to their race and sertice which fully equaled to their weel in all parts of the State. The the atrocities of the inquisition of other Cotswold and Leicester cross has also been countries. Here, at one time, some thirty or introduced to a small extent, with a view to forty of them were burned alive, the fire last-

per pound.

The woolen manufactory in this city, we are hoppy to learn, is in successful operation. Its requirements during the past season have been about 200,000 pounds, and its opera-tions are confined exclusively to the production of coarse, heavy blankets, adapted to the uses of this State and the regions adjoining.

EXPERIMENTS IN KEEPING SHEEP .- We have been furnished with some data relative to the different kinds of Sheep on common pasture, and their ability to take care of themselves upon such pasturage without any ad-ditional foed. A trial was made with the ditional food. A trial was made with the parter the bloods, half-bloods, and quarter not lay down his life a willing sacrifice to prewith the full-bloods, half-bloods, and quarter the serve the Union of these States?—a Union blood after that of our church, which approach to full-blood the better the condition of the States and that while common Sheep were very poor, quarter and half bloods were in better fish, and the full-bloods of each kind were in still better condition.

At the same limit be were in still better condition. At the same limit be well and around the one idea of Union all its principle.

States — a Union and everything connected with these Stoves, and everything connected with the seventh everything connected with better condition. At the same time the results cipals revolve and gravitate. What is the upon the three different classes of full bloods principles of seess ion but the carrying out of

careful sheepmen, who has many thousands, and these facts were communicated to us as the result of his own experiments, and for his own benefit and of those interested with him, sand when made known to us were not given to us for publication; but as we down them of great moment, we give them as facts, and pray that the hid-one rathershee may never all all those rates. Show the mass facts, and starts and stripes that adorn it, pray, oh, pray that the hid-one rathershee may never all all those rates. Show the mass facts, and ask all who raise Sheep to communicat with sling them, but that the rattlemake of seven upon this subject, if they have any facts of slimilar import.—Cat. Farmer.

cert blessed Mary crushed the serpent caused our fall. [Tunniburus applause.]

CCRE OF CORNS ON HORSES' FEET.-The eure of corns is very easily accomplished by the following plan: Don't cut out the corn.

THE CAUSE AND REMEDY OF PEACH BLIGHT. —A writer in the Cal. Farmer takes the posi-tion that the earled leaf is caused by the sap of the tree becoming chilled in the damp, cold weather occurring generally in April, after the na red. vigorous growth of the tree has commenced. Acting upon this theory, about the first of March, he says, he hauled straw from the reluse of an old straw atack, with which he mulched the trees in a part of his orelard, and then responded: "I don't know whether leaving others of like quality in like situation it will be a girl or a boy." The result shows that the trees which were well protected about the roots were loaded with fruit and present a very thrity and healthy appearance, while the other trees not so well otected about the roots have shed both leaves and fruit and present a diseased ap-

Prowing.- We notice with great pleasure the increased attention given to the prepara-tion of the soil for the reception of seed, and for Orchards and Vineyards. Formerly a mere scratching process upon the surface was
the almost universal custom. Now, we see
the "deep tillers" and "sub soilers" doing
good work. We learn too, with great pleasure, that the practice of plowing many times
is more generally practiced, and the advocates of this system find an increase in their crops of thirty, sixty, and one hundred-fold. Let all try it. The soil cannot be too well tilled.

—Cal. Farmer.

A SCRE REMEDY FOR A FELOX.-This very painful cruption, with all the "remedies re-commended," is seldom arrested until it has run a certain course, after causing great saff r ing for two or three days and nights. The following remedy is vouched for by the Buffalo following remedy is voncised for by the Bullato
Advocate as a certain thing, from its own
knowledge: Take a pint of common soft soap
and stir in air-slacked lime till it is of the
consistency of glaziers' putty. Make a
leather thimble, fill it with this composition,
and insert the finger therein, and a cure is

SHEEF AND WOOL.—The following paragraphs are from an article on the California Sheep and Wool business, published in the Ban Francisco Mercantile Gazette:

The Jews came to this continent for the same purposes as the Puritans did. Ferdinand and Isabella, having issued an ediet which expelled them from Spain, they soon scattered over the different parts of the world, hitherto uninhabited by them.

\*The use of full-blooded or half breed bucks of the best breed, has become almost universal, and a marked and steady improvement is going on from year to year, upon the average. In a few years the coarse, kempy, native California, or Mexican sheep will have world. It was in Brazil the Jews were first world. entirely disappeared. The breed most generally adopted by growers for the improvement of their ordinary stock, is the Merino of the French or Spanish variety, and most of the Interceipts of wool in this market show traces more or less distinct of the Mexican blood. Next to the Merino, the Southdown of their race more or less distinct of the Southdown of their race along the same time, some blood. Next to the Merino, the Southdown of their race had settled down, they were about the same time, some blood.

introduced to a small extent, with a view to the production of a desirable quality of combing wool.

All these breeds appear to thrive well and increase with unexampled rapidity, suffering from early in the morning till late in the day, facts which are at this day still attested by documents on hand in the archieves of Madrid and Lisbon. In Pern and New Granda they fared no better, everywhere their hopes of being permitted to indulge in the peculiar ceremonies connected with the religion of their fathers were blasted; they were persented by an exited.

On the 12th of September, 1654, a ship with a number of Jews on board arrived in New Amsterdam from Holland. Peter Stuyvesant, when hearing of their arrival considered it an awful calamity, and was atterly opposed to giving them the least protection. Again they were exited, ever from the island of Manhattan, and it was not until February. 1655, that they received the privilege of worshipping according to the dictates of their farts varngroome in Mill street. New York. shipping according to the dictates of their also very short in staple, it will seldom command over two thirds of the price of the same wool of spring clip. The spring clip from fa'r flocks, brought in this market from 16 to 20e per pound. The wool from a few of the best breeds, which came to hand in excellent order, brought 20 to 24e per pound. The average price of the spring wool was 17 to 17 by cents, and of the fall clip about 12 by per pound.

The woolen manufactory in this city, we

ARCHBISHOP PURCELL ON SECESSION .-- At the inauguration of the Catholic Institute at Cincinnati, Archbishop Purcell made the following remarks:

Everywhere throughout the world the clouds hang in darkness. It would seem as if the death knell of our glorious Union had already been heard; that it was to be dismembered and torn into fragments; that State wou part from State, and cities from the States to which they belong. Oh! what is the treason of those men who thus sacrifice the noblest hope of man! And who is there that would mpon the three different classes of full bloods were more remarkable still. The French Merinos were only in moderate flesh; the Spanish Merinos still better; and the Southdowns were full and plump, and in fat, eating order. The bands of sheep of which we have spoken are in the hands of one of our most careful sheepmen, who has many thousands, and these facts were communicated to us as the result of his own experiments and for his come, and, extending his hand over the bier.

Exency. So great is the effect of mere the following plan: Don't cut out the corn, nor put spirits of salts on it, beither character, that ind fferent plans pressed with pare the heel down, so that the shoe will not resolute vigor often reach a triumphant suctouch it. It is of no use whatever, because eves; while far superior design, of carried out in a few days the shoe will. in a few days the shee will be hammered down in a common spirit, fail altogether fall very on the corn, making it worse. All this short of the expectation formed of them. In weakens the heel. Take some tow dipped in common life, though determined pashing often tar, place it on the corn, and nail the shoe succeeds, it sometimes fails from distaste it tar. peace it on the corn, and half the shoe every the tow, which lessens the jar on the corr. Put the shoe on with five nails—three on the contiside, and two on the inner side. Perhaps some will say, Oh! five nails won't hold the shoes on my horse's feet three days. I say, it is three weeks take the shoe off, and try it. In three weeks take the shoe off, and try it. In three weeks take the shoe off, and try it. In three weeks take the shoe off, and try it if the corns are not seen to the compared to the Italian canning; if the corns are not seen to the compared to the Italian cannings. ome more tow and tar, and in a few showings have been chiefly gained by a determination bey will disappear without our injuring the to attain them. A still more remarkable inexamine; if the corns are not gone, put on campaigns, the successes of Louis Napoleon some more tow and tar, and in a few shocings they will disappear without our injuring the foot by weakening the heel, as the other plan paring and spirits of salts, assuredly does. Weak heels, not having the shoc put on level, and with eight nails, thereby destroying the expansion of the foot, which keeps the foot may have taken place, the means have been more obvious, and success less entirely owing to a single man. Energy, indeed is not the causes of corns. When you take off the shoc, not having the foot soft, are the causes of corns. When you take off the shoc, in that not a reason for keeping the foot soft, it is a failured to a single man. Energy, indeed is not the causes of corns. When you take off the shoc, in that not a reason for keeping the foot soft. Is that not a reason for keeping the foot soft ? ple magnanimity and child like faith. But - Country Gent. into others, that most conduces to Garibaldi
