To Have Perfect Skin Throughout the Winter

These days the face and hands need special care and attention. Strong winds, quick changes of temperature from indoors to outdoors, are severe on the skin. Their despoiling effects are best overcome by the application of pure mercolized wax. This keeps skin and pores in a cleanly condition, the complexion beautifully white and spotless. Chapped reddened, biotchy and roughened cuticle are actually absorbed by it. One ounce of mercolized wax, obtainable at any drugstore. Is sufficient to completely renovate a weather-beaten complexion. It is used like cold cream allowed to remain an over night, and washed off in the morning. As the skin tends to expand in a warm over night, and washed off in the morning. As the skin tends to expand in a warm atmosphere, cheeks and chin to sag and wrinkies to form, a good astringent lotton should be used by the woman who keeps pretty much indoors these days. Dissolve one ownee powdered saxolite in one-half plint with harse. Haths the face in this mornings or before going out for theater or social affair. It is a remarkable skin tightener and wrinkie craser.—Adv.
