Ashland Mills, Aug. 5th, 1869.

Many years ago, the writer of these lines and an invalid physician, while visiting the Island of St. Croix for their health, emerienced and witnessed many surprising ath bonsficial effects of the Rum there produced upon many of the invalids who were (like ourselves) spoking health ; and, upon inquiry and investigation, obtained a full history of its medicinal virtues. He was delighted and surprised, and after his own recovery. which soon occurred, determined, if possible, to procure the cale right to manufacture and sell it in the United States.

The result of his labors was a glodess sussess for himself and suffering humanity, for the colebrated PLANTATION DITIERS was thus made known to the world. PLAN-TATION BITTERS being an article of real merit, founded upon new principles, and relying wholly upon the vegetable world for its medicinal effects, worked a rapid revolution in the history of medicine, and became as a household word all over the civilized world. The cabalistic C. T .- 1980-X was a talleman of health, and the domand for the PLANTATION BITTERS seen far exceeded the abilities of the proprietors to supply. Notwithstanding the large importation of St. Gools Burn, made expressly for the com-

pounding of those Bitters, the quantity was inadequate. It therefore became necessary that arrangements upon an extensive scale abroad should at once be made, and an agent was dispatched to St. Themas for that purpose. He was fortunate in securing and leasing several plantations on some of the largest and most productive estates on the island. Houses, stills and presses were erected as if by u. cie, which uttorly "actonished the natives." The services of experienced man and natives of the island were precured, and very soon the proprietors of the PLANTATION BITTERS were in a position to supply their laboratory with all the perfectly pare St. Ordiz Rum needed in manufacturing the GREAT DYSPEPTIC TOMIC AND INVIGORATOR. The above cut represents the natives crushing the sugar-cane and otherwise proparing it for the stills and presses. As an antidete to Fever and Ague, Intermittent and Malarieus Fevers, Dyspopula, and other kindred diseases, the use of the PLANTATION BIFTERS is unsurpassed in the aistory of the world. Over five million bettles are disposed of annually. They are

adapted to old and young, male and famale. They are agreeable in taste, and always groduce an immediate heneficial result.
