THE ABOVE ILLUSTRATION SHOWS A SU-PERIOR STEEL RANGE FITTED WITH A

SUPERIOR GAS ATTACHMENT

A combination of this kind will appeal to those that are possessed of but limited space in their kitchen, and where it is necessary that the stove or range be as compact as possible and yet not sacrifice any of its good cooking qualities. The gas attachment is only 16 inches wide and has one giant and two regular-size burners, that can be readily removed for cleaning. It takes but a moment to adjust the valves for either a high or low gas pressure. An oven 12x18 inches bakes bread or cake to perfection. It also has a broiling or toasting oven directly underneath the baking oven. Everything about the attachment is finely finished, and with a few exceptions it can be attached to any steel range.
