The Power of Memory.

power of memory: Signor Magliabechi, librarian to the Grand Duke of Tuscany, was born at Florence. in the year 1633. Such was the poverty of his parents, that they thought themselves happy in getting him into the service of a man that sold herbs and fruits. Here h took every opportunity, though he could not tell one letter from another, to pore on "of antiquity and clocks and the leaves of some old book that served iris of modern times. Hitherto for waste paper, declaring that he loved it rate /4 their motions, revolutions, vice. Young Magliabechi soon learned of a year or two, the machines gave came his ruling passion, and a prodigious to a sheep's tail and butted to death lons very wide of the truth, and memory his distinguished talent. He read ed to be rectified. This in a great every book that came into his hands, and re, arose from the inaccuracy of the retained not only the sense of what he iniculations, produced from a wrong ba- read, but often all the words, and the very de and such formulæ thrown into wheel- manner of spelling, if singular. To make work. The present clock will entirely trial of his memory, a gentleman lent him belote such eriors, as it is calculated so a manuscript he was going to print. Soun hely that in many of the motions by the time after it was returned, the gentleman will not err one minute in came to him and pretended it was lost -600 years. These calculations, we un. Magliabechi being requested to recollect deretant, have received the unqualified what he remembered of it, wrate the whole, sation of the leading scientific men without missing a word or varying the and autonomers of the day; the sun's spelling. He was consulted by all the place on the collectic; the day of the month learned who proposed to write on any subperpetually, and take leap year into ac- ject. If a priest, for instance, was going t the moon's age, place, and phases; to compose a panegyric on a saint. Magthe apparent diurnal revolution of the habechi would tell him every author, to the chb and flow of the sea at any the number of a hundred sometimes, who decimals of a second, which gives an er- very sedemary life, yet he attained the for of one minute too fast at the end of age of eighty-one. He died. July 14th.
