# GREEN FEED ALL WINTER DON'T NEED SILOS COWS ON BUTTER-FAT PAYMENTS.

Dairying pays such wonderful profits in the famous Los Molinos irrigated district, Sacramento Valley, because there is green feed all Winter. Alfalfa can be pastured nine months a year and a small patch of kale will provide green feed when it is too wet to pasture alfalfa. One acre of kale will provide green feed for 10 cows during the short period when alfalfa cannot be pastured. It has been shown by local dairymen that when fed kale or run on Winter alfalfa pasture a cow eats only 10 to 15 pounds of alfalfa may a day. That is, an acre of alfalfa will produce enough hay to Winter three or four cows.

Best season to make a start on the

or four cows.

Best season to make a start on the land in many years. Ground full of moisture and young alfalfa need not be irrigated until late Summer—just the right conditions. You can seed until July.

All the cows you want on butter-fat payments. Not a cent of cash down. Buy your cows where you will; we supply the money. One herd of 11 cows is paying \$150 a month besides the value of the skine milk.

AM looking for a man who wants a position, not a job. There is a big difference. I want a man who is not content to receive each pay day but littue more than enough to meet actual expenses.
