as some lawyers say it will be. Council-man Belding declares that he will cause another measure to be drafted which will another measure to be diracted which who be more carefully worded. He doubts very much that the new law will be found irregular, but says that if it is, he is de-termined to carry through a new law in which the defects will be remedied. Just before the Belding measure was passed it was amended to exempt labor muloas from the provisions. From the

unions from its provisions. From the first there were some who contended that this would be class legislation, and that the courts would hold the law void. City Attorney Kavanaugh expressed the opin-ion that the amendment would not affect the legality of the measure, but yesterday said that on further consideration he was not certain as to this point and requested Mayor Lane to delay action until he should investigate further. Before the meeting of the Council, the

City Attorney prepared an amendment to the effect that the measure should no apply to combinations made for the pur pose of regulating wages. The wording of this was afterwards changed to ex-empt laber unions suarright from the workings of the law. This he believes may be class legislation, in that unions might join together for the controlling of the price of commodities as well as of labor.
