# CAME FOR PURPOSE

Politicians Comment on Fairbanks' Visit to Coast.

ARRANGED FOR DELEGATES

Wise Ones Say That Vice-President's Object Was to Line Up Oregon and Washington for the 1908 Convention.

The real purpose of Vice-President Fairbanks' visit to the Pacific Coast is said to have been to arrange for the naming of delegates to the National Republican convention from the States of Oregon and Washington, pledged to sup-port the "second citizen of the land" for the Presidency. This mission of the Vice-President was largely disguised by numerous social functions, which enabled sim to appear in public frequently. But he seems to have been industrious dur-

of Seattle, where he addressed the Christian Endeavor convention, and Senator

Vice-President's trip. But will these two states deliver the goods? Fairbanks, while perhaps not counting on any support from Oregon and Washington should Roosevelt be prevailed on to accept another term, beleves in being on the ground first. With Roosevelt out of the race, he evidently figures on taking chances with all com ers, knowing that to clinch two "unani-mously-for-Roosavelt" Western States would equip him with a prestige not to

e despised. But with Fairbanks in the running, there would be precipitated a situation in Oregon politically that would be inter-Senator Bourne is a loval champion of the President, and it is a certainfrom this state pledged to support Roosevelt, or in event Roosevelt is not a candidate, then for the man who is most acceptable to the President and who stands for the aggressive policies that have been inaugurated by the man with

Such a situation, declare those who claim to know, would necessarily precipitate a contest between Bourne and Fuln. The latter might not be directly volved in the contest in the delegation, as it would be named from this state, but his past relations with Roosevelt give strength to the suspicion that he will not work overtime in sending either a Roosevelt delegation or one pledged to a man who subscribes to the President's

While it is admitted that Fulton will programme, the prominence he took in entertaining Fairbanks at Astoria is taken to indicate a very warm friendship taken to indicate a very warm friendship between them. But with the sentiment in this state so pronounced against Fairbanks as a Presidential candidate, it is said that Fuiton will not be found tying up too strongly with him. If he should tie up there is no way, the wiseacres say, that an open contest between Bourne and Fulton for the control of the delegation from this state to the Vetters gation from this state to the National convention can be avoided. Being a can-didate to succeed himself. Fulton's friends further point out that it would be ill-advised for him to be a party to any scheme that is opposed to the Presi-dent's policies in a state where those Viewing the situation in this light, they viewing the situation in this light, they seriously doubt Fulton's complicity in any plan that may have been devised for putting Oregon in the Fairbanks column in the National convention.

### Gives to Relatives and Charity.

# San Francisco Bond and Mortgage Company

CAPITAL, \$10,000,000 OFFICERS OF THE COMPANY

President, John Lloyd. Treasurer, J. Dalzell Brown

W. J. Bartnett, Charles W. Slack EXECUTIVE COMMITTEE "

Secretary, Rufus P. Jennings

GENERAL ATTORNEY

Rufus P. Jennings B. M. Gunn

This company has been organized to loan money on income property in San Francisco on what is known as the bond and mortgage plan. This involves the issuance of bonds secured by first mortgages on income property, and the sale of guaranteed mortgages AN EXCEPTIONAL OPPORTUNITY TO MAKE MONEY. EARNINGS OF CAPITAL STOCK SHOULD CERTAINLY EXCEED 12 PER CENT PER ANNUM A FEW WORDS TO INVESTORS:-Bond and Mortgage Companies: The first company of this kind was founded by Frederick the Great, of Prussia, in 1770. The plan proved so sound that these companies spread over Europe, and within the past few years have been introduced into America. Their success has been phenomenal. The Credit Foncier of Paris is cited as an example. At the time of the Franco-Prussian War

the bonds of this Company sold higher than French Government bonds. One of these companies has now outstanding loans upon New

York real estate exceeding \$95,000,000. These companies profit by loaning their funds upon mortgages at higher rates of interest

David F. Walker

100,000 SHARES OF THE CAPITAL STOCK OF THIS COMPANY ARE OFFERED FOR SUBSCRIPTION AT \$100 PER SHARE

than they pay on their bonds, and by the interest received on their capital, which is loaned on first mortgages on income property. The capital stock of these companies in America is earning from 12 to 16 per cent per annum. This Company should earn more on account of its exceptional opportunity. 2. Special Opportunities in San Francisco for Such a Company: In California Nature has stored away a vast treasure of gold. In 1906 the gold production of the State amounted to \$19,500,000. Since 1849 the gold production has been \$1,450,000,000, a sum equaling the world's stock of gold in 1849; yet it is believed that but the outermost coffers of this stupendous treasury have been opened. In California is to be found, moreover, the richest agricultural region in America. On the Pacific Ocean California has already a great commerce, which will expand by leaps and bounds. In the harbor of San Francisco the United States has one of its most valuable assets, for this is one of the greatest harbors of the world. The City of San Francisco is destined to be one of the greatest cities of America. She is California's child. She is the commercial and financial heart of California. Her vast business has been unhoused, and new enterprises are waiting to be housed. Money is urgently needed for this. Two hundred million dollars will be required within the next five years. The security is excellent. Forty thousand men are engaged in the rebuilding of San Francisco. Not only is the wonderful activity going on in San Francisco; the whole state is developing with marvelous rapidity. The gross earnings of the Southern Pacific Company in the past fiscal year were \$117,000,000-a record-breaker and an excellent indication of

the prevailing prosperity. All of this phenomenal activity requires capital—hundreds of millions. The SAN FRANCISCO BOND AND MORTGAGE COMPANY intends to furnish a considerable share of the funds required for the rebuilding of San Francisco. You are invited to participate in its certain success. There is no investment safer than that offered by the SAN FRANCISCO BOND AND MORTGAGE COMPANY, and, owing to the

exceptional conditions, the net earnings of its capital stock should considerably exceed 12 per cent per annum. PLAN OF OPERATION The paid-in capital is loaned on approved mortgages. These mortgages are assigned to a trustee, and against them the mortgage bonds of the Company are issued. No change in securities is permitted without the consent of the trustee, who must first be satisfied that the value of the mortgage to be substituted is at least equal to that of the one to be withdrawn. The money realized from the sale of these mortgage bonds is loaned, and the new mortgages are assigned to the trustee, against an issue of additional bonds, which in turn are sold, the process being repeated as often as the business warrants. In addition to this, mortgages guaranteed by the Company are sold to investors at a lower rate of interest than called for by the mortgages, the Company profiting by the difference.

The San Francisco Bond and Mortgage Company has three sources of profit: Interest earned on its paid-up capital.

2: Difference between what it earns on mortgages and what it pays on bonds, which is usually 1½ per cent.

3: Difference in interest on guaranteed mortgages sold by it, which is usually 1 per cent.

Stock subscriptions will be received in PORTLAND at Ladd & Tilton, until July 31, 1907; also in San Francisco at the offices of the
