

# TO ADD TO CITY'S LUMBER INDUSTRY

## Weyerhaeuser Company Owns Big Lumber Limits in Oregon and Washington—Is to Build Mill Here at Early Date.

The Weyerhaeuser Timber company, owners of 1,200,000 acres of timber in Washington and Oregon, a large part of which is tributary to Portland, is again looking for a site for a sawmill in or near this city. Charles Weyerhaeuser and Frank T. Johnson, Weyerhaeuser and R. L. McCormick of Tacoma, secretary of the company, were in Portland within the last week, looking over the ground, and Mr. McCormick came again to this city yesterday.

So far as can be learned no deal has yet been closed for a site, but a number of areas under consideration, including about 2,000 feet frontage on the Willamette river at St. Johns, which is held at \$30 per front foot, or about \$1,000 an acre. The Weyerhaeuser company came here a year ago and looked at the St. Johns location, which was then offered at \$20 per front foot. Since that time parts of the frontage have been sold to the St. Johns Woolen mill and the two ship building companies that are now constructing plants there, but there is ample ground remaining. It is said, for sawmill purposes, at the above named price.

The building of a sawmill in the vicinity of Portland by the Weyerhaeuser people is inevitable, and a large, modern plant will be put in, but the date of beginning operations is not announced. The mill will be located on the most advantageous site that can be obtained at reasonable terms.

"Thus far we have been selling our logs to already established mills in the Portland district," said Mr. McCormick yesterday. "But how long this will continue we do not know. The market is very dull at present, and we must either build a mill or shut down logging operations unless we can dispose of our product. I cannot say when we will

build. It will depend entirely on conditions.

The company is in a position of having a large amount of timber that was burned over during the last two seasons and which is being saved at once to save the remaining timber. Being forced to continue logging operations we may be compelled to build the mill sooner than has been contemplated. Mr. McCormick is very chary of words as to the capacity of such a mill, but it is certain that the plant will be of a size sufficient to make it an important factor in the lumber business of the Pacific Northwest. The Weyerhaeuser company is the largest timber holder in the state of Washington. It has a paid up capital of \$11,500,000, and a very low estimate places its standing timber at \$4,000,000,000 feet. About 125,000 acres of its timber is in Oregon, scattered through several counties contiguous to Portland. The remainder is in Washington and distributed in every county west of the Cascades.

Up to the time the company has done little with these timber holdings, beyond operating a small mill at Everett, which saws 150,000 feet. Day, Frederick Weyerhaeuser is now an old man, and is gradually turning his vast interests over to his four sons, one of whom was in Portland last week. The officers of the Weyerhaeuser Timber company are: President, Frederick Weyerhaeuser; vice-president, W. Laird, Winona, Minn.; secretary, R. L. McCormick. Mr. Weyerhaeuser is the nominal treasurer. Other men heavily interested in the enterprise are William Carson, an Iowa millionaire lumberman and president of the Burlington First National bank; P. M. Muser and Lafayette Lamb, prominent lumbermen of Muscatine, Iowa.

## BOAT SUNK; THREE HUNDRED DROWNED

(Continued from Page One.)

will fight to the last and go down only when all his men and himself have been killed.

Stoicism and courage and determination are constantly held up before the people and troops as the ideal attitude for Russian soldiers and his example has undoubtedly had a marvellous effect.

Pictures of him have been printed and sent to Mukden, where they are distributed among the soldiers of Kuroki's army, as a stimulant to bravery.

## GOVERNMENT WANTS FACTS.

Washington, Oct. 11.—The official protest was received at the postoffice department yesterday from Dodwell & Co. of Tacoma, against seizure of mail by a Russian warship, from the steamer Calcha. The protest termed the seizure an outrage against this country and asked what action would be taken by the government.

## POSTMASTER GENERAL WYDNE LATER CONVICTED.

Upon representations by Wydne at the cabinet meeting this morning it was decided that the protest should be taken up by the state department, and the Russian foreign office will be asked for facts concerning the seizure. If private mail was confiscated, steps will be taken for its recovery and prevention of similar occurrences in the future.

## RUSSIAN ATTACK JAPAN.

General engagement said to be in progress near Sea River.

Tokio, Oct. 11.—It is reported that the Russians have crossed the Hun river in heavy force and are aggressively attacking the Japanese, which were moving northward, and a general engagement is said to be in progress.

## SHORTAGE MEN OF DEFENSE.

General Oyama Issues Manifesto to His Troops.

Rome, Oct. 11.—A Liao Yang dispatch to the Italian newspaper Militaire, says: "In consequence of the Russian advance Oyama has shortened his line of defense. The forces at Benalpuide, Yental and Blimiting have been recalled. The Japanese have fortified a front 15 miles long at Liao Yang with forces thrown

## RUSSIAN NAVAL POWER.

Port Arthur Squadron Makes Attempt to Leave but is Driven Back.

Rome, Oct. 11.—The commander of the Italian squadron has received a dispatch reporting that the Russian fleet at Port Arthur made another sortie but was driven back.

The report does not give any particulars but it is surmised that the commander of the Russian ships found the Japanese in much stronger shape than was expected and did not endanger his vessels more than he was compelled to.

## RUSSIAN PERSECUTION.

Two Inmates Reported in Which Russian Buffer Wounded.

St. Petersburg, Oct. 11.—In a skirmish during a sand storm, October 7, to the south of Shabo, 79 Russians were wounded. The Japanese retires.

A portion of a Caucasian brigade was repulsed near Ouchadai Saturday and 15 men wounded.

## HUGE GAPS IN JETTY.

(Continued from Page One.)

boat was unable to get through them. It was impossible to reach the outer end of the jetty without crossing the bar and for a time the attempt at rescue seemed doomed to failure. Finally the tug, which arrived upon the scene, and the life boat was taken in tow. The bar was crossed and the life boat was brought within a short distance of the jetty. One by one the six men jumped from their perilous position into the life saving crew. All of them were saved, the bar being recrossed in safety.

In explanation of the breaking of the jetty it has been said that the piles had been badly eaten by teredos, which had weakened them so greatly that they could not withstand the storm. This theory is rejected by some, who say that the piling had been so well maintained that it had been long enough to have been seriously damaged by teredos, some of it having been in only a year ago.

## BOY DEED IN AGONY.

(Special Dispatch to The Journal.)

Colfax, Wash., Oct. 11.—Glenmie Sudweek, aged 5 years, who was so badly burned by having a lamp tipped over on him yesterday, died last night in agony at St. Ignace hospital.

## LAST WEEK OF THE FREE TEA!

This week winds up the free tea offer. To every person inserting a paid "want ad." in The Sunday Journal will be given absolutely free a half pound package of Closest & Dever's famous

## ROOSEVELT FOURTH TALLEST RULER IN THE WORLD

Mr. Roosevelt is very chary of words as to the capacity of such a mill, but it is certain that the plant will be of a size sufficient to make it an important factor in the lumber business of the Pacific Northwest.

## RAIN MAY DAMAGE BIG PRUNE CROP

Judd Geer of Cove says there may be his loss if precipitation continues — All fruit crops good in many counties this year.

Rains that set in October 3 threaten to cause the loss of 25 cars of prunes that are still on the trees in the Grand Ronde valley.

The prune crop in my district is large," says Judd Geer of Cove, who represents the fifth district on the state horticultural board. "There were two or three carloads a day leaving the valley last week. Unless the rain stops, the prunes not picked prior to October 3 will be a total loss. The apple crop this year is the largest in the history of our district. Picking has not yet begun."

Mr. Geer made a brief report to the board at its annual meeting in Portland yesterday, in which he said:

"Umatilla, Baker, Union and Malheur counties this year produced the largest and best-matured fruit crop ever known there, with the exception of pears, which were a partial failure. The cherry crop was large and profitable, and there was a big increase of acres and cherries planted this year. Many acres of apples are being planted, principally the Rome Beauty, Yellow Newtown, Jonathan and York-Imperial, all good shippers. We raised more prunes in our district. The insect pests were worse this year than ever before. Let the faint-hearted believer in spraying go out of the fruit business, raise wheat and milk cows, and buy his fruit."

Mr. Carson made a biennial report for the third district, embracing the counties of Jackson, Josephine, Cook, Curry, Douglas, Lake and Klamath. He said that not 10 per cent of the land in these counties adapted to growing fruit is now planted. There are bearing apple orchards in Rogue river valley that have for the last three years paid their owners \$100 an acre annual profit. Some other orchards, he says, have paid "only \$150 to \$200 an acre," because of neglect of small details in culture, such as failing to spray and to thin crops at the proper time.

In apples Jackson county produced as much as all the other counties combined, while Douglas county excelled in prunes. In the prunes there was a crop of apples and peaches have been planted in Jackson county, and he estimates that during the coming winter this county will plant 3,000 acres of apples and peaches. There have been 2,000 acres of apples planted in Douglas county and 500 acres in Josephine county. Where pumping plants have been put in and the orchards irrigated the profits have been doubled. The apple crop for these counties in the last two years is estimated at \$640,000.

## RISKS NECK TO SEE LAUNCHING

George Jordan, Kansas for Ralph Stuart, was difficult times in Seattle, but eventually seen Nebraska slides into water at high tide.

Something like 75,000 people witnessed the launching of the battleship Nebraska in Seattle, but that vast host it is doubtful if anybody went to more dangerous extremes to be present than George H. Jordan, manager of Ralph Stuart.

Mr. Jordan had been up the line on business and upon his return to Seattle learned that he had less than one hour to get down to the docks before high tide, the moment set for the launching. He got into a cab and was driven at frantic speed through the town to the waterfront. There he gazed upon the mighty multitudes jamming aboves and fighting for points of vantage and he was on the extreme outside.

The manager's mind was occupied by two thoughts—why Ralph Stuart couldn't play before a crowd of similar size and why he (Jordan) should not be up in front. Inspiration. He rushed the outer guard with a rapid story of his journey all the way from New York to write an account of the great for the Sunday World.

"Nothing doing," unless Mr. Jordan could show a press ticket and obtain passage on a newspaper boat, which, by the way, he threatened to make a few hours earlier. The showman was about to give up in desperation when his eyes fell on a mass of logs, unjoined, extending from a pier to the very level of the sea. He determined to take the risk and leaped down onto the floating timber. Carefully he picked his way over the logs, expecting a plunge into the bilgewater at each moment, but somehow he discovered that in spite of his height, which is over six feet, his only view of the boat was obtained by leaping into the air. At that moment another enthusiast appeared, carrying a barrel. He stood upon the head of it and calmly reviewed the scene. This was too much for Jordan. He leaped into the air, and he saw the Nebraska successfully launched.

Down the ways came the Nebraska. As she was going past, Jordan in his enthusiasm made a dive to get a wig from her. He was carried into the water, and she was decorated. The result was a mixup at that end of the barrel immediately communicating with the ground work. But Jordan got his Christmas tree.

## REFRIGERATOR CAR HEARING OPENED

Morgan and Hill interests opposed public would be greatly benefited by transfer of the private lines to the railroads.

Chicago, Oct. 11.—The interstate commerce commission yesterday began the hearing of arguments and taking of testimony in the investigation of the private refrigerator car company.

J. W. Midgley, representing the Morgan and Hill railroad interests, argued that the interests of the public were best subserved by a transfer of the refrigerator lines to the railroad.

Only three members of the commission were present, but corporation lawyers, representatives of all the interested companies were present. Assistant United States Attorney-General Pagan and United States District Attorney Betha observed the proceedings that promise to reveal sensational things.

Midgley said "capitalists and financial men like W. K. Vanderbilt, who own the railroads of the country, want roads. They want earnings and dividends, and they don't care how they get them."

Traffic Manager Shane of the Erie railroad was before the commission this afternoon and testified that the private lines are paid 12 1/2 per cent commission on all freight obtained by them for shipment over certain roads. This gives the owners of the cars a rebate of 1/4 per cent in many cases, and makes it impossible for small shippers to compete with car owners. He said the Erie road has 100,000 cars, and makes it impossible for small shippers to compete with the big packers, who are large owners of cars.

General Freight Agent Brooks of the Peop's Marquette lines admitted that his road was under contract with Armour, Swift and other big packers to perpetuate the present rates for seven years, the packers agreeing to furnish from 20 to 40 cars a week each.

## POOL ROOM ORDINANCE VETOED BY MAYOR

(Continued from Page One.)

licensing poolrooms less than three months after declaring them illegal.

Either the councilmen must let the back track or accept the mayor's veto or they must pass the ordinance over his veto, which can scarcely fail to be regarded by the public as a confession of an alliance with the gamblers. Prop the mayor has made it plain that the city's interests do not demand the licensing of the poolrooms, the only justification for such a step is the interests of the gamblers.

The mayor's action has caused surprise and dismay among the gamblers, who have been diligently circulating the tip that the ordinance would either be approved or allowed to become a law without the mayor's signature. Prop the mayor has made it plain that the city's interests do not demand the licensing of the poolrooms, the only justification for such a step is the interests of the gamblers.

Dr. Sanford Whiting said that he is unable to state how he will vote until after he has more fully investigated the matter.

Dr. T. Sherrett stated that he cannot say that the council will do since the ordinance has been vetoed. He said he was unable to state how he will vote.

Mr. Matt Foeller says he has not made up his mind which way he will vote, neither does he know what the other councilmen will do when the final vote takes place.

## DAVIS OPENS TOUR.

(Journal Special Service.)

Baltimore, Oct. 11.—Nominee Davis opened his campaign tour last night by addressing a large and approving audience here. Ex-Senator Whaley, David H. Hill and Senators Daniels and Gorman will accompany Davis on his tour through Maryland and West Virginia.

## DEED OF BRAGGARD.

(Special Dispatch to The Journal.)

Cheney, Wash., Oct. 11.—Oscar K. Allen, aged 18 years, a student at the state normal school died of smallpox yesterday. His body will be removed to Wilbur, where his parents live. None of the other students is ill.

## PARKER WILL WIN, DECLARES TAGGART

(Journal Special Service.)

New York, Oct. 11.—Chairman Taggart of the Democratic national committee greeted visitors with a radiant countenance today, asserting that he had received a foreboding of the electoral college in the coming election which pointed conclusively to the election of Parker and Davis. Taggart did not make public the figures nor give information as to the source.

"But," he said, "you may quote me as saying I am convinced by them that Parker and Davis will be elected. You may also say that I am not going to Indiana to remain there until after the election."

## FAIRBANKS IN IOWA.

(Journal Special Service.)

Council Bluffs, Oct. 11.—Fairbanks began the final jaunt of his western tour this morning, starting on a two days' trip through Iowa. He will end the tour with a day in Illinois.

## CLEVELAND TO FERRIS.

(Journal Special Service.)

New York, Oct. 11.—It is announced that Grover Cleveland will preside at the business men's mass meeting which will be held in Carnegie hall October 21. This will probably be his only appearance in the present campaign.

## CHOKES BRIDE AND COMMITS SUICIDE

(Journal Special Service.)

Los Angeles, Oct. 11.—After a frightful struggle lasting three hours in a dark room Cleveland's bride, Mrs. William M. Paxton, a bride of two months, sank to the floor exhausted as the man plunged a knife into the right side of her neck and chest. The struggle and suicide occurred shortly after 2 o'clock yesterday morning. Accompanied by his wife, Paxton spent the evening at a dance in a hall on South Spring street, and boarded the car for the east.

When he left the car Paxton commenced sobbing and acting in a peculiar manner. "After we returned home he threw his arms about me and choked me," said Mrs. Paxton at the inquest. "The room was dark, and we struggled about, overturning chairs and upsetting a table. He had a knife in his hand, with the blade open, and I thought he meant to cut me. I fell on the floor, and then he struck at my neck with the weapon."

The experience of this lady is that of thousands of others who have been assailed by a demoniac force. The demon would rid them of this distressing complaint. On the face of it, it appears as if too many surgeons operate in order that they may keep their hands in, and lose no portion of their fee. There are too many surgeons anxious to experiment (like the scientific man in Mark Twain's pathetic story of the dog and her little puppy), and do not have proper regard for a patient's physical welfare or condition.

We advise every sufferer to think twice before submitting to an operation for piles, and suggest that those interested write to the Pyramid Drug Co., Marshall, Mich. For their little book on the causes and cure of piles, which is sent free for the asking.

## POLICEMAN KILLS JEALOUS HUSBAND

(Special Dispatch to The Journal.)

Spokane, Wash., Oct. 11.—Otis Claud, proprietor of the Broadway cafe, was shot and killed in a fight by Officer Dial last night at 7 o'clock.

His wife to the restaurant kept by Claud whom he suspected, and driving him out into the street, shot him four times.

## OPERATIONS NOT ALWAYS NECESSARY

Doctors Frequently Mistaken.

"I suffered untold agony with piles for over three years. Two doctors told me nothing but an operation would cure me. I tried different remedies, but nothing did me any good until I used Pynchard's Pile Cure. I bought six 50 cent boxes at the drug store, and now I can do my work and go out, where before I spent most of my time lying down. I thank God for giving the discoverer the knowledge to make such a cure. I recommend it to all my friends, and if I ever have piles again will certainly use this remarkable remedy. You can use this in any way you wish to make regard the wonderful merit of Pynchard's Pile Cure." Mrs. William Mucky, 21 Marshall street, Elizabeth, N. J.

## NO DISEASE HE MAY NOT CURE

No Sufferer Turned Away By This Man Who Devotes His Life to the Sick and Afflicted—Offers Treatment and Services Absolutely Free to All Who Ask, Healing Those Near and Far Alike—Praised by Ministers of the Gospel.

(Special Correspondence.)

New York, Oct. 11.—Seeing is believing, and witnessing the seeming miracles performed by Prof. William Wallace Hadley, makes one exclaim: "Is there a known limit to this man's healing power? In there a shade disease he cannot cure? Is there any case so hopeless that he cannot restore health?"

Probably no other physician in the world treats so many patients as this famous professor of panopathy and physiatrics. They come to him by scores and hundreds. The sick and suffering, the lame and halt, the consumptive and paralytic, the drug fiend and the drunkard; invalids from almost every known disease form an endless procession seeking health at his hands. And this wonderful man, this wizard of science, this great-hearted physician, receives them, treats them—cures them. Heals them of diseases pronounced incurable by the medical profession, cures them after they have been deemed to death by doctors, revives health and strength in the face of seeming annihilation.

"I am a spirit of boasting or vanity, but in a quiet calm statement of fact he says there is no disease he may not cure, says it, and what is more, proves it. During a recent talk with this man, who has revolutionized the theory and practice of medicine he said: "Thousands of precious human lives are needlessly sacrificed every year by useless medicines and brutal surgery that kill the patient before they cure the disease. All upright members of the medical profession know this whether they will admit it or not, and it is time that the general public was made aware of the facts as they are. Now that I have been so afflicted some of the best physicians in the country; where one doctor has said the trouble was with the stomach, another said heart, still another suggested kidney disease, or something else. But in each case I was able to see the real cause and by removing it I restored the patient to perfect health. I have known stomach trouble to be diagnosed as heart disease, and heart disease as kidney disease, and countless similar instances. When these mistakes are made, and the patient is treated for the wrong disease how can the sufferer hope to get well? It is as if you tried to cure deafness by wearing eye-glasses. One is just about as sensible as the other. But I make a careful diagnosis of each case that comes to me and treat the real cause. I have known a patient who had been afflicted with rheumatism and countless similar instances. I have known a patient who had been afflicted with rheumatism and countless similar instances. When these mistakes are made, and the patient is treated for the wrong disease how can the sufferer hope to get well? It is as if you tried to cure deafness by wearing eye-glasses. One is just about as sensible as the other. But I make a careful diagnosis of each case that comes to me and treat the real cause. I have known a patient who had been afflicted with rheumatism and countless similar instances.
