

PLANT POTATOES THIS YEAR

Owing to the overproduction and low prices of potatoes last year, many will not raise them this year. This will naturally cause a shortage and prices will soar. Take advantage of these conditions and make a clean-up in 1913.

BULLETS TO RIDDLE HISTORIC OREGON

Washington, D. C., May 14.—United States naval officers having failed in their effort to have the battleship Oregon sold as junk now propose to use her, as well as her sister ships, the Indiana and the Massachusetts, as targets, to be fired upon by the heavy batteries of modern dreadnoughts, as was the old battleship Texas a year or two ago.

Inasmuch as the Oregon is no longer on the active navy list and is regarded as obsolete by naval experts it is doubtful if this historic ship ever again will be called upon for service in battle. Because of this fact, ordnance officers are desirous of using her for a target, in order that naval experts can gather additional information as to the effect of modern projectiles from modern guns, upon heavily armored warships.

If this recommendation is carried out it is probable that the Massachusetts and Indiana will first be shot to pieces and the Oregon will be preserved long enough to lead the procession through the Panama canal. The navy department announces that if these ships are used as targets their names will be changed before they are dismantled and towed to sea, and that ultimately modern dreadnoughts, yet to be authorized by congress will be given names of the states for which these three ships were named. Unless sentiment interferes, this latest plan of the navy department is likely to be carried out.

Umatilla county is being visited with another shower this afternoon. While the moisture will not come amiss, most of the farmers are hoping for some hot days as their wheat is backward.
