ONE YEAR'S MINING | Bull Run, by R. Lyst and R. C. Hamilton, Bur Lemon, by Raiph Ellies, W. W. Rice and R. O. Ingraham. Two miles cost of Reactivities.

Over1500 Locations Recorded in Grant County.

GOLD FOUND IN ALL THE CLAIMS

Copper and Lead Show in the Rock in Several Localities-Strawberry Butte Properties.

CANYON CITY, Or., June 19.-Between June 1, 1899, and May 31, 1909, County Clerk McHaley recorded 1529 mining locations. Of these, 1645 were quartz claims, 52 placers, \$5 mill sites, and 7 tunnel sites. This is the record of one year in a county which is only beginning to make itself known in the mining world.

Mining has been carried on in Grant for 40 years, but it has been principally pincer work, and it is only stely that the quartz ledges received no-Ike Guker's discovery of a rich pocket in the Great Northern, near Canettention towards quartz, and prospecors have flocked to every section of one sees the inevitable timbered unnel and the little pie of ore on the Excepting the Red Boy, the Cougar and a few other properties, there and the principal work is that required law of claimowners-assessment. Gold is found in every claim, and apparently in quantities to satisfy the miners and

Gold is the great metal sought, but next in order copper and lead. If copper and lead are found in large quantitles, the future of Grant County is us-Both meta's show in the rock in many claims, and Strawberry Butte. near Prairie City, is believed to be full of gold, copper and silver, for its chiire length of 40 miles. Some assays are to run \$400, in gold and copper, to the ton. So rich a return on the rock seems too good to be leve, and the figres tend to make one skeptical. Still, this is a great mining country, and there is no estimating the amount of wealth hidden in the mountains.

Following is a list of all the mining ations that have been made in Grant County for the year ended May 31. In quartz claims, the nature of the mineral covered is given, when set out in the location notice. The list shows the parts the county in which the different minerals gold, sliver, lead, copper and fron -have been found. Wherever possible, the claim has been identified with some stream or well-known mountain, mine, or town. Where the claim is simply described by metes and bounds, without
