DECREASE CASH RESERVE

But New York Banks Have Largest

Deposits Ever Known.

NEW YORK, May 23.-The Financier

NEW YORK, May 23.—The Financier will say:

The statement of the Associated Banks of New York City for the week ending May 23 showed a decrease, taking the report of actual conditions as a basis of comparison, of 87,729,600 in cash reserve. This was not surprising in view of the fact that the banks during the week lost \$3,000,000 to the Treasury on account of repayment of public deposits, and something like \$12,000,000 owing to the continued exports of gold. The actual reduction in cash reported by the banks for the week was \$4,800,300, which goes to show that the other losses already mentioned were made up largely through excess of receipts from the Interior and from other sources.

The loans of the banks for the week increased \$11,203,500, due largely to the continued revival of speculative activity on the Stock Exchange and the commitments in commercial lines. Deposits rose \$13,503,600, which increase did not coincide with the other changes noted.

A rather surprising, although not important feature of the statement was the increase of \$180,000 in circulation. This at a time when banks apparently are making every effort to decrease the amount of their circulating notes outstanding. The total deposits of the clearing-house banks now amount to \$1,702,000,000, which is by far the largest figure over reported.

#### HOUSE KILLS DRY FARM BILL

Regards Smoot Amendment as a 3 Scheme Favoring Stockmen.

OREGONIAN NEWS BUREAU, Washington, May 23. The dry-farm homeresponsibility for its defeat rests on

the shoulders of Senator Smoot, of titah. Smoot tacked onto the bill an amendment waiving the requirement of residence under certain circumstances, and threatened to beat the bill if this amendment was taken off. The House today could not swallow the idea of non-resident homesteadin fact the bill, was freely characterized as a scheme hatched up to permit stockmen to acquire large areas of public domain for range purposes. The idea spread like wildfire, and when the House became imbused with the idea that this bill was not what it purported to be, but was in reality a land steal, cleverly framed up by stockmen, it not only voted down the Smoot amendment, but refused to send the bill back to conference. This makes further action impossible this session. If the bill comes up next Winter it will have to be more carefully safeguarded.

OREGONIAN NEWS BUREAU, Wash OREGONIAN NEWS BUREAU, Warnington, May 23.—It is commonly reported that, if Secretary Taft is nominated and elected President, Elihu Root, now Secretary of State, will be appointed Chief Justice of the Supreme Court during the next administration, assuming, of course, that Chief Justice Fuller shall retire. Had Justice Fuller retired during the past six wors he Fuller shall retire. Had Justice Fuller retired during the past six years, be would have been succeeded by William H. Taft, for it was the height of Mr. Taft's ambition to become Chief Justice. But when the possibility of succeeding Roosevelt had developed. Mr. Taft went into the campaign with his whole heart and soul, putting aside his previous ambition.

#### Root Would Like the Job.

Now that Mr. Taft himself is likely to have the privilege of filling the position he so long sought, it is natural that he should look favorably upon Mr. Root. Mr. Taft has not said he would appoint Mr. Root and Mr. Root has never announced his candidacy for the place, but Mr. Root is very fond of Washington, so much so that his wife has said he would be willing to live here as a policeman if he could not hold a higher office. The office of Chief Justice would permit him to remain here indefinitely, for it is a life appointment. Now that Mr. Taft himself is likely

Mr. Root stands at the very head of Mr. Root stands at the very head of the legal profession, so there is no question as to his eligibility; he is a greater lawyer than most men who go on the Supreme Bench. They could wash out colors anywhere near their camp and have samples of coarse gold which they brought back to show that they are good prospectors. It is possible that he may go back there and engage in the development of its mineral resources. Residents of that country have mined the placer deposits there for years in a primitive way, but Mr. Shorey believes that with the application of modern methods the gravel can be worked at a good profit.
