The man you propose to send to the United States Senate is now the head of the mining and smelting industry in this state of Colorado. His business has gained this exalted position by reason of his invasion and violation of the Federal law in obtaining preferential railroad rates, thereby being enabled to compete with the common carriers, and in the event of his election he will resign all connection with the American Smelting & Refining Company.

NEW YORK, Jan. 15.—At the convention of the National Boot and Shoe Manufacturers Association the action of the Government in appointing a commercial tariff commission to confer with a like commission of the German government with a view to re-arrangement of the tariff between the United States and Germany was approved.

The convention adopted a resolution approving the adoption of a maximum and minimum tariff schedule, and recommending that the President of the United States be vested with power to apply the same in negotiating commercial treaties.

President John H. Hanahan in his annual address said: "We all concede as a general proposition that tinkering with the tariff is dangerous, in that it may bring confusion to our industries and unsettle the prosperous conditions that now prevail. But the tide and leather

and the boot and shoe industries have got beyond the infantile stage and could well afford a reduction of tariffs and still be protected from any foreign manufacturer. The general prosperity of our country is paramount to the needs of any one industry and yet there must be a way by which tariffs may be adjusted without disturbing the equilibrium of our prosperity.

At a banquet given by the association tonight A. Augustus Healy, vice-president of the United States Leather Company, in a speech said:

The thunderbolts from Washington are coming so fast that we don't know which one of our individual heads they will fall on next. We, the leather trust, welcome an investigation. ST. PAUL, Jan. 15.—Unusual cold weather prevails throughout the Northwest with no immediate relief in sight. Snow blocks the railroads and the temperature has fallen many degrees. It is reported at the great Northern general office that the mercury registered 30 below zero this morning at Browning, Mont., and that there is no point between Great Northern and Great Falls where the maximum temperature is above 25 degrees below zero. Great Northern employees are battling against snowdrifts which are 20 to 30 feet high.
