CURRY COUNTY NEWS.

Items Gleaned From the Port Orford Tribune.

Frank Norberg and J. H. Zumwalt, who have been mining on Cape Blanco beach during the past week, having closed for want of water. They took out a fine lump of gold and 14 1/2 ounces of platinum.

Several indictments have lately been found by the Coos county grand jury against parties accused of running "blind pigs." A little investigation at Port Orford along this line might not be amiss, as there seems to be a leak around town somewhere.

C. A. Phelps, who is operating a blacksand machine of his own invention on the Cape Blanco beach, is making a success out of the enterprise and recently cleaned up 6 ounces of gold and 8 of platinum in a three weeks' run. He advertises a 2-horse-power gasoline engine for sale in another column, as he intends installing a larger one.

Capitalists from Seattle, coming in via West Fern, are now taking hold of the rich copper mines on Collier's creek and the lower Illinois river. The ore will be taken down Rogue river in boats and thence shipped to Seattle while they are developing the extent of the mines, which, if they prove extensive as they promise, will then erect a smelter at the mouth of the Illinois, where coal can be had. Most of the copper ore in Curry is rich in gold and silver.

Though the Hume cannery is idle there are two rival companies buying fish, but the prices are 20 and 25 cents according to the furnishing of nets. This is a petty price for fish that are selling on the Columbia for 5 to 7 cents a pound. Those who own valuable eddies and frontage along the river say: "Just wait till the coast railroad comes!"—And therein lies one of the fishing problems of the near future, when it will be impossible for private or state hatcheries to save the finest salmon in the world from extermination, for greed destroys all things—even liberty and nations.

The productivity and possibilities of Coquille Valley upland soil has been demonstrated by Mr. and Mrs. E. From, who live near the school house. From a few rows of logan berry vines across their one lot last season they sold \$50 worth of berries. The prospect for this season's crop are as good or better than last year. With such an income from a portion of one lot, the possibilities in acres is a mere matter of figures.
