Weapon Inflicts Ugly Wounds in the Officer's Breast . and Arms.

#### REACHES PORT IN IRONS

Seaman Is Placed in the County Jail for Safe-Keeping-Mate Goes to Hospital for Treatment-Fight Happened Three Weeks Ago.

Saint Francols Mezard, donkey driver on the French bark Alice Marie, Captain Cloatre, which arrived in yesterday from Antwerp, was turned over by French Con-

Chatre, which arrived in yesterday from Antwerp, was turned over by French Consul C. Henri Labbe to Sheriff Stevens and was committed to the county jail to await a hearing on a charge of mutiny and assault with intent to kill.

Mesard had been in irons and confined in the lazaret of the vessel for three weeks prior to the arrival of the bark in the harbor of Portland. The engineer attacked the mate, M. Bouhles, with a knife and inflicted a serious wound in the arm and left breast of the officer. The

knife and inflicted a serious wound in the arm and left broast of the officer. The latter will be sent to the St. Vincent's Hospital this morning. The wound is an usiy one and is in bad condition, not having had proper attention.

On the day the stabbling was done the mate directed Megard to perform some dity about the deck. The latter refused and when the mate started toward him the engineer took refuge in the donkey-room and pulled the door shut. Bouldes forced the door and as it swung open Megard sprung at him with a knife. Several salidors roshed to the assistance of eral suffors rushed to the assistance of the mate and secured and bound Mezard. The latter was then heavily troned and thrown in the lazaret where he remained until taken to the county fall in Portland. Bad blood had existed between the sailor and the mate for some time prior to the

attack on the latter.

The Alice Marie brings general cargo from Antwerp. In addition to 16,000 barrels of cement for W. P. Fuller & Co., she brought appolinaris water, whisky and pig from She was 142 days in making the wayers and off the Horn encountered. the vayage and off the Horn encountered had weather. A number of sails were bud weather. A number of sails were lost and the decks were awash the greater part of the time for more than a week. ship Province is seriously ill with pneu-monia. He was removed from his vessel yesterday and taken to the home of Theodore Knudson where he will remain until he recovers. Dr. C. H. Wheeler is attending him. Captain Jones has been suffering with

Captain Jones has been suffering with the grip for several days. He remained in bed for three days and was so far re-covered as to be able to be around. Sun-day night he was again taken down and resterday morning Dr. Wheeler was called. Mr. Knudson secured a carriage called. Mr. knudson secured a carriage and took the sick man to his own home.

### Tugs Work Non-union Firemen.

TACOMA, Wash., Feb. 18.-(Special.)-Nonunion firemen are now employed on all the tugs of the Puget Sound Tugboat Co. which practically controls the tow-age business between Cape Flattery and the Puget Sound ports. The company, which paid its men better wages than the firemen on the small tugs get, reduced the pay of its firemen from \$5 to \$50 a month. The union would not stand for this and ordered the firemen to quit. The company found more than enough men to fill the vacancies. The occan tug Richard Holyoke came in this noon and the captain said he still had the same engineers. The question of engineers' wages has not been settled yet.

### New Service for Prince Rupert.

### UPHOLDS PINCHOT'S POWER

Appeal Court Says He May Regulate Grazing in National Forests.

OREGONIAN NEWS BUREAU, Washington, Feb. 18.-There is joy in the Forest Service over the action of the United States Circuit Court of Appeals at San Francisco in affirming the decision of Judge Hunt, of Montana, which holds in effect that the Forest Service has the right to regulate grazing within National forests, and can impose penalties upon stock-owners who graze their sheep or cattle within reserves without permission of the department.

There have been decisions in the lower courts both sustaining and reversing the action of the Forest Service in this matter, but the question has never reached the United States Supreme Court, and un-til it is finally passed upon by that body it will not be definitely known what the authority of the department really is. the-meantime the Forest Service is pro-ceeding on the assumption that it is acting within its legal right in regulating grazing in the National forests, and it is greatly strengthened in this assumption by the decision referred to above. The facts of the Montana case are substan-

tially as follows: In December, 1904, Thomas Shannon, a Montana cattleman, allowed his cattle to Montana cattleman, allowed his cattle to drift upon the Little Belt National for-est, without getting permission from the forest Scrvice. Suit was brought against him by the District Attorney for Mon-tana, and on March 18, 196. Judge Hunt, in the United States Circuit Court for Montana, rendered a decision in favor of Montana, rendered a decision in favor of the Government and issued an injunction perpetually restraining Mr. Shannon from allowing his cattle to drift upon the

National forests.

Montand has a fence law by which land-owners must fence their land before they can obtain redress from stockmen whose cattle, feeding upon the open public do-main, range upon and injure the private lands. Mr. Shannon's counsel argued that this state law should apply as against the United States, but Judge Hunt held that the power of Congress over the public lands, including the National forests, is complete; that Congress has lawfully delegated to the Secretary of Agriculture the authority to make regulations to prodelegated to the Secretary of Agriculture the authority to make regulations to protect the forests; that the Secretary has properly made a regulation that cattle shall not range upon the forests without permit, and that consequently Mr. Shannon was a trespasser when he allowed his cattle to drift upon the Little Belt forest, although it was unfenced.

Mr. Shannon appealed to the United States Circuit Court of Appeals for the Ninth Circuit, at San Francisco. The court has affirmed Judge Hunt's decision, and this judgment is binding upon all and this judgment is binding upon all affected courts in the Ninth circuit. A similar case is pending in the United States Circuit Court for Colorado, which

Night Circuit, at San Francisco. The court has affirmed Judge Hunt's decision, and this judgment is binding upon all Federal courts in the Ninth circuit. A similar case is pending in the United States Circuit Court for Colorado, which is in the Eighth circuit.

The decision at San Francisco upholds the department regulations

the department regulations governing grazing in National forests in Oregon, Washington and Idaho, as well as in Montana, and unless reversed by the United States Supreme Court, the regulations of the Forest Service will stand. For the time being they are in full force and effect as the ruling handed down at and effect, as the ruling handed down at San Francisco is from the highest court having jurisdiction, to which appeal has thus far been taken.

Temerrow, Thursday, will positively be the last day for discount on East Side gas bills. Portland Gas Company.

Work of removing the old revetment weight in water.

Leads Other Northwest States in Livestock.

### WYOMING HAS MOST SHEEP

Table Showing Livestock Production of Three States Compared With Total Production of Country. Values of the Industry.

OREGONIAN NEWS BUREAU, Wash ington, Feb. 18.—Oregon is the leading cattle state of the Northwest; in fact, all lines combined, it is the leading live stock state of that section. It has less sheep than Idaho; (ewer horses and mules than Washington, but is far shead in its aggregate, as far as values are concerned. This is shown by a table of statistics prepared by the Department of Agriculture, and made public in the Crop Reporter for

November.

The total live stock in Oregon on January 1, 1908, was valued at \$57,729,600; in Washington, \$49,188,000, and in Idaho, \$33,197,600. A closer study of the tables shows the details on which these totals

The following table shows the number and value of all kinds of live stock on the

#### .... 139,000 Oregon Leads in Cattle.

It is apparent from the foregoing figures that Oregon leads in the total number and value of cattle, other than mileh cows and is also the largest producer of mules and swine, and while exceeded by Idaho in sheep and by Washington in horses and milch cows, yet its total number of these classes is so large as to bring its total above that of the adjoining states. Idaho is far and away the largest sheep state, but this is the only branch of the live-stock industry in which it ranks Oregon

The department table gives the average alues of all classes of livestock for the United States, and it is observed by com-United States, and it is observed by comparison that in practically everything except sheep, the Northwest is well above the average. The average price of sheep for the entire United States is \$3.88 per head; higher than the average price in any of the three states named. The average price of cattle is only the \$8 which any of the three states named. The average price of cattle is only \$15.59, which is lower than the averages in those states. The same holds true of cows, horses and swine, except in Idaho, where the average value of horses is well below the general average of \$32.41. The mules of the Northwest do not measure nules of the Northwest do not mer up to the general average price of \$107.76

### Wyoming Leads in Sheep. ,

The report shows that Wyoming is the leading sheep state of the West, its herds numbering 5.885,000 at the beginning of the year. This represents a total value of \$24,423,600. Montana is a close second and New Mexico third. Wyoming, by the way, not only holds the record for number of sheep, but the average price per head, \$4.15, is close to topnotch. 'Texas is, of course, the leading cattle state, reporting on January 1 a total of 7,855,000 head, at a total valuation of \$53,900,000. Illinois leads in the horse line, reporting a total of 1,521,000 head, the total

Another interesting fact brought out by the report is that swine outnumber all other classes of livestock; sheep being second and cattle third, while in point of total valuation horses lead, cattle are sec-and and milch cows third. The following and and milch cows third. The following table gives the totals for the United

#### YOUR FIRST

Results That Count Rule World of

POSITION

Business Effort.

Spare Moments, The young man accepting his first position finds that results are what count the most in the world of wageearners, and that the young man who makes ready promises and does not keep them will not be apt to be favored with an increase of salary when the personnel of the working force is gone over to see which of the men in the employ of the firm are giving efficient service and deserving of recognition.

The young man must make up his mind to accept his first position with one point in view—that he will work all of the time he is on duty during business hours, and that he will not allow any portion of the work to lie neglected. The small tasks, he will find, accumulate rapidly, which will make work outside of his regular hours a necessity. When you see a man working

A safe rule for a young man to follow is to secure eight hours sleep each and every night of the week, for too many social engagements, with the consequent loss of sleep, make it a physical impossibility to properly perform all duties, especially in giving hie employer full value for the salary paid. Many argue that an employer has no right to know how his employes spend their letsure hours. This is not so, for the employer expects every man to keep himself in the proper physical condi-tion to do his work in the best manner

possible.

Punctuality is a good habit for a young man filling his first position to cultivate, as it will prove of lasting benefit to him for all time to come in the future To be exactly on the min-

ute, not 15 minutes earlier or later, both of which waste time, should be the ambition of every young man; in other words, he must be as "regular as the clock," to quote a popular expres-

A bad habit to fall into is to grumble all of the time that you are doing too much work for the salary paid. When a young man is hired by a business house it is a plain business proposition—the duties of the position are fully explained, and the employe agrees to do so much work each day for so much any. If the young man agrees to accomply the position are fully explained. pay. If the young man agrees to accept the situation, he also agrees to do the amount of work that belongs to the position, and if he finds there is too much work for the pay, he has the privilege of seeking another situation, the same as the employer has to get another man to do the work if he learns that the young man cannot fill the position.

## LEARNING THE BUSINESS

A Sermon Showing That Most Men Make Their Own Luck.

(Spare Moments.) If one attempted to tell some people who had succeeded in life but indifferently, that the reason they did not do

ently, that the reason they did not do better was that they did not know their business, no doubt they would be insulted. But the fact remains that a large proportion of failures in life are due to incomplete knowledge of the particular business each was engaged in.

Why is it that one man does better in a given line than another? The lazy man says it is luck. Some believe it to be due to a superior mental equipment, but that cannot be invariably true when sometimes those who fail are infinitely brighter mentally than those who succeed. Many a man well equipped mentally lacks the faculty of putting his talents to use. There are many reasons, ents to use. There are many reasons, but none more important than this: Some men study their business more closely and carefully than others, and act upon what they learn. Given two men, of equal opportunity

and equal brain power, engaged in the same line of work. One is in it because he happened to land there somehow; be takes no particular interest in it beyond the fact that it gives him his living, and his ambitions scatter themselves in vague dreaming about falling into some-thing that will make him quickly rich. The other is in it because he likes it, and his ambition takes the definite form of being a success in it, and doing it better than others do it. He studies that business from A to Z, and after he has its rudiments learned, he studies its details one by one. Perhaps in one of these he sees a chance to specialize, and these he sees a chance to specialize, and by giving to that detail his whole energy and intellect, to be able to do that particular feature of it better than anybody clise has done it before him. Or, perhaps, by giving himself a deeper knowledge of all its details than others have, he becomes one of its generals and is

he becomes one of its generals, and is able to assume a position of command. The first man fails in that business as a matter of course. He deserves failure. He has wasted his talents and his opportunities. If that was not his business, he should have found out what was not he he should have found out what was, and in his chosen line have done as the sec-ond man did. The second man, equally as a matter of course, has succeeded. He succeeded because he deserved to succeed, and because he carned success. Luck! There was no more luck about it than there would have been had the choice between success and failure been plain before them, and one had chosen success and the other failure. That is what they chose, and that is what thousands of men are choseing every day. sands of men are choosing every day.

And generally the fallines are explaining to their friends how lucky the successes have been, and how misfortune and bad luck have haunted their own

## ootsteps. Most men make their own luck. TRY APPEALS NEAR HOME

Humphrey Bill About Alaska Lawsuits Meets California Opposition.

OREGONIAN NEWS BUREAU, Washfor in the House of Representatives if Speaker Camon permits Representative Humphrey to call up his bill providing that appeals from decisions of the Federal Courts in Alaska may be heard in Portland, Scattle or San Francisco. Un-

eral Courts in Alaska may be heard in Portiand, Scattle or San Francisco. Under the present law, all such appeals are heard in San Francisco, and litigants are compelled to go there in order to get a hearing. Because of the long distance, Alaskans object to triis requirement, and it was at their request that Mr. Humphrey introduced his bill.

The California delegation is solidly opposed to the Humphrey bill, but the Oregon and Washington delegations and delegations from several other Northwestern States favor it, and are ready to meet the California crowd whenever the bill can be given time for consideration. The House committee on judiciary; which favorably reported the bilk states in its report that there is no direct communication between San Francisco and Alaska, so that the litigant in Alaska, in order to attend the Court of Appeals in San Francisco, must pass through Seattle or Portland, both going and on his return, and travel about 2000 miles farther than if the case were heard at Seattle or Portland.

A term of Circuit Court is now held annually at Portland and at Seattle, and it would be easy to arrange hearings at either city on appeals from Alaska. Delegate Cale, of Alaska, strongly urged the passage of the Humphrey bill and informed the judiciary committee that the bar of Alaska was very desirous of its favorable consideration.

If the bill can be passed through the

its favorable consideration

If the bill can be passed through the House, it is quite probable that Senator Fullon, being a member of the judiciary committee, could secure an early favor-able report in the Senate, and the fair-ness of the proposition would likely carry it through the Senate in short order.

Pay Bounty to Destroy Latter, Urges Correspondent.

NECANICUM. Or. Feb. 16.—(To the Editor.)—I have read with interest W. L. Findley's recent letter in The Oregonian in regard to our vanishing elk. and heartly join him in his desire to protect the species. Although their perpetuation means largely, cougar meat. The congar, created for some interutable purpose, and furnished with an insatiable maw, must eat, and I i think finds elk meat agrees with him. No cry is heard from the soft-hearted for the perpetuation of the cougar and yet for magnificent heauty and splendid power, he stands unexcelled. He is absolute monarch of the forests, and deartoys more game, both elk and deer, than all of the hunters that invade the mountains of Oregon. While only three of the band of 15 elk were shot by the hunters in the Nehalem Mountains lass Summer, it is highly probable that one-half of the remainder has since been killed by cougars. Wherever deer and elk abound there is the lair of the cougar found, and, lurking on the lonely trails, the crafty cougar sound falls, say during twelve months of the year, to kill at least 100 deer. All these but satisfy his maw, while, crafty ch, he knows no law but hunger's, and he destroys indiscriminately.

I know nothing of the scheme of creation, but if an All-Wise Being created the ells for man's food. I see no harm in eating elk. and if-I neglect my share while living. I shall be a long time dead.

Again, we have chicken-sating parsons or did have—who visit the country members of their congregations, and nothing but chicked dumplings will properly fill them. I am told that in some neighborhoods, when the chickens see a ning hat and a long-tailed coat, that may and snuawk as it is not the confidence of the scheme of creation, but if an All-Wise Being created the ells for man's food. I see no harm in eating elk. It cleanses, soothes, leals and protects the diseased members of their congregations, and nothing but the being for members of the freeze of the country members of the freeze of the freeze of the freeze of the freeze of the freeze

### BRIEF NEWS BY TELEGRAPH

York, Fa.—Mrs. Issue Herrington and her standchild were sufficated by smoke from a fire which destroyed their home. The woman was trying to rescue the child. Denver Col.—Oscar Kirby, son of a Colorado Springs grocer, shot his bride of a few months and killed himself with the same weapon. The couple had lived apart since the week after their marriage.

Johnstown, Pu.—Mrs. Edward Lutzenburg was burned to death and her son, Joseph, probably fatally injured Tuesday in a fire that for a time seriously threatened the town of Barnesboro, near here. Loss \$50,000. London.—The shipstullding strike along the Tyne is likely to be greatly extended, first by a lockout, and second by a strike of the allied trades engineers, who have just decided by an overwhelming majority against a reduction in wages.

Oklahoma City, Okla, -Z. E. Beembloreom was shot and killed Tresday on his farm three miles north of this city by J. C. Wood-son, a former tenant with whom he becams involved in a quarrel. Mr. Beamblossom was prominent in politics.

San Francisco.—Suit was brought Monday against the Woodruff Company, constructing engineers, for \$200,000 damages by the Edward Barron Email: Company in connection with the erection of the six-story hotel building at Taylor and Geary streets.

New York.—United States Judge Lacombe has decided that the naturalization of a man does not extend to entire who are in a foreign country and therefore orders the deportation of Bertha Teletibaum, an Austrian imbedit, though her father is a citizen.

Albany N. Y. This Court of Anneals Tues-

becile, though her father is a citizen.

Albany, N. Y.—The Court of Appeals Tuesday decided that Chester Gillette, of Cortland, minst die in the electric chair for the murder of his sweetheart, Grace Brown, of South Ottello, Chemango County, at Hig Moose Lake, in the Adrondacts, on July 11, 1896.

Los Angeles, Cal.—An eastbound Southern Pacific freight train, bound for Kannas City, Mo., was wrecked Tuesday morning at El Monte, and ten cars loaded with oil and vegetables completely demolished. Three tramps are supposed to be under the wreckage.

West Livingston, N. J.—As the result of a West Livingston, N. J.—As the result of a vivid dream, thrice repeated, George Chenter, of this town, has found his wife's wedding ring, which she lost nearly five years ago. He dreamed that it was under a small stone beneath a certain tree, went to the spot and found it.

Chicago.—Through the picture of her hushand on a bution she wore on her dress, the mangled form of Mrs. Margaret Wilson, wife of John Wilson, was identified Monday night. Mrs. Wilson had been crushed to death by a Northwestern Railway passenger train on Sanday evening.

San Francisco.—James Grosman, a foreman of the Beach Grove Park grading camp, was shot and killed by Sam Taylor, the camp cook, Thesday morning, after a quarrel over the preparation of eggs for the foreman's breakfast. Taylor says he acted in self-de-fense.

Long Beach, Cal.—Robert A. Smith, the octogenerian Mayor of St. Paul. Minn., has been for several days a guest at a family hotel in this city, where he proposes renaining until about May 1. He stated that he had yielded to the solicitations of members of Lis family, who wished him to avoid any possibility of becoming a candidate for renomination.

Washington.—Secretary Wilson has approved the scheme of suburban farms for the unemployed proposed by Seth T. Farreworth, of Chicago and John Ells, of Boston, and said that if they would provide land within range of a five-cent fare from towns he would send experts free of charge to demonstrate the work, and also would send the necessary seeds.

Mr. F. C. Griffith, of Hagerstown, Md. who when market clerk twenty years ago suffered from neuralgia, praises Duffy's Pure Malt Whiskey for completely curing him. It toned up his system, enriched his blood and drove out the dis-

ease germs. Mr. Griffith recently wrote:—
"I highly appreciate your medicine. I'll say there is nothing in any other line of medicine that equals it, and I wish to say it emphatically, as I have tried many. Before I was elected Market Inspector, 20 years ago, I had neuralgia which pained me terribly diagonally across from my heart. The doctor told me it would be my death. Well when I was Market Inspector I concluded I would give your medicine a trial, and it benefited me so much that I continued with it. The neuralgia has been eradicated from my system, and I attribute it all to the use of Duffy's Pure Malt Whiskey, which I recommend to others." Mr. Griffith recently wrote:-

## Duffy's Pure Malt Whiskey

Is an absolutely pure distillation of malted grain; great care being used to have every kernel thoroughly malted, thus destroying the germ and producing a predigested liquid ELK MEAT FOR COUGARS food in the form of a malt essence, which is the most effective tonic stimulant and invigorator known to science; softened by warmth and moisture its palatability and freedom

overlooked a sack of coln containing over \$160.

Fort An Prince, Hayti.—The leaders of the last unsuccessful revolutionary mover ent, lociuding General Firmin, who took refuge in the foreign consulates at Gonaives, still refuse to surrender, and the consula and foreign diplomatic representatives refuse to turn the refugees over to the authorities. President Nord has removed the Minister of Foreign Affairs, M. Sanon, from office, whereupon M. Sanon also took refuge at the French Legation here.

Moore and Wolff; pitcher, Myers, Brown, Looney, Rooper, Todd and Francis; first base, Beatty, Moore, Dyer; second, Claud Swann is expected to be home in time to play in this position; third, Holman, Keck, Proff; shortstop and captain, Kruse, For the outfield there will be many contestants for places.

Overdose of Medicine.

ORGEON AGRICULTURAL COL-LEGE, Corvallis, Feb. 18.—(Special)— Hopes are high on the campus for a first-class baseball team this season. There is more and better material than at any former time. Nearly all of last

SACRAMENTO, Cal., Feb. 18 - Edward J. Rellins, of San Francisco, was found unconscious in a lodging-house at 1115 Sec ond street this afternoon. He had taken an overdose of a patent medicine for ceiving hospital declare his chances for recovery are slight. He had \$50 in coin year's team is available, and in addition there is a long list of recruits, all of great promise. Among the players avail-able for the various positions are the on his person and a bank book showing \$40,000 to his credit in the Hibernia Bank. He went to the lodging-house yesterday

Is an ordeal which all women approach with indescribable fear, for nothing compares with the pain and horror of child-birth. The thought of the suffering and danger in store for her, robs the expectant mother

of all pleasant anticipations of the coming event, and casts over her a shadow of gloom which cannot be shaken off. Thousands of women have found that the use of Mother's Friend during pregnancy robe confinement of all pain and danger, and insures safety to life of mother and child. This scientific liniment is a god-send to all women at the time of their most critical trial. Not only does Mother's Friend carry women safely through the perils of child-birth, but its use gently prepares the system for the coming event, prevents "morning sickness," and other dis-

comforts of this period. Sold by all druggists at \$1.00 per bottle. Book containing valuable information free. The Bradfield Regulator Co., Atlanta, Ga.

INVESTIGATION SOLICITED

ST. LOUIS MEDICAL AND DISPENSARY CORNER SECOND AND YAMHILL STREETS, PORTLAND, OREGON.

The vast multitudes of men who have taken my treatment have not been disappointed. They know that I do not promise more than I perform. To them I have actually illustrated in the cure of their own cases the truth of what I claim, mamely, that my treatment is as tertain to cure as it is that the patient engages my services and follows my directions. My success is due not alone to education, experience, skill and scientific equipment, but to the fact that I limit my study and practice strictly to diseases and weaknesses of men. To male maladies alone I have earnestly and exclusively devoted 25 years of my life and on them all my faculties are concentrated.

MY TREATMENT FOR WEAKNESS Functional derangement, such as premature loss of power, etc., is neither a "weakness" nor a disease. It is a symptom of prostatic disorder. To stimulate activity by the use of powerful tonics is an easy matter, but such results are merely temporary drug effects. Most doctors treat "weakness" in this manner because they do not know how to cure the real cause of the derangement. I am the only physician employing scientific and successful methods. My treatment is a local one entirely and corrects every abnormal condition of that vital center, the prostate gland. My cures are real cures and are permanent.
