Undercurrent of Heaviness in Wall Street Market.

EARLY GAINS WIPED OUT

Weakness Due to Technical Rather Than Actual Conditions-Coppers Are Strongest Feature. Bonds Are Irregular.

NEW YORK, Nov. 13.—An undercurrent of heaviness and uncertainty pervaded to-day's market, even though many stocks were strong at times, and several new records were established. Trading was broad but fitful, with intervals of duliness during the intermediate and later stages. Price movements were frequently so confusing as to indicate buying and selling of a conflicting character. Sentiment among the professional element seemed to favor lower prices, except in coppers, which again furnished the list with most of its stability. The motors, equipments and industrials of varied description were lower by 1 to 3 peints, and Central Leather made a further extreme gain of 8% points from its recent meteoric rise. Shipping shares, Atlantic, Guif & West Indies excepted, were lower with investment rails, and United States Steel lost 2 points on the usual heavy offerings.
