdalena Suffer Less Than Socorro.

KANSAS CITY, July 18.—A special to the Times from El Paso, Tex., says: Socorro, N. M., south of Santa Fe, has been badly damaged by an earthquake. Fifty-two shocks have been felt since Sunday morning. The city hall is wrecked. The buildings of the School of Mines are wrecked and nearly every residence in the city is cracked or wrecked. More than two-thirds of them are at least damaged or destroyed. The town, which is largely of adobe brick, is almost shaken to pieces. The people are fleeing, but no one has been killed.

The entire surrounding country has felt the shocks and much damage has been

done, especially at San Marcia and Magdalena, but not so severely as Socorro.

WEALTHY MAN ARRESTED

While Ill Los Angelian Is Sent to Prison Instead of Hospital.

NEW YORK, July 18.—A man representing himself to be Roswell Sprague Jones, a wealthy mineowner of Los Angeles, Cal., and a descendant of an old New York family, was released from the workhouse on Blackwell's Island late last night, after serving two days on a charge of intoxication. Friends say that his arrest was due to a mistake, and that he should have gone to a hospital instead of to jail. Jones came to New York last April and put up at the Fifth Avenue Hotel. Last Friday night House Detective John Mulholland, of the Fifth Avenue Hotel, sent in a call for an ambulance, intending to have Jones taken to a hospital for treatment. A patrol wagon drew up instead, and Jones was carried off to the Tenderloin police station.

The defendant gave his name as Joseph Jones, and refused to give any information about himself. Jones has a large bank account with the Farmers' Loan & Trust Company, and the bank began an investigation and found out where he had landed.

Jones is now in a private hospital. He is weak and nervous. When asked why he preferred to do two days rather than send word to his friends, he said: "I did ask one of the officials to send my check to my bank, as I was out of money, but I guess he forgot it."

Wife Is Very Indignant.

LOS ANGELES, Cal., July 18.—Roswell Sprague Jones has been, with his family, a resident of Los Angeles at different times for the past few years. He is well known here and is wealthy. Mr. Jones is reported to own large mining interests in Colorado and Arizona, and Mrs. Jones is also said to be possessed of a large private income. The family spent the greater part of their time in traveling for the benefit of Mr. Jones' health. Mrs. Jones, when seen today at her residence, was indignant at the reported treatment of her husband in New York. She says her husband has been ill for some time and threatens to make somebody suffer for his arrest.

Residence Property Sold.

John B. Yeon sold to Mrs. Emma R. Brown yesterday the lots of residence property at the northwest corner of Eleventh and Salmon streets. While the consideration was not announced, it is understood to be \$1,000. The transfer was made by Reed, Fields & Tyan. There are six dwellings upon the site, which is an irregular piece facing 84 feet on Eleventh street and 150 feet on Salmon. It was purchased in April by Mr. Yeon for \$25,000, thus netting him \$5000 profit in two months.

Borah Wins in Fremont County.

ST. ANTHONY, Idaho, July 18.—(Special)—The Fremont Republican County Convention today proved to be very exciting. It resulted in a victory of W. E. Borah, who is asking that the state convention nominate him as candidate for United States Senator, although this was by a narrow margin and after a preliminary defeat at the morning session. The state delegates, 28 in number, were instructed to vote for Mr. Borah for Senator in the convention to be held at Pocatello, August 1.

Arrested on Serious Charge.

GASTORIA, Or., July 18.—(Special)—R. S. Ball was arrested here today on a Gammal last evening on telegraphic instructions from the Sheriff of Clackamas County, that the man is wanted at Oregon City to answer a serious charge.

PAYS TO BE HONEST

Justice Brewer Approves House-Cleaning.

LET GOOD WORK CONTINUE

Tells Life Insurance Men It Is Better in Long Run to Sell Everything for What It Professes to Be.

MILWAUKEE, Wis., July 18.—"There has been a good deal of disturbance in the body politic the past year and it is likely to continue. The Nation is engaged in the business of cleaning house. Uncle Sam is disturbing a great many. There are a great many that wish he would not be so particular. The truth of it is, we have been a long time fixing up our front yards. They make a magnificent showing. We have forgotten that every house has a back yard, and have not been as particular about it. We are going to clean the back yards."

These were the words of Justice David J. Brewer of the Supreme Court of the United States, in an address tonight before the large number of life insurance agents who have been holding their annual convention in Milwaukee this week. Continuing, Justice Brewer said: "As a result of the work now going on there will be truth and honesty in every market and industry. A great many objects to what is going on. They say it is disturbing business and interfering with prosperity. It may be that some persons are interfered with and suffer some temporary embarrassments, but nothing will better build up this country than to give every man, whatever he buys in our markets, just what it purports to be. In the long run everything will be improved if everything universally is just what it ought to be, and every man in the country will be profited in the long run. Some think we are going to have trouble every time there is an expose. It is not true. The great American people is not un-sound. Tonight I want to appeal to you as men and women of this Republic, to the feeling that the glory and future of this Republic depends upon you. Every individual should step forward and say: 'I am going to see that peace, justice and righteousness prevail.' I am sure then that peace will prevail throughout the land."

A Socialistic View of Earthquakes.

Wiltshire's Magazine. That the splendid effort on society in San Francisco of the throwing together in close organic union of all classes for a number of weeks, as a result of every one being temporarily deprived of private property, will eventually show itself is certain. This throwing together of all classes together is exactly what is needed in order to develop the highest type of man, and I have no question but that it will effect the development of a much finer and better society in San Francisco than has ever before in the history of any American city. For a while each for all and all for each was the city law. San Francisco had all the knowledge of the 20th century, all the mechanical inventions and all the advantages of living under what was practically a state of socialism for a number of weeks. She had a

real vision of the social life of the future, and it should profit her soul. The natural result should be the development of art and literature there to a greater degree than has ever before been seen in any American community. Never

has the American mind been so stirred and nourished. I predict that the authors and the dramatists and the artists which San Francisco will produce in the next ten years will astonish the world. It will be the golden age of California.
