#### STUDY FOR THE GEOLOGIST.

We have seen many collections of curiosities in Oregon-many cabinets; but the last we looked upon is Wintjen & Helm's in the town of Jacksonville. In the cabinet there are many specimens which requires study on the part of the naturalist-many to puzzle the historian-a great deal for the geologist to ponder over. We cannot catalogue the collection. We must content ourself with a passing notice of some of the main articles, and leave the remainder for the seek-after the strange and unaccountable, to gaze up-And every visitor to Jacksonville will declare the collection to the best in the State. In it we found beautiful stallactites from the William's creek cave, the point of interest in the county to the pleasure-seeker; a piece of the skull of the counterfeiter Moore erided real property, to-wit: The E 1-2 or the N E14, and the S W 14 of the N E who was strangely killed, a half inch in thickness; four legged chickens, and doubled-headed turkeys; monte cards in buckskin with coins found in an Indian grave; spear heads of flint, measuring from eight to nine inches in length and differing from all but those in use by the South Sea Islandpered 2 of Sec 10.
