In the early history of this country, EVERY FAMILY HAD IT'S HORE-MADE MEDICINES. Herb teas, hitters, laxatives and tonics, were to be ADE MEDICINES. Such remedies as piers, which was aloes and quassis, dissolved in apple brandy. Bomotimes a hop tonic, made of whisky, hops and bitter barks. A score or more of popular, homemade remedies were thus compounded, the

tural outgrowth from this wi The patent medicine business is a natural outgrowth from this wholesome old-time custom. In the beginning, some enterprising dootor, impressed by the flofulness of one of these homemade remedies, would take it up, improve it is many ways, manufacture it on a large scale, advertise it mainly through alman ace for the home, and thus it would become used over a large area. LATTERLY s is a ne prove it in THE HOUSEHOLD REMEDY BUSINESS TOOK A MORE EXACT AND CHER PRINTING TOTAL

Paruna was originally one of these old-time remedies. It was used by the Memonites, in Pennsylvania, before it was affered to the public for sale. Dr Hartman, THE ORIGINAL COMPOUNDER OF PERUNA, is of Memonite origin. First, he prescribed it for his neighbors and his patients. The sale of it increased, and at last he established a manufactory and furnished it to the neral drug trade.

general drug trade. The history of Peruna is also the history of many other well-known pet-ent medicines to-day. Furnishing medicinal compounds direct to the people through the druggists, is simply the extension of the practice begun by the people themselves. The patent medicine industry is A TREMENDOUS SAVIEG for the people. It enables the householder to purchase a useful remedy, together with direc-tions and other medical advice, at a cost far below the average price of a doc-tions and other medical advice, at a cost far below the average price of a doc-

tions and other medical edivice, at a cost far below the everage price of a doo-tor's visit. Like the shoe factory, the wayou factory, and the clothing fac-tory, it lowers the price at the same tent medicine business' enables families far removed from doctors, to avail the prescriptions. All this is brought to the home for a small fraction of the amount it would otherwise cost the people. MATURALLY THIS INDUSTRY HAS ITS OFFONERTS. The fact that the people can, for chronic diseases and petty acute ailments, save themselves the expense of calling a physician by purchasing a well-tried home remedy, put up under the personal direction of some experienced doctor, and that they can do this at a great deal less expense than to employ the local doctor outs out a large slice from the income of the medical profession generally. BUT IS AN IEMENSE SAVIEG TO THE PEOPLE.

Thus it comes to pass that the people are almost unanimously in favor of patent medicines. On the other hand, the medical profession is quite gener-ally opposed to the sale of them. There are doctors, however, who balieve that the people are entitled to the privilege of economizing and profiting by the sale of these compounds.

that the people are entitled to the privilege of economizing and profiling by the sale of these compounds. This is why Dr. Hartman has compounded and sold to the people, through the drug trade the family remedy, Peruna. To destroy the patent medicine industry in this country is to deprive mil-tions of homes of the privilege of using these well-tried remedies, and subject them to the expanse of calling a physician for every minor allment. Much has already been done at the instigation of the medical profession to HARASS THE PATENT MEDICINE INDUSTRY. Doubtless much more will be done from this same direction. But we believe that the people will understand and maintain their rights in this matter, and Peruna will continue as a useful and all-round household remedy. Peruns is a household remedy of great marit, and is useful in a great many climatic allments, such as coughs, colds, sore throat, bronchitis, and estarrhal diseases generally. THOUSANDS OF FAMILIES HAVE LEARNED THE USE OF PERUNA and its value in the treatment of these allments. They have learned to trust and believe in Dr. Hartman's judgment, and to yely on his remedy, Peruna.

This is the situation in Goldfield, which I son-sider the historic ground for the clud-dation of the principies for which we contend."

The relation of the industrial worker to the socialist in politics, the labor leader explained, is as follows:

inder explained, is as follows: Politics Figures in Fight. The revolutionary fight will be made both upon the political and the indus-trini field, but the existence of two So-elalist parties with different policies to-ward the International Workers of the World prevents that body from inford-ing either one. The Socialist party maintains a neutral position toward the rival labor unions, while the Socialist both upon the World. For the young union to inderse the Socialist party would be absurd; for it to inderse the Socialist Labor party at this time would be unwise.
