CLOSES DAY AT BALTIMORE

Republican Deeds Against Democratic Threats.

TWO POLICIES ON TRUSTS

Taft Would Prevent Monopoly, Bryan Destroy Trusts and Competitors Also-Will Revise Tariff Downward.

BALTIMORE, Md., Oct. 19. - Hitting straight at his opponent with even more flerce thrusts than in the Northwest South, W. H. Taft today carried his campaign to the very doors of New York City and gave a clear indication of the character of the apceches he will make in the Empire State next week.

Mr. Taft spent three hours in Newark, one hour in Wilmington and the entire evening in Baltimore. He encountered tremendous crowds and enthusiasm spontaneous and ample. His extended efforts of the day were at Newark, Elizabeth and Baltimore. Newark he gave attention to all the issues save labor. In his Elizabeth speech he dwelt solely on the labor question, and tonight he combined the topics of the Newark and Elizabeth

Real Issue of Campaign.

"I can only say to you," he re New Jersey today and what I have seen in Delaware today, and what I saw in the South and West the last three weeks I am going to be elected, and it would give me the greatest pride if electoral vote I could have the

"The real issue of the campaign is." said Mr. Taft tonight. "whether you think the Republican party, by what it has done in the last 12 years, is en titled to your confidence. Even if it has done something to displease you. is it not much to be preferred to the Democratic party under any circumstances, considering the history of that party, and considering the peculiarities to use no more offensive expressiof the leadership of that party?"

What Republicans Have Done.

The acts of the Republican party were then recounted. Establishing the gold standard, repealing the Wilson-Gorman tariff bill and enacting the Dingley tariff; fighting the Spanish

He continued:

We put the Cubans on their feet, as we supposed. They stayed there for three years, then they fell on their lanes; we had again to go and help them to their feet. In Porte Rice we have made 1,000,000 propie rejoice every night and every day and thank God that they are under the prosperity that the Stars and Stripes have

These we took up the Philippines—the hardest problem that we had to salve, as the result of the war. Today 500,000 hitpino children are resulting, willing and reciting in English; we have given them peactical control over the central government and foil control over the provincial

ment and foil control over the provincial and municipal governments.

We took up the Panama Canal, which for 466 years since the Lime of Charles V has been the subject of discussion. Under the present administration there has been an organization of the brains, machinery and the hands in such a way that it the course of five or six years any one who knows about the work can promise its competion, so that, your Navy will sail from the Carribean to the Pacific.

Mr. Taft next took up what he termed the "moral awakening" respecting the conduct of large business enterprises, resulting in a quickening of the

Tou would think from statements of Mr. Styan that no progress had been made, but the bourvess is really remarkable. Through the possings of the rate bill the railroads, themselves have abandoned rebailing, have abandoned unlawful discrimination and have taken away the chief instrumentality by which unlawful triets and menopoles have been maintained.

Mr. Tart followed this with his indorsement of the combination of capital for legitimate purposes. He said:

Bryan's Policy of Destruction.

Bryan's Policy of Destruction.

The combination of capital is just as essential to our progress as the combination of the parts of a machine and the fact that the capital is great and the number of plants accorded many is no reason for denocarity them an illegal purpose. The normal, legal purpose of such combination is to reluce the cyst of production by inducing economic monagement of the capital it is only when undue means are taken to stiffe competition that they cross the line of legality and that they ought to be recraited and ponished. Therefore, Mr. Prosecvelt and the Republican administration have directed their attention to prosecuting the cause will be attention to prosecuting the cause will be acceptable. At Bryan, on the other hand, proposes to take steps which shall destroy the cause business. He proposed that we shall abolish the tariff on what are called trust made articles. If you are going to take off the turnt on trust made articles you are going to throw out of employment the millions of mon engaged as wage-carners in those great businesses, and you are going to throw out of employment the millions of mon engaged as wage-carners in those great businesses, and you are going to the trust, indeed more so, than the trusts themselves.

A bridge to cost approximately \$1,500,000 to be built across the WIIlamette River just north of the Stee bridge, is the recommendation of Ralph Modjeski, the New York civil engineer who was employed by the City Council to report on the most feasible means of solving the vexatious problem of handling traffic across the stream. He estimates the cost of a high bridge that would clear all vessels without a draw at \$3,000,000, and a tube, which he also says would have to go as far north as Hancock street, would cost \$6,000,000. The report in full detail will be the subject of a special joint session of the Council and the City Executive Board at 9:30 o'clock this morning.

FATALLY WOUND PEYTON

Prone and Bleeding, He Rests on Arm and Sends Death Messengers After Murderers-Comrade Shot in Arm.

MISSOULA, Mont., Oct. 19 .- Lying prone on his side, riddled with builets; C. B. Peyton, a Deputy Game Warden, fought a single-handed battle with four Flathead Indians whom he had started to place undersarrest Sunday afternoon, and while the blood streamed from the gapcoully leveled his rifle and fired until all of his assallants were dead.

The fight in which all of the partici-pants were killed took place at Holland's Prairie, on Swan River, near Ovando, Powell County. The Indians were hunting without license and had taken more deer than the law allows. Peyton and Herman Rudolph, another Deputy War den, learned of their offense and left Missoula for the Indian camp. Knowing the troublesome nature of the

Flatheads, Peyton asked Rudolph to mpany him. Both went to Swan Lake and Sunday located the camp about three miles from Ovando.

Peyton Shot Down. Peyton went to the camp, however, alone. Rudolph remained some little dis-tance away. Peyton found four bucks at the tepee and a number of squaws. He told the Indians they were under arrest and would have to acompany him to Mis-

south. Peyton's words were scarcely out of his mouth when the Indians grabbed their rifles. The Game Warden fell at the first shot. Four bullets struck him in the breast and the blood soaked the ground

where he lay. Believing their victim dead, the Indians started on a run for the neighboring woods. Peyton, however, was only stunned for the moment. His rifle was brought instantly into play as soon as he

ecovered himself Dragging himself together, the fatally wounded officer drew his rifle to his shoulder, and while every move was the keenest torture and sent the blood gush-
