

REBOLT SPREADS OVER WIDE AREA

Aggression of Mexican Rebels Extends to More Territory in South.

THEY PLAY GAME OF TAG

Defeated by Federals, They Flee to Appear Again—Prisoners Freed to Join Revolt—Spaniards Are Angry at Many Murders.

MEXICO CITY, April 29.—While it has been thought the signing of the armistice in Juarez might have the effect of lessening the activities of the rebels in other parts of the republic, a summary of the week's campaign shows an increasing aggression and a wider area of disturbance.

It is reported that the number of rebels operating in one section of Puebla is not less than 5000 and from a different part of the state comes the news of a band of 600 that demanded the surrender of Tehuacan, the resort where Vice-President Corral spent so many weeks. The larger force of 5000 is near Acatlan and Matamoros in Izucar.

Rebels Run to Flight Again.

The tactics in the southern interior region are fairly typical of the campaign throughout the affected parts of the republic. The rebels appear in a town, the federals are sent to dislodge them and a federal victory is reported. The report of their retreat is true, but the invariable tactics followed by the rebels are to flee before they are forced to surrender, so that the sum total of the rebels is not materially reduced and the defeated men reappear in a few days in some other place.

Slowly the rebel forces in Guerrero are gathering in numbers and in Coyuca de Catalan, Guerrero, the jefe politico himself opened the doors of the prison and, arming the 185 prisoners, led them forth to fight in the cause of the revolution.

General Valle, in charge of the federal troops in Puebla, today advised the Department of War that Temeicho was occupied by rebels.

Spaniards Are Indignant.

Keenly aroused by the assassination of six of their countrymen on the hacienda of Atencingo by rebels, Spaniards of the capital and of other towns in the republic are joining in making further protest to the government.

Today the Spanish minister, acting on representations made to him by citizens of his country in Mexico, again called the attention of the Mexican government to the raiding of the hacienda of Illescas in San Luis Potosi. A party of 50 men is reported to have sacked the company store, destroyed the books and attacked with machetes the employees.

Members of the Spanish colony in this city today held a special meeting to discuss the assassination of the six Spaniards. They decided to raise funds for the families of those men and for other Spaniards killed during the revolution.

ONE KEEN AT KIRMESS.

In the matter of gathering in money for the Open-Air Sanitarium and the People's Institute, the second night of the Kirmess was a pronounced success, and while no definite figures can be given out as yet relative to the amounts secured from the seat sale, refreshments, flowers, etc., still it is known that the sum added to the big charity fund by the returns of these various enterprises is as large, if not larger, than last evening.

DEATH ALMOST WINS RACE

Daly's Daughter Reaches New York, but Recovery Is Doubtful.

NEW YORK, April 29.—Mrs. Carroll Brown, of Baltimore, the eldest daughter of Marcus Daly, ended here today her flight from the thin air of the Montana mountains with death almost the victor.

The tang of the sea air and the heavier atmosphere brought no revival of her waning strength and physicians at her bedside gave little hope for her recovery.

Her private car, in which she was rushed to sea-level, reached the Grand Central Station at 6 o'clock and a few minutes later Mrs. Brown was on her way to the Fifth-avenue home of her mother, Mrs. Daly. Physicians were awaiting her and tonight they held a consultation.

"We do not exactly know what is the nature of Mrs. Brown's ailment," was the statement given on the arrival of Mrs. Daly home afterwards. "Her heart is affected and her condition is very grave."

OREGONIAN CORNERS HOPS

Portland Man Quietly Buys All Sacramento Valley Crop.

SACRAMENTO, Cal., April 29.—Forty thousand bales of hops, representing practically the entire 1916 crop of the Sacramento Valley with the "olds" of 1915, that and 1916, are quietly gathered up by a Portland speculator and shipped via San Francisco to supply the English market.

Shortage of the India crop caused a heavy demand from across the water, and a good price was obtained for the entire output. The gain netted the hopgrowers of the Valley more than \$10,000.

MRS. HENRY'S PLEA DENIED

California Supreme Court Decides Children Stay in Detention Home.

SAN FRANCISCO, April 29.—The Supreme Court of California refused a plea of Mrs. Iva May Henry, of Seattle, yesterday for permission to remove her two children from the San Francisco Detention Home, where they were sent by the Superior Court.

The hearing on the writ of habeas corpus by which Mrs. Henry seeks the custody of the children, was postponed one week.

NEW BOATS ARE GIVEN UP

Yale or Harvard Coming to Portland, However.

LOS ANGELES, Cal., April 29.—(Special.)—Whether or not the Pacific Navigation Company decides to extend the service of the steamers Yale and Harvard to Portland, it is not the present intention of the company to add any more steamers to its fleet, according to the statement of Captain J. H. Bennett, of the firm of Bennett & Goodall, operating agents for the company. Captain Bennett a few days ago let it be understood that three new steamers would be added to the service. Today,

however, he seemed pessimistic about the prospects. Captain Bennett returned from San Diego today on the steamer Harvard. He says the management is now satisfied with the amount of business given the steamers by Los Angeles wholesalers and will probably extend the service to Portland, where it is believed more business can be developed. If this is done, the service between Los Angeles and San Francisco will be reduced to two trips a week and this will be no longer the home port of the company.

When the Yale and Harvard were brought to this Coast, Captain Bennett says that because of the zealous spirit of Los Angeles toward the harbor, the city had just acquired, the company decided to make Los Angeles the home port, paying off crews here and buying all the supplies possible in the Los Angeles market.

As this means thousands of dollars spent here every month it was expected that the Los Angeles merchants would appreciate the superior service and divert much of their freight to the steamers. Instead, Captain Bennett declares the jobbers are still shipping a large part of their freight from San Francisco by rail, although the steamers are giving an express service four times a week.

SAVAGE DRAW FOUGHT

GAME JOHNNY MCCARTHY GETS EVEN BREAK WITH SMITH.

Fight Begins With Odds on Philadelphia, but McCarthy Does Some Vicious Work.

SAN FRANCISCO, April 29.—Sammy Smith, of Philadelphia, and Johnny McCarthy, of San Francisco, fought a 20-round draw here last night.

Smith was a two-to-one favorite in the betting and it was by a mere exhibition of gameness that the San Francisco fighter secured an even break. Both men were staggering at the close.

Smith led easily during the opening rounds, McCarthy being kept constantly on the defensive and receiving severe punishment. It was not until the tenth, when the local fighter changed his tactics, that it appeared he would be able to stay the 20 rounds.

In this round he began a vicious attack in the infighting, hooking Smith with short jabs to the face and body. In the following three rounds McCarthy carried the fight to Smith and several times the Easterner was sent staggering against the ropes.

Until the 16th McCarthy had decidedly the better of the mill, when Smith rallied, and in the closing sessions both men appeared to have a chance to win. Smith whipped his right repeatedly to McCarthy's head, but the Westerner took the blows doggedly and evaded the acute by stiff body blows in the close-range fighting. The 18th and 19th were Smith's rounds, McCarthy frequently planting his overworked face in the way of Smith's stinging right.

When the men left their corners in the 20th they were covered with blood and walked into the encounter unsteadily, but after exchange of the first few blows both gathered speed and the fighting was desperate at the close.

DANCE VOTING HEAVY

CONTEST FOR MOST POPULAR ONE KEEN AT KIRMESS.

Seasons Springs Ahead of Gaiety Girls and Chappies in Balloting Last Night.

In the matter of gathering in money for the Open-Air Sanitarium and the People's Institute, the second night of the Kirmess was a pronounced success, and while no definite figures can be given out as yet relative to the amounts secured from the seat sale, refreshments, flowers, etc., still it is known that the sum added to the big charity fund by the returns of these various enterprises is as large, if not larger, than last evening.

The voting contest last night opened enthusiastically, and the men at the blackboards were kept busy recording the lump votes shouted through megaphones by men stationed in the aisles. The "boosters" for the various dances will certainly have matters brought to a fine frenzy before tomorrow, the final evening, when excitement will run high, and a vote will pile in thick and fast. The result of the voting for the first evening was as follows:

Gondoliers 1910
Pines and Pines 500
Seasons 480
Tyrolers 480
Gaiety Girls and Chappies 410
Sextet 65
Milo 1210
Hungarian 210
The "Sextet" which was particularly popular in the Thursday evening's voting, jumped into first place last evening, on two occasions 1900 votes being handed in, as compared with 1310 on Thursday.

"London Gaiety Girls and Chappies" fell from first place on Thursday's board to second, with only 232 additional votes registered for their last evening.

The Gondoliers leaped surprisingly high in the voting, from a total of 1910 on Thursday to 5000 on the new record. Boosters for the various dances vie with each other in keeping their favorites in the lead and the voting was carried on with dash and animation.

Frank Branch Riley was master of ceremonies in the voting contest and carried on a galling-sun fire of repartee and cheerful badinage with the voters. One of the remarkable incidents in the voting was that the Polo dance, which on Thursday evening registered 2600, came up to its present total of 4105 in four jumps of big votes.

The result of last night's voting is as follows:
Seasons 480
Tyrolers 480
Gaiety Girls and Chappies 410
Sextet 65
Milo 1210
Hungarian 210
Pines and Pines 500
Gondoliers 1910
Pierrot and Pierrette 500

The result of last night's voting is as follows:
Seasons 480
Tyrolers 480
Gaiety Girls and Chappies 410
Sextet 65
Milo 1210
Hungarian 210
Pines and Pines 500
Gondoliers 1910
Pierrot and Pierrette 500

Harry Lander and His Work.
London Evening Times.
"No man," Harry Lander said, as he handed me his pouch for a fill, "I am not thinking of retiring. I love my work. I love the stage. Wouldn't anybody love it, when you see all those glad faces before you?"

"My heart bubbles over with joy when I glance over my audience. It prompts me to do one's very best. I am always in earnest, always sincere, when I am on the stage. This is, perhaps, the secret of my success. I certainly like my sentimental songs better than the comic ones. Yet I believe that one can gladden the people's heart even in a pathetic song."

"How I manage to preserve my voice so well? A quiet and sober life—that's all!"

Of the 25 women recently elected town councilors in Sweden, 17 are school teachers.

MANY WATCH ECLIPSE

ONE-TENTH OF SUN'S SURFACE IS OBSCURED.

Sky Is Clear at San Francisco and Citizens Look Through Smoked Glasses at Orb.

SAN FRANCISCO, April 29.—The eclipse of the sun this afternoon, total over a part of the South Pacific Ocean, but only partial here, was viewed through smoked glasses by thousands of persons in this city. The sky was clear.

Beginning at 3:03 P. M. the phenomenon was visible until 4:35 P. M. about one-tenth of the sun's face being shadowed at the time of greatest obscuration.

At the Chabot Observatory, in Oakland, and the observatory of the University of California, every phase of the eclipse was noted.

The times of contact obtained at Chabot Observatory are uncertain by one or two seconds, on account of the disturbed condition of the atmosphere. Professor Charles Burkhalter, of the observatory, declared tonight that this fact will considerably lessen the importance of the observations.

"The only real value to astronomers of a partial eclipse of the sun," he said, "is the exact time that the limb or edge of the moon disc touches that of the sun, at the beginning of the eclipse, and, again, at the end, when the disc of the moon leaves the sun."

Owing to the cloudy weather prevailing on Mount Hamilton today no observations could be taken of the eclipse at the Lick Observatory.

VASSAR HOLDS PAGEANT

Girls Sing, March, Dance on 50th Anniversary of College.

POUGHKEEPSIE, N. Y., April 29.—The 50th anniversary of the founding of Vassar College was celebrated yesterday. The thousand college girls assembled on the steps of Rockefeller Hall in the morning and sang the college songs of 50 years ago. Then President Taylor made an address.

The principal event was a grand pageant on "Sunset Hill." It represented "women of culture in five ages." Scenes enacted at the founding of the college were produced. The participants, headed by Sappho and her Greek maidens, marched from the campus to

the hill, where fancy dances in costume were given. Tonight addresses were made by Alumnae and President Taylor.

SENATE EXPELS CRITIC

Ford, Conductors' Secretary, Accused of Slandering Member.

SPRINGFIELD, Ill., April 29.—J. L. Ford, of Clinton, secretary of the Order of Railway Conductors, was removed from the Senate chamber by the Sergeant-at-Arms by order of Lieutenant-Governor John G. Olesby today.

Ford's ejection followed a charge by Senator Walter J. Manny, of Mount Sterling, that Ford had sent a large number of untrue letters into Manny's district stating that Manny was opposing employers' liability legislation.

Other spectators to the number of 100 also were excluded.

A Procession at Bayreuth.

When the world musical flocks to Bayreuth, the long avenue leading to the Festspielhaus is, at 6 o'clock in the afternoon, a study of nationalities. The interminable procession, winding between lines of green trees up the long hillside toward the theater which Wagner built to hold performances of his gigantic dramas, makes a picture to be

found nowhere else in all the world. The medley of faces, of color in costume, of unique, often freakish personalities, grows stronger by reason of the time-worn town from which it issues, silhouetted against green, flowering fields, like those in the Good Friday scene in "Parsifal." A procession of today, emerging from a setting of the semi-medieval, a feverish, curiously silent throng, each one intent upon the music drama to be presently unfolded; there with grim determination to find the "atmosphere" which has given Bayreuth a quasi-religious aspect to the art world.

New Weapon to Kill Alligators.

New York Tribune.
A party of women returned from Florida the other day with an account of killing an alligator with an automobile, after an exciting chase through a palm tree grove. The alligator fell prey to Mrs. John J. O'Fallon, Mrs. Asa A. Wallace and Mrs. M. B. Murrell. As the women swung around a curve in their car they saw a giant alligator sunning himself in the road, not 50 feet ahead.

The chauffeur put on full speed and before the animal could get out of the way two wheels of the machine had passed over its neck. It lay in the road apparently stunned, but when the chauffeur approached it ran into the woods. After being pursued more than a mile the alligator rolled over on his back and was lashed to the automobile and towed back to Tampa.

But In Many Cases

When you see a person with unusually beautiful teeth, ask—are your teeth Alveolar? The answer will be yes. In most cases we can replace missing teeth with Alveolar teeth that will be both beautiful and serviceable. There are cases where we must sacrifice either beauty or quality. In such cases we sacrifice beauty. But in all cases of missing teeth an investment in Alveolar Dentistry closes the avenue to future regret.

Do not flout the ability that is beyond us, nor take things at the men who can do things which we cannot do. Every thoughtful man appreciates the tact and indorsement of the superiority of the original and genuine as shown by the efforts to introduce imitations, not on the ground of superiority, but simply as being "just as good."

Ecce Signum

(Behold the Sign! Here is the Proof.)
The wavering line of demarcation between right and wrong often depends on the construction of a comma, in the code of criminal procedure. In dentistry it always depends upon the construction of good work, accuracy, finish and quality. It must be right or it is a failure. To be right it must be comfortable, serviceable, durable.

The Alveolar Method differs from all other methods of restoring missing teeth. The only thing that approaches it is so far inferior to the new plan that it is not fair to name them in the same breath. The bridge work principle is wrong. It puts too great a strain upon the teeth which support the bridge, and it is only a question of time when the work must be removed. The only other resort is a partial plate, and this is nothing more nor less than a nuisance, and is not to be considered in all in connection with the Alveolar Method.

In each of our offices (we are established in all the principal large cities of the West and Northwest) is an examining dentist, a man well qualified to diagnose diseases of the teeth and gums, and if you are suffering from teeth trouble of any kind or have lost some teeth and have two or more left in either gum, then the services of this expert are at your command. You will be told exactly what we can do for you, and the probable cost. The work is not any more expensive than any first-class dentist would ask for first-class work.

How Millions End Their Corns

Nobody who knows about Blue-jay has any trouble from corns. Five million people every year—25 every minute—are now being removed by this plaster. Please try it on yours. A Blue-jay plaster is applied in a jiffy, and the pain of the corn ends at once. The plaster is so comfortable that the corn is forgotten. Within 48 hours the bit of B & B wax so loosens the corn that you lift it out. More people use Blue-jay—by 50 times over—than anything else for corns.

See the Picture
A is the harmless red B & B wax which looses the corn.
B is soft felt to protect the corn and keep the wax from spreading.
C is the comfortable narrow band which goes around the toe.
D is rubber adhesive. It fastens the plaster on.
Blue-jay Corn Plasters
At All Druggists 15c and 25c per Package
Sample Mailed Free. Also Blue-jay Bunion Plasters.
Bauer & Black, Chicago & New York, Makers of Surgical Dressings, etc.

The important facts about Hart Schaffner & Marx clothes are that you're sure when you buy them that you get the latest and most correct styles, finished tailoring, correct fit and all-wool fabrics.

They'll cost you only as much as such clothes ought to cost; the prices are economical considering the clothes.

Suits and overcoats twenty to forty dollars

New ideas in suits: "Shape-Maker," "Varsity." New colors, new patterns, new weaves.

Cluett Shirts. Stetson Hats. Wunderhose.

Sam'l Rosenblatt & Co. Third and Morrison

ALL BEAUTIFUL TEETH ARE NOT ALVEOLAR

Which Does Away Entirely With Plates and Bridges

Timeo Danaos et dona ferentes
(I fear the Greeks even when they bring gifts.)

As the quality of our work becomes known patients who need dentistry flock to our radiance (offices) like flies to a lighthouse. We caution you to beware of bargains in dentistry. If a grocer sells you sugar 50 per cent below market, look out for sand, short weight, a catch-penny scheme or some other latent chicanery. There is an ulterior motive. When a dentist offers you work at half price, you'll do well, if no other way out of it, to give him the other half in your pocket. You'll be driving a better bargain at that than to accept the class of work you are sure to get. In dentistry we promise you the real article (unnadulterated) and full weight.

Alveolar Teeth—Where Bridgework Is Impossible.
If only your front teeth are left, say three or four or more, we can replace all those that have been lost on both sides, clear back, with perfect Alveolar teeth, whilst bridgework would be impossible, even if you had eight or ten front teeth to tie to. If you have only two back teeth on each side, say molars, we can supply all the front teeth that are missing with beautiful, serviceable, lifelike Alveolar teeth. This could not possibly be done by the bridge route. And where bridgework is possible, the comparison between the two. A very large percentage of our work is taking out bridgework put in by other dentists and replacing it with the beautiful and artistic Alveolar teeth. And, unlike bridgework in another respect, it is practically painless. No boring or cutting into the gums, nothing to be dreaded. Now, then, prices being equal, which would you choose?

Curing Protrusion (loose teeth), a disease given up by other dentists as incurable, is another of our specialties. We cure it absolutely. It's a boastful statement to make, but we can do anything that is possible in dentistry, and what we do is always of the very highest class. Our booklets, Alveolar Dentistry, are free. Write for one if you cannot call. We have samples of our work to show you all times and the very best of references, an army of them, in this city and state.

ALVEOLAR DENTAL CO., DENTISTS, Portland, Oregon, Bldg. 106 1/2 3d St. Seattle, Highest Bldg. 2d and Pine. Terms to Reliable People.
