Manager Ray Seems Intent **Upon Controlling the Entire** Power Situation.

REPORT THAT DREDGER WILL USE ELECTRICITY

Last Site Has Much Greater Possibilities Than Completed Plant at Gold Ray.

Gold Hill, Or., Dec. 12.—That the Condor Water & Power company intends to dominate this 'industrial field in the power business is apparent from developments. The arrangement, completed while Col. Frank Ray was here, for absorbing the northern California plant, suggested the scope of work projected to the south; offers to light Grants Pass indicated the purpose of the management to reach that territory, and the reported purchase the past week of the

The Mill creek site is at the junction of Mill creek and Rogue river, where the former makes a sheer drop of 186 feet, and Rogue river descends a greater distance in less than 1,000 feet. The hermit owner of this property has spent a good portion of his life in the herculean work of diverting Rogue river through a canal that would cause it to drop over into the Mill canyon, putting the two streams together for a plunge of nearly 200 feet. In view of the fact that the Condor company has a drop of but 20 feet at the present plant, with estimated available energy of 8,000 to 10,000 horse power, the possibilities of the site reported to have been purchased are quickly appreciated.

orted to have been purchased are quickly appreciated.

The line to the Opp mine is delivering electrical energy from the Condor plant, and it is reported that the Champlin dredge management has entered into a contract for power to run the machinery of the big boat. Its steam plant has a capacity of 210 horse power, and the requirements of the dredger are probably close to this figure. As lighting conclose to this figure. As lighting con-tracts are being made, it is believed that the company will soon supply the entire

MINERS THINK A MILL **BEST FOR EXHIBITS**

Diligent inquiry is being made among all the mining men of the state to ascer-tain if they will pledge sufficient ore-for the working exhibit promised by the Colorado Iron & Fuel company. At the same time the management of the big manufacturing concern has been asked for further pariculars as to the classes of ores wanted for the smelting exhibit. and also for the milling project, should the latter be determined upon instead of a small smelter.

of a small smeiter.

Mining men would like to see a small smeiter in operation at the fair grounds, if possible, but unless the Colorado company will give assurance of a very positive nature that this is feasible, they will feel that the work of getting ore here involves serious difficulties. The ores for successful fusion and reasonable saving would have to be chosen by a smeiter expert, and could not be accepted or collected in a miscellaneous manner. If the siliceous predominated too heavily, which is the rule in most or heavily of copper available for a copper matting plant, and southern ore and concentrates at intervals. East the famous ore shoot has been lost the Sumpter smeiter, which needs all ore available, they was nearer the surface.

IN Mining men would like to see a small samelter in operation at the fair grounds, was nearer the surface.

IN MINING MENTAL OF TES STRATTOE.

The annual report of John Hays Hammond, made to the stockholders of Stratton's Independence Co., has just been made public. The fascal year covered by the report ended July 31. Mr. allowed been made public. The fascal year covered by the report ended July 31. Mr. allowed been made public. The fascal year covered by the report ended July 31. Mr. allowed been stopped, and that the deven do heavily, which is the rule in most or here involves serious difficulties.

Oregon ores, smelting would be impractively the provided that there had been unsatisfactory. The average value of ore handled during the year was but little above \$5. a decrease of \$2 from the average of the preceding year. No new ore hodies were opened, all ore handled during the year was but little above \$5. a decrease of \$2 from the average of the preceding year. No new ore hodies were opened, all ore handled during the year was but little above \$5. a decrease of \$2 from the average

GOLDEN CHARIOT HAS SECURED A NEW HOIST

his partner, L. V. Swiggett, at Sumpter has notified him of the purchase of the Golden Wizard plant for the Golden Chariot property. Mr. Swiggett suspended work in the Chariot at the 100

very surface there was three or four feet of shipping ore. At the 35 leve 12 feet of high average rock, some of which was good shipping. The 100 crosscut had just been commenced when a terrific volume of water burst from what seemed to be the wall of the vein drowning the balling plant. If the vein is as strong at the 100 as at the 35 and surface, the management feels that there

HIGHLAND'S OUTPUT

Sumpter, Or., Dec. 12:—Ore shipments from the Highland mine, operated by N. J. Sorenson & Co., continue at the rate of 150 to 160 tons a week. The Bannockburn drift has attained a length of about 900 feet, where the depth is more more than 400 feet, and all ore opened here indicates a large reserve. Exceptionally high values have been found in some of the latest work done in the drift, swhere ore shoots come in quickly after they go out, and seem to have

Bewers o tiations pending, which the owner ex-pects will result in placing a stamp mill on the Le Roy next spring. Careful ex-amination has been made of all the workings and surface cropping, and while "chilly" in every respect, satisfies the owner that his property will stand the most rigid test.

In the Judson claim, Bohemia district, the tunnel being driven by Lewis Le Roy has a full face of ore 30 feet from the portal. This work is to be continued the portal. This work is to be continued during the winter months, and in the spring exploration will be taken up in other adits which have a good showing.

ANNUAL DEAD LETTER SALE.

(Journal Special Service.)
Washington, D. C., Dec. 12.—The an Washington, D. C., Dec. 12.—The annual sale of parcels and packages that have accumulated at the dead letter office during the year was commenced today and will continue throughout the week. The sale this year is larger than ever before, there being over \$,000 catalogue numbers, being made up of about 75,000 original pieces of mail matter in the United States besides several, thousand from the dead letter bureaus of Porto Rico and Hawaii. The articles sand from the dead letter bureaus of Porto Rico and Hawaii. The articles consist largely of wearing apparel, dia-monds, jewelry, books and numerous small articles of merchandise, for which no owner could be found by the em-ployes of the dead letter office.
