The suicide and murder occurred on the second floor of the Vernon hotel on Second avenue at a time when many of the guests of the hotel were walking through the halls, and almost created a panic.

WHY ELK NOT PROTECTED

REPRESENTATIVE CHASE IS BLAMED BY GOVERNOR. Bill Passed by Legislature Was Plainly Void and Executive Therefore Vetoed It.

SALEM, Or., Feb. 18.—(To the Editor.)—In the Oregonian of February 11 is a communication from W. C. Chamberlain, representative from Coos county, blaming the Governor for vetoing House bill No. 424, which, he says, was introduced by him and passed by the Legislature of 1907 for the protection of elk. His letter states the reasons assigned by me for vetoing the bill, and he shows the same ignorance now on the subject he displayed when he prepared the bill in question. His ignorance of the law and of his duties, as a legislator is responsible for the lack of any law protecting elk, and a special credit to the Legislature of 1907, which passed the bill, is that it was not in existence, should have amended the act of the special session of 1907 which had been enacted in the place and stead of section 2011 of Bellinger and Cotton's Annotated Codes and Statutes of Oregon.

BALK AT OLD RING TACTICS

Tacoma Democrats Don't Take Kindly to "Suggesting" Convention. TACOMA, Wash., Feb. 18.—(Special.)—A faction of the Democrats, who believe the recent "suggesting" convention did not violate a resolution of the district

primary law, has determined to enjoin the City Clerk from placing the name of George F. Wright on the Democratic ballot as a candidate for Mayor at the primaries. Legal action will be commenced toward this end within a few days, and a decision from the courts obtained as promptly as possible. The anti-administration Democrats say the object of the convention was purely to keep more than one set of Democratic candidates from entering the field. It was exactly the same procedure, they say, as they had rallied at under the old regime and to correct which the law was passed.

SHOE FACTORIES OF THE E. MAYER BOOT & SHOE COMPANY, MILWAUKEE

Including New Milwaukee Addition, and Seattle Factory (Washington Shoe Mfg. Co.) Built During 1907.

The Construction of Two New Factories in One Year shows the Remarkable Progress of the Largest Shoe Factory in the West.

TOTAL CAPACITY NOW 9000 PAIRS OF SHOES PER DAY.

The F. Mayer Boot & Shoe Company is conspicuous as one of the most aggressive and fastest growing shoe establishments of the West. This is evidenced by the wonderful progress made during the past year.

Two new factories, including one at Milwaukee and the other at Seattle, Wash., have been built, completely equipped with the most modern machinery and up-to-date appliances for making shoes, and placed in full running order. This is the best record ever made by any shoe manufacturing establishment in the West, and speaks volumes for the high quality of Mayer, Milwaukee, custom-made boots and shoes.

The new factory built at Milwaukee is an addition consisting of a well-lighted, substantial brick structure, six stories high, 50 by 150, giving the Milwaukee plant an added capacity that was sorely needed to keep up

with the orders that were coming in from the great and prosperous Northwest territory.

The new Seattle factory (Washington Shoe Manufacturing Company) was necessary to better take care of the rapidly-growing Pacific Coast trade and to meet the requirements of merchants in that territory for prompt deliveries. This factory consists of a five-story building, 50 by 150.

The large eight-story building at Milwaukee and a five-story building at Seattle are used as warehouses, where a large stock is kept to quickly supply the trade.

From present indications, it is expected that, even with the new factories that have been added during 1907, manufacturing facilities will be taxed to the limit to fill orders for Mayer shoes during the coming year. Mayer shoes have secured a tremen-

dous prestige throughout the country, and their brands are firmly established with consumers, who look upon the Mayer trade-mark as a safeguard and guarantee of quality.

Mayer shoes are very extensively advertised in many different ways, but principally through newspapers and periodicals, 11 languages being employed in bringing the virtues of Mayer shoes to the attention of the people.

When it is taken into consideration that the first Mayer factory in 1884 consisted of a two-story building, 40 by 70, it must be conceded that the rapid growth of this business must have been accomplished by manufacturing a good quality of shoes of more than ordinary merit.

The principal brands are the Honorable, Leading Lady, Martha Washington Comfort Shoe, Yerma Cushion Shoe and Special Merit School Shoe.
