NEWS OF THE MINES

SORENSEN'S MINES | TAKILMA SMELTER PRODUCE STEADILY IS TO HAVE TRAM

GON AND IDANO SKIP TO SMEL-TER, WITH PROSPECT OF CON-TINUOUS WORK - JOHN G. KIR-THEN CONSULTING ENGINEER.

J. Frank Shelton, assistant manager for N. P. Sorensen & Co. of Sumpter, reached the city yesterday on business. When interviewed at the Imperial this morning Mr. Shelton stated that both the Friday mine, at Pearl, Idaho, and the Highland, in Baker county, Oregon, which the company manages, were in excellent shape. The Highland is producing for the Sumpter smelter about the tons of ore daily, and Manager libriocker is working a force of 20 to men.

The product of the Highland is producing for the Sumpter smelter about the tons of ore daily, and Manager libriocker is working a force of 20 to men.

The product of the Highland is producing for the Sumpter smelting. The main drift on the Bantonick Burn has attained a length of offere than 806 feet, the face still being in good ore at a vertical depth of approximately 400 feet. Treats have been made during the summer and fall for reduction plant, with the result that the management has concluded to concentrate at first perhaps by means of coarse roll crushing, ligs and tables. The winter season is near, snow aiready having fallen on the Elkhorn divide, so that no effort will be made to put up a plant this year, but everything will be shaped to this end early in the spring. It is the purpose of the management, the continue shipping as long as possible during the winter. The Highland cross-cut, after intersecting the Highland vein, is being driven steadily to open the Bannock Burn at 150 to 200 feet. At the Friday mine, idaho, work has been persistent, and three tons of crude or is shipping grade in sight. The ore is taken from both the 210 and the Friday mine, idaho, work has been persistent, and three tons of crude or is shipping grade in sight. The ore is taken from both the sate and the west drifts on the 230 have been extended 170 feet on either side of the shart, with excellent ore in both, On the 130 level, the case of the shart, with excellent ore in both, On the 130 level, the case of the shart, with excellent ore in both, On the 130 level, the case of the sh

COMMERCIAL OCHRE

Good, yellow othre, fine grained and as valuable for pigment purposes as the imported article, is being taken from Dr. H. W. Coe's St. Helens properties. He had brought to this city a small quantity of the yellow stuff, which came from a vein that intersects a copper vein being driven on, and H. P. Christenson is preparing the paint for use. Mr. Christenson stated today that he had made tests

THEIR OREGON MINE

Thomas Lee, president of the Alpine Gold Mining company, reached Cable Cove, Raker county, early in the week to inspect the new mill equipment. He was accompased by vice-President John F. Deitz and Directors C. R. Taibott, J. G. Gibson and M. Jung, all of the officials being residents of Cincinnati, O. Manager Richard Addoms put the first five stamps of the 26 recently installed, in commission three weeks ago, since which time he has kept them dropping on ore from the upper levels. The Alarm drift is about 450 feet, a raise has been made to the surface, and the face of the drift is being extended in ore. FROM ST. HELENS

paring the paint for use. Mr. Christensen is preparing the paint for use. Mr. Christensen stated today that he had made tests of the St. Helens product, and found it quite as serviceable as the imported ochre. He will treat the crude product in such a manner as to eliminate the coarse grit, which is accomplished by mixing with water until a fine mud is made and then permitting the coarser material to settle to the bottom. Further tests will be made later, after Mr. Christensen has time to work out the material to better advantage.

No. 11

Charles D. Wagner, a graduate of the University of Oregon, has been given charge of the electrical plant of the Oregon Securities company, Lane county. The plant consists of a power station, embracing one horisontal wheel and dynamo, a six-mile transmission line, and several dynamos at the mill and for the compressors.

MEET AT SEASIDE

MUAL SESSION—NO CONVENTION MELD ON ACCOUNT OF REAVE STORMS-ALL OFFICERS PRESENT

(Special Dispatch to The Journal.)
Seaside, Or., Oct. 11.—Knights of Pythias from the entire state of Oregon assembled here this morning to hold their annual session of the grand lodge. All of the grand lodge officers, headed by Grand Chancellor Emil Waldman, came on the excursion yesterday. Supreme Representatives W. M. Cake and W. L. Bradshaw are among the Seaside visitors. No convention of the Uniform Rank branch of the order will be held, as the heavy storms that have set in the past two days make it impracticable for the soldiers to drill. Brigadier-General J. H. Aitkin of Huntington notified the companies intending to participate that they would not be expected to turn out as companies.

The session was called to order at 10 o'clock this morning. All of the grand lodge officers were present. A trunk containing paraphernalia and supplies was unloaded by mistake at Astoria last night and delayed the conferring of the grand lodge rank until 1:20 o'clock this afternoon.

Routine business was taken up quickly today. Grand Chancellor Waldman first announcing his committees, among which was that on credentials. This committee found that the attendance was up to the standard, despite the more remote meeting-place. Reading of official reports was taken up immediately afterward, the most prominent under this head being the annual reports of the grand chancellor, grand keeper of records and seel, grand master of the exchequer and supreme representatives. The latter covered the logislation enacted by the last session of the supreme lodge and recommendations as to what will have to be done in making Oregon statutes comply therewith.

Grand Chancelor Waldman's annual report was the first business taken up after calling the gathering to order and getting organised for work. He reminded the members that he made but one promise at the commencement of his term, and that was to devote his best energies to the order, which, however, would be futile without the co-operation of all members. The results of this work he left wit

A meeting of the executive committee of the Oregon Miners' association was held last evening at the headquarters, in the Oregonian building. The date for

districts as hold their conventions.

In Regard to Suspensions.

In regard to suspensions for non-payment of dues, the grand chancellor thought that the legislation of the supreme lodge, revoking the statue requiring a member to be suspended at the end of 13 months' arrears was wise, and would prove beneficent.

The grand chancellor said he had incited organization of absent member committees in lodges, whose duties were to get in touch with members away from the home lodge, write to them and endeavor to keep alive an interest in order work.

work.

In regard to uniform rank supplies, a recommendation was made that the brigadier-general endeavor to have regalia companies sell their supplies direct to companies wanting them, rather than through commission men, as this medium was regarded the source of much abuse in encouraging men to organize before they were really ready to maintain a company.

before they were really ready to maintain a company.

Recommendation for a room at a Portland hospital was made, which, is properly endowed, would insure greater comforts to sick members. Members were urged to encourage the work of the Rathbone Bisters, and support the auxiliary in every way possible.

Cordial praise was bestowed upon his co-worker in the grand lodge, Mr. Btinson, and the retiring official assured the members that he would still work for the order with the real shown in the past.

MAIN CLOTHING STORE CHICAGO SHOE STORE

PRICES THE LOWEST

Our Brown Tag Sale has been accepted by the people in the spirit in which we intended it. The EXTRAORDINARY, UNPRECEDENTED AND OPPORTUNE CUT IN PRICES on this stock has electrified business, considering the beautiful weather, which has a tendency to detract trade. The crowd of eager buyers has been here in plenty. Every garment offered here at this sale in men's and boys' clothing was made for our fall and winter trade—the fall and winter of 1904-05—and the prices at which we now offer them do not cover the cost of production—and the season is just beginning. You will realize the full force and meaning of the ascrifice which the exigency of the hour has compelled us to make. It will also help you to a correct estimate of the advantage which this great Brown Tag Sale offers to prospective purchasers. It will point to the wisdom of taking prompt action on the extraordinary proposition by helping yourself to the greatest values, in the highest styles, of which this broad land of ours has any record. A few mid-week bargains:

A change in business January 1, after eight years' success is the cause of this sale.
