## BUYS NEW PRINTING PLANT

### STATE PRINTER DUNIWAY TO HAVE FRESH MACHINERY.

Owner of Present Plant Offers to Give It to State if Printer Is Placed on Salary.

A new printing plant for the new State Printer, Willis S. Duniway, in the Capitol in Salem, will take the place of the present plant, owned by Frank C. Baker, ex-State Printer, and will be operated on and after Duniway's assumption of the office, January 14, 1907. Negotiations for the sale of the old plant to Duniway were considered by the two parties for some time, but it is understood that the parties have not yet agreed on. Baker says that should the Legislature put Duniway on salary, he will give the old plant to the state. Two new presses will arrive for Duniway's plant early next month, and two are already on hand. Type and other accessories have been ordered, which will bring the total cost up to between \$12,000 and \$14,000. The new machinery will be installed before January 14, so that Duniway will be ready to turn out the Legislature's printing on the very first day.

Baker's plant was installed by him in 1887, and was used by him eight years. When Leeds succeeded Baker as State Printer in 1895, he used the plant for eight years more. Leeds paying Baker as compensation 25 per cent of the net profits of the office, according to Baker's statement. Whittier, who became State Printer in 1903, used the plant for the last four years, paying Baker a rental of \$100 a month. Baker says that he desires to present the plant to the state, but that unless the state shall put the Printer on flat salary it will be of no use to the state, since the gift would only increase the emoluments of the Printer.

### Will Erect Eight-Room Schoolhouse.

The St. Johns School directors have purchased ground for a new schoolhouse in the Stewart tract in the northern part of the district, and next year will erect an eight-room building on a 16-room building plan. Something over a block was purchased and the price paid was

## STATE TEACHERS MEET

### Pedagogues Gather This Morning at Portland High School.

A meeting of the western division of the State Teachers' Association will be held this morning at 9 o'clock in the Portland High School. The first hour and a half will be taken up with department work. The first, second and third grade teachers will meet in the assembly-room of the High School. Those of the fourth, fifth and sixth grades will hold their meeting in the round, while those of the seventh and eighth grades will meet in room 16.

### Nomination of Officers and the Selection of a Place for Meeting Next Year will occupy the attention of the association till noon. Balloting for officers will be conducted by an election board and will continue all day Tuesday and until noon Wednesday. All teachers holding membership certificates will be entitled to vote.

### Beware of Frequent Colds.

A succession of colds or a protracted cold is almost certain to end in chronic catarrh from which few persons ever wholly recover. Give every cold the attention it deserves and you may avoid this disagreeable disease. How can you cure a cold? Why not try Chamberlain's Cough Remedy? It is highly recommended as a cure for colds. Mrs. M. White, of Butler, Tenn., says: "Several years ago I was bothered with my throat and lungs. Someone told me of Chamberlain's Cough Remedy. I began using it and it relieved me at once. I used it for some time and it cured me. Now my throat and lungs are sound and well." For sale by all druggists.

## PAVEMENT FOR IRVINGTON

### OVER THREE MILES TO BE LAID DURING NEXT YEAR.

### Bitulithic Coating to Be Given Streets—Plans for Improving Many Other Thoroughfares.

Councilman Menefee, of the Ninth Ward, announces that over three miles of bitulithic pavement will be laid in Irvington near the track in 1907. For the present, the streets will be graded and cement sidewalks laid, and the hard pavement will be put down next year when the weather will permit. The cost of improving the streets in this tract alone will be above \$100,000.

Councilman Menefee also says that the improvement of Union avenue from Holladay avenue to Alberta street, at Highland, with hard pavement may be considered practically insured, as the petition is being signed up. He is confident that it will mean that Union avenue will be paved through to Woodlawn eventually, making it the finest street on the East Side. Union avenue also will be paved between Holladay avenue and East Burnside street with bitulithic, making a total distance of over two miles of hard pavement north from East Burnside street, exclusive of the improvement southward, which will be extended to Belmont.

A movement will be started for a steel bridge across Sullivan's Gulch, on Union avenue. Including the improvement of Hawthorne and Grand avenues, which are to be treated with bitulithic pavement, over nine miles of hard pavement will be laid in 1907.

L. T. Feery, member of the executive committee, says that if Union avenue is improved as contemplated to Highland and later to Woodlawn, the adjacent property will become mainly business property, because of the extraordinary growth east and west of the street. He says even now corner lots on Union avenue between Morris and Alberta streets, are selling for \$300 and inside lots for \$100.

## THINKS ROAD IS ASSURED

### Eagle Valley Line Will Soon Become a Reality.

W. L. Vinson, of Baker City, who controls the right of way for the Eagle Valley Railroad, which when constructed will tap one of the richest agricultural districts in the state, is a guest at the Portland Hotel. He is confident that within the next few months actual construction of the line will be under way. At present efforts are being made to secure the balance of the bonus of \$100,000 which the business

and commercial interests of Baker City agreed to raise. Up to date between \$75,000 and \$50,000 has already been contributed, and additional pledges are being made. It is believed that the remaining \$25,000 will be guaranteed within the next few weeks so that contracts for the grading and construction may be let. The surveys of the right of way have been completed. It is altogether probable that the O. R. & N., or Daniel Eckles, of Ogden, Utah, the wealthy lumberman who owns the Sumpter Valley Railroad, will put the line through, it being understood that both interests are contemplating making bids for the right of way.

The Eagle Valley Railroad, according to Mr. Vinson, will open markets for the famous agricultural products of this district, products which in spite of the fact that they have had no outlet to the markets of the world save by wagon have taken prizes at fairs and expositions for years. Owing to the present lack of transportation facilities the little else but alfalfa can be raised with profit to the farmers.

### Hazel Weir Has Trial Trip.

The trial trip of the new steamer Hazel Weir was held yesterday, and the craft proved to be one of the smartest on the river. She is not only speedy, but is easily handled. The Hazel Weir was built by Captain "Cash" Weir. On the trip yesterday were a large party of the skipper's friends, all of whom wanted to take a turn at "running the boat," as the landlubbers styled the act of steering the craft. It is reported that Captain Weir intends to operate the steamer between this city and the Lewis River.

### Northwest Again in Service.

After several weeks on the ways at the Portland Shipbuilding Company's yards, where she underwent repairs, the steamer Northwest went into commission yesterday and started down the river looking as spry and again as her. The Northwest was sunk several weeks ago near Martin's Bluff. She is owned by the Kellogg Transportation Company.
