Some Militia Suggestions.

EDITOR DEMOCRAT:

We are soon to have a company of the 3rd Regiment Oregon National Guard organized at this place. These Companies are maintained at the states expense for use of the state in time of danger, and every citizen who is interested in the welfare of the state, should be inonday, the date of the new time terested in the efficiency of her militia.

This company will likely be sworn in o'clock the new local will leave here in a very few days, and it would be a arriving at Portland at 10:10. well for those who wish to see a good company here, to do what they can to bring this result about. The material for it certainly exists here, and if judiciously selected, we should have a company here, that would be an honor to the state, and the pride of control of the state. state, and the pride of our town. There are among us a number of the ex-volunrn and Oregon City making the Portland in three hours.

Southbound leaves Portland at ion militia officers, and it would be not the arreveau overland will leave a for Portland at 3:05 instead of have our new militia company officered by them. With the military training, and ability to command, which they have acquired, by their experience in camp and field under our best army officers: they would soon have our new ficers; they wou'd soon have our new company in fine shape. And aside from the practical value of the thing, in selecting ex-volunteers to officer our new company, there is a matter of sentiment in thes showing our appreciation of their services. Anyhow if the state has military honors to bestow on any of her citizens, it would look more becoming, to bestow it on those who upheld her flag and ber honor in time of war, than on those who chose to stay at home. Let us not be so fickle, as in two short years to lorget who responded to the call arms. We think the company would be given better military training, and become more efficient under the directions some of our Spanish-war veterans and we think the boys forming the new company, would take more pride in being under ex-volunteers. It would be a far nobler example to point out to coming generations, how we gave military honors to those who won them not to those who shirked the hardships and dangers of war, and stayed at home to enjoy the b'essing and prosperity of peace.
