# PROGRESS OF HILL ROAD ACROSS THE PENINSULA STOPPED BY INJUNCTION

## FIRST GUN OF BIG WAR

### Northern Pacific Takes Advantage of Two Holidays and Lays Track in Disputed Territory.

## DEPUTY SHERIFF TAKES HAND IN GAME TODAY

### Serves Court Order on Contractors That Ends Work Until the Rights of Two Companies are Settled by Judge—Track Already Down May Hold the Field.

A deputy sheriff called "time" today on the first round in the battle between the giant railroad forces of Hill and Harriman that had its beginning in the announcement of the Hill roads for the building of the north bank line to Portland. Armed with papers from the circuit court Deputy Sheriff John Grassl went out to the lower end of the peninsula at noon and served an injunction against Contractors Sims & Shields and the Portland & Seattle Railroad company to stop construction work by them at a grade crossing on land formerly owned by the College Endowment association, but now possessed by the Portland & Seattle, which is the local corporate designation for the Northern Pacific and Great Northern roads.

### Why They Fight.

The fight is over the location of a grade where the surveys of the O. R. & N. P. and the Portland & Seattle main line route between the Columbia and Willamette rivers cross. The Portland & Seattle, to forestall the Harriman road in the fight it knew was coming, rushed a force of construction men on the ground late Saturday afternoon, when it was too late for injunction papers to be effective. The men worked all night, and Sunday morning another shift was put on. Their opponents could not get action on Sunday, and Christmas day following gave the Hill people another day in which to work undisturbed. Gangs of men were kept at work day and night. This morning it was found that the Portland & Seattle had established its grade and laid a track for a distance of nearly 300 feet across the disputed ground.

### Stops Work for Sims.

The injunction granted by the court stops further construction work until a hearing of the merits of the case can be had. But the Portland & Seattle people claim the proceedings do not worry them, as they have established their contention—namely, legal right to locate the grade of their tracks on ground they already owned in fee simple. The matter will now be threshed out by the court.

### O. R. & N. Too Slow.

The O. R. & N. company, having made a survey and established permanent lines, brought an action against the College Endowment association, the common right of way. It is said the Portland & Seattle was not made a party to the suit for the reason that the O. R. & N. people did not know of the contract and option to purchase and its acceptance by the Portland & Seattle. When the O. R. & N. people learned that the Hill company was digging on the ground, it asked and obtained a temporary injunction Saturday, but too late for service.

## CHANGE IN RULES TO IMPROVE THE STAFF

### Prosecutor Malarkey Grows Restive as the Plain Truth Comes Out and Files Up Objections as Stumbling Blocks—The Farce is Rapidly Nearing Its End.

"You gentlemen who have heard the witnesses in this investigation must yourselves admit from your observation of the men, that when the civil service commission appointed Patrick Bruin and Silver to be police captains, it chose the best two men out of the six who had taken the examination," said Civil Service Commissioner W. L. Brewster this morning from the witness stand in the council's investigation into Bruin's appointment.

The challenge passed unanswered. With absolute candor and utter reserve Mr. Brewster had detailed every circumstance of the acts of the civil service commission which were preliminary to the examination of applicants for police captain, including the changes in the rules governing such examinations. He related the suggestions made by Mayor Lane for the betterment of the police force and frankly stated that it was the mayor who proposed that the rule be abolished which required that applicants for civil service positions shall be residents of Portland.

Troops have gained partial control of the city but incessant fighting continues on the outskirts. The revolutionists have appealed for help from other outside cities and if it is secured it is considered that the troops that now hold the thousands in check will, unless reinforcements arrive, be overwhelmed. Patrols are constantly riding in every direction and shooting without hesitation or discrimination at all citizens that have gathered in groups of three or four or more.
