At the Mercy of the Contractor

Every man who builds of lumber or concrete is almost wholly at the mercy of the contractor, who can easily without your knowing it substitute a lower grade of material than that called for in the specifications. Wherever the contractor has the opportunity to use the cheaper lumber or "skimp the cement" he is tempted to do it, for the substitution means just that, much more profit for him. And we know a lot of contractors who don't require much tempting; you know them, too. However, if you build of brick, it will be different, for a brick is a brick and no contractor can alter its superior qualities. He must put it into the building just as it comes from the brick yard. Will you tempt the contractor's honesty or will you protect your investment by building of brick? WESTON BRICK YARD P. T. HARBOUR Manager, WESTON, OREGON.
