RATE LAW IS NOW BINDING ON ROADS

None Has Yet Complied With the Section Requiring Tariffs Filed.

MORE TIME TO BE GIVEN

Coal Roads Want Ruling on Commodity Provision - All Extras Included in Rates_Accounts Are to Be Uniform.

NEW YORK, Aug. 27.-The new railroad rate law, which applies to all railroads doing an interstate business, will go into effect at midnight tonight. It will be enforced by the Interstate Commerce Comforced by the Interstate Commerce Commission. According to the new law, the roads were to have filed with the Commission by midnight all their tariffs and charges, showing not only the full cost of transportation from point to point, but also what items go to the making up of this cost. From tomorrow on there can be no "extras," but the shipper is expected to be able to obtain in advance a final statement of the charge he has to meet

More Time to File Tariffs.

It was stated that in fact not a single company has been able to comply fully with the provisions of the law requiring them to have all their schedules on file by midnight. The schedule of switching charges was the most difficult of completion and it is said that no road has been able to finish it in time to file as the law directed. Under the law every company which fails to complete its schedules may be fined, but it is understood that the Interstate Commerce Commission will give additional time in every case when a road has given evidence of sincere intent to comply with the law. It was stated that in fact not a single

case when a road has given evidence of sincere intent to comply with the law.

To discuss this and other points, a committee representing the big Eastern raliroads will go to Washington tomorrow in order to meet the Commission. This conference will be attended by representatives of the anthracite coal roads, who are anxious to obtain a ruling from the nission on that section of the law prohibits a railroad from carrying from state to state any article manufac tured, mined or produced by it, except for its own use. This would include coal.

All Charges in One Rate.

It is expected that shippers will find themselves benefited by the provision which requires the rallroads to include all charges of whatsoever nature in their quoted rates. Heretofore a shipper has had to figure for himself on loing, refrigerator and elevator charges and the dozen or more other incidentals, dickering with the sequents commandes which had a en or more other incidentals, dickering with the separate companies which had a hund in transportation or care of his shipment. Now the railroad must do that, and the shipper meets but one charge and deals with but one concern. All the sources of side charges are consolidated, and private cars, sidetracks, spurs, terminals and elevators are made subject to the law.

Uniform System of Accounts.

The new law also requires the railroads to establish a uniform system of accountto establish a uniform system of accounting and to keep their books open for inspection at all times by the expert accountants of the Commission. This feature is expected to go far toward abolishing the rebate evil of the past. The rall-read accountants are now conferring in regard to the uniform system of booksening which however will not go into keeping, which, however, will not go into effect until June 1, next year. In the meantime, the Commission has put its own experts at work devising a system which will be clear enough to suit the

As a direct consequence of the provis-ions of the rate bill, the Union Pacific ions of the rate bill, the Union Pacific Railway has determined to install its own system of refrigerator cars. Heretofore the Armour private cars have had a monopoly of this business over the Union Pacific and Southern Pacific, with all the profitable California fruit trade. The Union Pacific today opened bilds for the construction of 800 steel underbody refrigerator cars, and is likely to ask for bids for another lot soon.

Shippers to Confer With Board.

WASHINGTON, Aug. 27.—The executive committee of the American Shippers' Association will confer tomorrow with the Interstate Commerce Commission as to the discretionary powers granted the Commission under the new law and will discuss with the Commission the ques-tions on which the carriers have asked a ruling. The executive committee in-formally discussed the questions in committee today.

"I suppose that President Roosevelt has a right to write his messages in any style of orthography to which he may incline," he remarked, "but I think it will be a long time before such a style as that proposed becomes very popular. I do not myself care for it, and I think the same view is held by a majority of educators. There are some distinguished men, such as President Butler, of Columbia, who have long favored it, but I do not see that their work has brought much of accomplishment.

"The English will hardly adopt this new system. It will mean not only that the public printers would be obliged to make two sets of plates, but all the present plates of the standard and popular works would be rendered without value. It will be found the people will not like the look of 'thro' and 'tho' and words similarly spelled."

Wins Over English Scholars.

NEW YORK, Aug., 27,-The simplified spelling board today announced that two distinguished British scholars had ac-cepted memberships to testify their sym-pathy with the new movement to im-prove English orthography. One is Dr. J. A. H. Murray, the senior editor of the great Oxford Dictionary of the Eng-lish Language, of which the associate editor is Henry Bradley, who joined the simplified spelling board some weeks ago. The other is Prof. Joseph Wright, editor of the English Dialect Diction ary. Speaking of these recent accession, Brander Matthews said:

A Valuable Agent.

The glycerine employed in Dr. Pierce's medicines greatly enhances the medicinal properties which it extracts and holds in solution much better than alcohol would. It also possesses medicinal properties of its own, being a valuable demulcent, nutritive, antiseptic and antiferment. It adds greatly to the efficacy of the Black Cherrybark, Golden Seal root, Stone root and Queen's root, contained in "Golden Medical Discovery" in subduing chronic, or lingering coughs, bronchial, throat and lung affections, for all of which these agents are recommended by standard medical authorities.

In all cases where there is a wasting away of fiesh, loss of appetite, with weak stomach, as in the early stages of consumption, there can be no doubt that glycerine acts as a valuable nutritive and alds the Golden Seal root. Stone root, Queen's root and Black Cherrybark in promoting digestion and building up the fiesh and strength, controlling the cough and bringing about a healthy condition of the whole system. Of course, it must not be expected to work miracles. It will not cure consumption except in its earlier stages. It will cure very severe, obstinate, chronic coughs, bronchial and laryngeal troubles, and chronic sore throat with hoarseness. In acute coughs it is not so effective. It is in the lingering coughs, or those of long standing, even when accompanied by bleeding from lings, that it has performed its most marselous cures. Send for and read the little book of extracts, treating of the properties and uses of the several medicinal roots that enter into Dr. Pierce's Golden Medical Discovery and learn why the medicine has such a wide range of application in the cure of diseases. It is sent free. Address Dr. R. V. Pierce, Buffalo, N. Y. The "Discovery" contains no alcohol or harmful, habit-forming drug. Ingredients all printed on each bottle wrapper in plain English.
