BERGER FLAYS TEDDY.

Milwaukee Congressman Sounds Keynote of Socialist Campaign.

Washington, D. C.—Sounding the socialist keynote for the coming presidential campaign, Congressman Victor Berger of Milwaukee last Thursday in the house vigorously denounced both old parties and in addition took a hard fall out of the "bull moose" faction which is supporting Theodore Roosevelt.

"Capitalists are as willing to deal with the democrats as with the republicans. The latter are conservative, the former reactionary. And one glance at the honest 'progressives' who are setting out to purify politics demonstrates that Robin Hood's famous assemblage of outlaws had nothing on the gang rallying around Roosevelt.

"Wilson's election would perpetuate the bosses' power and would inaugurate another era of prosperity for men like Belmont and Ryan.

"It is unnecessary to explain where Taft stands. It is natural for a man of his type to be allied with Root, Crane, Guggenheim and John Hays Hammond.

"Being behind the times on most questions, the democratic party is especially ignorant on labor questions, as the laws of the southern states prove. We must either have a new constitution or a bloody revolution. Workingmen build a few palaces and many hovels with the capitalists in the palaces. They make a small amount of fine clothes, but millions of yards of shoddy. They wear the shoddy. They must ruin their health by overwork that a few people may enjoy too much leisure."

MAY LOSE PROVINCES.

China is Scene of Anti-Republican Agitation.

Lanchowfu, Kansu Province, China.—If China loses Mongolia, either as a result of the independence movement there or of a Russian grab, it will inevitably also lose Chinese Turkestan, Sinkiang or the New Dominion, as the dependency is variously known. This is the warning sent to President Yuan Shi Kai by the governor of Chinese Turkestan.

For some time an anti-republican agitation has been going on throughout the dependency.

Sinkiang is about eleven times the size of New York state and has 1,200,000 population. Much of it was heretofore regarded as desert, but the Chinese have been homesteading it from the southeast and reclaiming it through irrigation until the new government has come to look toward it as a relief for over-population in China.

FEARS FOREIGN INVASION.

Admiral Reynolds Says Coast Would Be Easy Prey.

Portland, Ore.—"If we had war tomorrow we would lose the Pacific coast and a foreign foe could land a force of 200,000 on our shores in 24 hours. Of course, we would regain the territory thus wrested from us at the first blow, but to do so would cost so many millions of dollars that an annual program of four battleships would seem trivial. A battleship costs money, but it is the cheapest kind of insurance. Let us urge you citizens of Portland to urge your representatives in congress to work for a larger navy. We should start building at least four battleships a year for the next ten years. Do this and there'll be no war.

In the foregoing words, and in tones that showed his earnestness and sincerity, Admiral Alfred Reynolds of the Pacific reserve fleet opened an address to prominent citizens of Portland who attended a luncheon given the admiral in the Imperial hotel recently by the Portland Elks commission.

Great interest was manifested in the speech of the admiral, as it was the first time he has attempted a public address since his arrival.

"The only large fortifications we have on the western coast are on the sound and at San Francisco, and the rest of the shore line is practically unprotected. A hostile army could be landed at almost any point between.

"Once an army is landed it would strike at the railroads, cutting off communication with the Atlantic. What ships we have on the Pacific would offer but small resistance to the fleets of any one of a half dozen nations. We would do our best, of course, but I firmly believe that every last one of us would go to Davy Jones' locker.

"I am not an alarmist, but I cannot impress on the people of this coast too strongly the need of modern sea fighters. You say they are expensive, and you are right; but don't forget that a battleship is the best insurance in the world—and the cheapest."

REVISE GAME LAWS.

State Commissioners Seeking Information and Suggestions.

The state board of fish and game commissioners have undertaken a thorough revision of the present system of game laws. The idea is to present a code for adoption at the next legislature which will give more complete protection to fish and game, and correct numerous errors in the present system of laws.

The commission desires in making up this new game code to get a thorough expression of public opinion before the code is presented to the legislature. For this reason the members of the commission ask that residents in different parts of the state, especially farmers, fruit growers, as well as sportsmen, send in any suggestions, so that the commission may act upon them. Suggestions are also sought from the granges, commercial bodies, rod and gun clubs and other organizations, in order to get a game code suitable for different parts of the state.

All communications and suggestions should be sent to J. F. Hughes, secretary of the fish and game commission, Salem, Ore.

At present there are a number of questions under discussion that will be of interest to sportsmen in different parts of the state, such as the question of bounties on predatory animals. The commission is in favor of a more rigid effort to exterminate cougar and wolves. The question has been agitated in certain parts of the state to reduce the non-resident hunting and fishing license to the same price as the resident license. Many sportsmen are also in favor of reducing the limits on deer and other game.

ENGINEERS ASK \$7 A DAY.

Mallet Locomotives Double Responsibility, Says Chief Stone.

New York.—Engineers who operate heavy traction locomotives of the Mallet type, a combination of two ordinary locomotives, were called as witnesses at the session at Manhattan Beach of the arbitration commission, which is seeking to adjust the wages of engineers. Warren S. Stone, chief of the locomotive engineers, placed the men on the stand to show how the advance in modern railroading had added to the duties and responsibilities of the men at the throttle.

He brought out the fact that many of the railroads had coupled together two heavy freight locomotives to form one monster machine, which could be operated by a single engineer.

He said this engineer, with double responsibility, is paid only a slight advance over what he received on a single locomotive. The men ask that \$7 a day be paid for this work.

ITALY MAKES WAR OFFER.

Willing to End Turkish Struggle With Cash Indemnity.

Paris.—The Italian government recently informed the powers in an unofficial way that it is ready and anxious to bring the Turco-Italian war to an end, according to information from an authoritative source.

The Italian government expresses itself as willing to pay a heavy cash indemnity to the Turkish government for the transfer of its sovereignty rights in Tripoli to Italy and for the Turkish islands in the Aegean Sea occupied by Italy.
