MOB LYNCHES A POLICEMAN

Body Riddled by Bullets and Cast Into Canal-Troops Fire.

NARBONNE, June 20.—The riotous ele-ment of the populace of this place cast off all restraint this afternoon and the city became the scene of many wild excesses. A secret police agent was lynched, and other persons were treated with the most extraordinary brutality. For a gendarme or policeman to appear on the boulevardes me was to court risk of being clubbed death. The troops ultimately were obliged to intervene for the protection the officers of the law. This resulted in

DEPUTIES ATTACK MINISTRY

Premier Clemenceau Declares He Will Put Down the Rebellion.

PARIS, June 20.—The government was put on its defense in the Chamber of Deputies this afternoon when it was saked to justify the repressive measures asked to justify the represerve measures adopted against the rebellious winegrowers of the south, but after subjecting Premier Clemenceau to a hot fire, the deputies decided to postpone until to-morrow a formal interpellation on the

subject, on which the fight of the ministry hangs.

After confirming the reports of the sanguinary fight at Narbonne and Montpeller, for which he biamed the local roughs, the premier declared his intention to repel attacks on public buildings until driven from his post by the chamber.

A special dispatch from Narbonne says that a state of siege was proclaimed there at noon. No confirmation of the report was obtained.

Set Fire to Prefecture.

PERPIGNAN, France, June 20.—A dis-perate attempt was made tonight by a huge crowd of rioters to burn down the prefecture. The crowd fought off the fire brigade for a time, but, assisted by the troops, the firemen finally succeeded in extinguishing the fiames. The build-ing, however, was badly damaged. Thou-sands of manifestants are parading the streets tonight in a state of the wildest excitement.

stood at the side of the road with an old rusty 44 Winchester rifle, leveled at Archie Turner, the driver. He called on Turner to hold up, and then com manded the passengers to put up their hands.

He waited until the second stage ap peared, when he commanded all the passengers to alight and hold up their hands. He then singled out Francis S. Eaton, of Boston, to pass the hat, demanding of the frightened passen-gers their purses and watches. After having made the collection,

Eaton was compelled to tie the wealth, consisting of eeveral articles of jewelry and \$250, in a handkerchief, and pass it over. While the collecting process was going on the robber compelled Mrs. Eaton to stand be-hind him, thus using her as a shield from any attack from the rear. While waiting for the second stage

CHICAGO, III., June 20 .- (Special.)-Officers of the Chicago Junction Railroad, the outer belt line of Chicago, today admitted that it had been leased to the Vanderbilt lines with the right to purchase, and the prediction was made that it would be purchased within a year. The Vanderbilt lines already own the inner belt and the \$80,000,000 coup in securing the outer belt gives that system control of the greatest tonnage produc ing area in the world.

Insure Control of 80 Per Cent.

Every road that enters Chicago, or that can enter, must bisect one or both of these belts and pay tribute. It is estimated that this deal will ensure the New York Central lines at least 80 per cent of all traffic originating in and around Chicago, or which uses this city as a transfer point.

Another integral part of this great traf-

fic coup which the Vanderbilts have been quietly perfecting for the past five years is the Chicago, Indiana & Southern road, which they have built directly south from Chicago to Danville, where it connects with the Big Four road. It is a part of the comprehensive traffic campaign which they have carefully planned and executed to extend this system straight south to the Gulf before the opening of the Panama Canal.

Accordingly, when the canal is opened, the New York Central lines will, through the expenditure of at least \$125,000,000 and possibly \$150,000,000, have the whip hand over the greatest tonnage producing area in the world. Traffic men say that this plan will give the Vanderbilts practical control over the following traffic:

Be Able to Dominate Traffic.

Traffic originating from all points outh of Chicago to the Gulf and destined to points east of Chicago. Traffic originating anywhere west of Chicago and destined for points east through Chicago or around it. All traffic originating east of Chicago destined for points south, west or northwest of Chicago and routed through or around Chicago. All coal traffic originating in a vast field in Illinois and Indiana and destined for points east, west and northwest of Chicago. The first call ing in and about Chicago and destined for points east and many points south

The line known as the outer belt of the Chicago Junction Railway Company, consists of 24.8 miles of tracks wned by that company and 13.8 miles owned by the Chicago Terminal Transfer Railway Company and over which the Junction Railway Company has a 99-year lease.

At the afternoon session, the committee on credentials recommended that the delegations from the National associations be seated because they lived west of the Mississippi River. The report was adopted.

Secretary Garfield made a lengthy argu ment in support of the position assumed by his department. He read a letter from President Roosevelt which was addressed to Secretary of Agriculture Wil-son, when it was expected he would be present at the convention. The letter in part follows:

part follows:

There has been placed in my hands a paper purporting to be issued by the programme committee of the Public Lands Convention to be held at Denver. The pre-liminary discussion of the general subject in this paper contains several statements to which I desire to call your especial attention, as they not merely misrepresent the attitude of the administration, but portray that attitude as the direct reverse of what it really is.

attitude of the administration, but portray that attitude as the direct reverse of what it really is.

The first and most important of these misstatements is to the effect that there has been a change in the public land policy of the Government, which change will result in depriving the Western states of the right to settle the public lands with American citizens. This allegation directly reverses the actual facts. The course the Government is now pursuing is to carry out the traditional home-making policy of the United States as to its public lands. The men most interested in opposing the action of the Administration are those who are endeavoring to upset the traditional course of the Government, and are doing all in their power to turn the public lands over to be exploited by rich men and powerful corporations whose interests are hostile to those of the homemakers. those of the homemakers.

Settlers' Rights Come First.

The policy of the present Administration has steadily been, and is now and will be, to promote and foster actual settling, actual me-making on the public lands in every

to promote and foster actual settling, actual home-making on the public lands in every possible way.

We have incurred the violent hostility of the individuals and corporations seeking, by fraud, and sometimes by violence, to acquire and monopolize great tracts of the public domain to the exclusion of settlers. The beneficiaries and instigators of, or participators in, the frauds, of course, disapprove the acts of the Administration. But if the Administration's policy is upset, the one man who would be irreparably injured would be the settler, the homemaker, the man of small means, who has taken un a farm which he intends himself to work, and on the proceeds he intends to support and bring up his family.

Lastly, the coal lands that were withdrawn from settlement to enable Congress to consider a law to protect public interests against the coal monopolies, by leasing the rights to mine the coal. Unfortunately, Congress falled to act in the matter and most of the coal lands have been already restored to entry, while the remainder are being restored as rapidly as the necessary examinations in the field can be made.

As a matter of actual fact most of the coal lands have hitherto been taken under some forms of entry other than those of the coal entry laws, and in many cases by actual fraud. The Administration will certainly renew its efforts to get Congress to pass a law which will do away with the fraud.

The writers of this programme state that the plan of Government control of the range

pass a law which will do away with the fraud.

The writers of this programme state that the plan of Government control of the range submitted to Congress last Winter involved the perpetual ownership of the lands by the Government. This statement is not in accord with the facts. This proposed law specifically provides that the range land under Government control should be open to entry or location under all of the public land laws and provided in every way for the protection of the rights of the settler. As a matter of fact, one of the prime reasons for advocating its passage is because if enacted it will safeguard the rights of the homemaker on the public range far more effectively than they are now safe-

Land Thieves Thwarted.

Land Thieves Thwarted.

As to the forest reserves, their creation has damaged just one class: the managers and owners of great lumber companies, which by illegal, fraudulent or unfair methods, have desired to get possession of the valuable timber of the public domain, to skin the land, and to abandon it when impoverished well night to the point of worthlesaness.

It has been alleged that the Government intends to make the users of water for irrigation pay for their water. There has never been any such intention, and no such course will ever be followed while the present Administration is in existence. But owners of water power within National forests should certainly pay something for the valuable services rendered to them by the Government. They are not being charged and cannot be charged for the water so far as the National Government is concerned, but for the protection to their water sheds which they themselves would have to bear the cost of supplying it the Government did not supply it for them.

Mr. Garfield said it was the policy of the Interior Department to put an actual settler on every acre of agricultural land in the forest reserves. The Secretary denied the intention to do anything unconstitutional in regard to the public lands. After a prolonged discussion, the report of the committee on
