The smallpox scare of the whole uppe ountry is of considerable magnatude and eems to be increasing. Reports from the various publications of those parts are con flicting and contradictory and the extent of the epidemic may be considerably overestimated; but we cannot be too careful a it is claimed that cases already exist at Portland and Salem. Prevention is better than cure and vaccination should be resorted to at once by all who have not already undergone the operation.

VEGETATORS.-A month or two ago we mentioned having received several fine specimens of vegetables of prodigious growth but we did not tell it all for fear we might be charged with fabricating, being young and inexperienced in the editorial line, and our conscience not yet grown callous from the bare necessity of the case, and besides: the cherry tree motto was painfully prominent in our mind at the time. Suddenly the big potato mania seemed to becom epidemic and for weeks our exchanges teemed with yarns of the extraordinary samples grown in their neighborhoods, as if to tantalize us with the childish insignificance of our item, and vying with each other. Then for the sake of variation cabbage heads, beets, carrots, squashes and onions were extravigantly enlarged upon. Finally the turnip question was raised, and for the last three weeks they have been assuming such proportions that we are really glad they dont grow round here, for we should hate to be beaten and we know it would hurt our concience to tell even facts of such a magnatude.

Nor David Davis .-- Our friends at Eugene probably noticed a fine looking. good natured gentleman on their streets this week. His face is embellished with a little bunch of auburn colored hair on each side, and a massive gold watch chain dangles cross his bay window. It was not Senator David Davis, we are pleased to note, but was the Junior and fighting editor of this Journal. He was there on legal business, and not to endow a chair in University, as some might suspect.
