

LIFE INSURANCE COMPANIES

They Are Closely Observing Public Health Conditions

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of these whose applications are declined do not even suspect that they have the disease.

According to this it would seem that a medicine for the kidneys, possessing real healing and curative properties, would be a blessing to thousands.

Dr. Kilmer & Co., Binghamton, N. Y., who prepare Dr. Kilmer's Swamp-Root, the well known kidney, liver and bladder remedy, claim that judging from evidence received from druggists everywhere, who are constantly in touch with their customers, and also indisputable proof in the form of grateful testimonial letters from thousands of reliable citizens, this preparation is remarkably successful in sickness caused by kidney and bladder troubles. Every interesting statement that they receive regarding Swamp-Root is investigated and no testimonial is published unless the party who sends it is reported of good character. They have on file many sworn statements of recoveries in the most distressing cases. They state that Dr. Kilmer's Swamp-Root is mild and gentle in its action and its healing influence is soon noticed in most cases.

Swamp-Root is purely an herbal compound and Dr. Kilmer & Co. advise all readers who feel in need of such a remedy to give it a trial. It is on sale at all drug stores in bottles of two sizes—50c and \$1.00. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention the Pendleton Tally East Oregonian.

Smith properties held by the United Properties company, the Smith-Hanford-Tervis merger, and a number of smaller concerns doing business in the bay cities, was revealed before the state railroad commission. The merger plan provides for the taking over of all the physical assets of these various companies and fixing against these assets \$2,000,000 in bonds. No action on the application for permission to carry the merger plan through has yet been taken by the commission.

General Thought Suicide.

BERLIN, March 16.—The Frankfurter Zeitung has received a private dispatch from Petrograd intimating that General Sievers, commandant of the Russian Tenth Army corps, defeated in the winter battle at Masurian lakes, has committed suicide. The basis for this inference seems to be the fact that reports have been in circulation concerning a mourning service held for the general in a Lutheran church.

Stories From the War Zone

BY HENRY WOOD. (United Press Staff Correspondent.)

PARIS, Feb. 27.—(By Mail to New York.)—The Academy of Moral and Political Science has just asked the French government to take up at once its most serious problem that will result from the war—that of the population of Europe.

The academy pointed out that when the war ends a minimum of 2,000,000 men at the very least will have been killed. The crisis which Europe will then face for its repopulation will be without a parallel in the world's history.

The academy has already pledged to the government its most profound and exhaustive study of the situation. While it is the intention of the members eventually to take up the problem in its application to all the countries stricken by the war, they for the moment will confine their efforts to the problem as it is presented in France.

That France will be the country that will face the most serious phase of the situation is already recognized. For years even before the war France's birth rate had decreased to a point where it was exceeded by the deaths. Now with hundreds of thousands of her men most capable of reproducing their kind being killed, the situation is recognized to have been aggravated to a degree where only the most radical and unanimous and exhaustive measures on the part not only of the French government but of the entire French people are going to be necessary in order to insure the continuity of the French race.

As yet the academy has suggested no measures to the government except the immediate revision of all legislation on the subject. The academy however, from the superficial glance which it has already given to the subject declares that it can adopt and hope to prevent the gradual obliteration from the face of the earth of the French people is "Three children for every family." The condition entailed by the war renders this an imperative necessity.

The academy also has asked the government to effect a complete change in the policy of its laws on this subject. Instead of enacting measures with the end in view of forcing families to have children, it is urged that the laws tend rather to make it possible for parents to have children by reducing for them the economic burden of bringing them up.

As the laws now stand, it is asserted that the larger a man's family is the more taxes, duties and other contributions he is obliged to pay to the state. The academy asks the reversal of this.

It asks also the immediate revival of an old law which was suppressed in 1885. It provided that every family with seven children had the right to have at least one of these brought up at the expense of the state. The academy insists that even a larger application of this law would be justifiable under the present conditions.

The academy also asks that all employment under the government be given on a graded scale to the fathers of the largest families. Scholarships and other help from the state is urged on behalf of the children.

Strike Delays Big Guns.

VANCOUVER, B. C., March 17.—The sailing of the Russian volunteer fleet steamer Yaroslav for Vladivostok with American-made cannon and ammunition for the Russian army has been delayed by the strike of longshoremen here.

No more Russian steamers are on the way from Siberia, and the volunteer fleet service, which is said to have been of great importance to the Russians in supplying the army with heavy guns, will be discontinued temporarily. One of the volunteer steamers, the Kiev, is on the way to New York, presumably to take a cargo from that port to Archangel.

With the approach of spring this Arctic port of Russia will be opened for the transportation of artillery.

Norwegian Vessel Freed.

This action was taken after the cargo of the Vitalla had been consigned to the Netherlands Overseas Trust.

The Vitalla was picked up at sea and taken into Falmouth by British authorities, who explained that the government wanted to determine to whom in Rotterdam the cargo was consigned.

Death Plane Speed Hope.

Threat Angers Germans.

LONDON, March 17.—The decision of the British government to segregate the captured crews of German submarines and perhaps institute criminal proceedings against them for attacks on unarmed merchantmen has evoked heated comment from Berlin newspapers. DRAMATIC CHAT BY BEAU RIALTO

NEW YORK, March 17.—Isadora Duncan, who spells art with a capital A, has changed her attitude toward America. There was a time, not so many eons ago, that the classical dancer felt annoyed even pined, at the attitude of this nation toward her efforts. But now things are changed.

Isadore has begun to think that the poor people of America should have a chance to watch her classic toes in barefoot poses. She and her "school" are going to appear at the Century opera house this spring at popular prices—a dime for the gallery and so on up to half a dollar for the highest priced seats—for an entire month. She made the announcement the other night at the Metropolitan.

High art stuff reminds one that Granville Barker is going to build another "New Theater." The London producer has been given the commission to revive his old project and the coin, it is said, has been pledged.

Barker plans to give his productions in the great universities this spring. He says he isn't considering the profits—perhaps there won't be any to consider.

"The Peasant Girl" opened her engagement at the Forty-Fourth street theater the other night, with Emma Trentini singing better than ever before. The opera is another one of those musical things with lots of color, with a plot that begins on the Blue Danube.

86 for Graduating Dress. MITCHELL, S. D., March 17.—Girl graduates of the Mitchell high school have by mutual agreement decided they would not spend more than \$6 for their graduating dress. This follows high school agitation about rich girls overdressing at graduation exercises, to the embarrassment of poor girls.

New Texas Labor Law. AUSTIN, Texas, March 16.—A 54-hour week bill for women workers, certain to become law at this session of the legislature, passed the senate with women in cotton and woolen mills excluded from its protection.

Senator Bee, author of the measure, felt constrained to apologize for the fact that it excluded these workers. He said that he had consented to it only because fourteen of his colleagues told him they would not vote for it if the bill did not exclude textile workers.

STEGLER, ACCUSED OF PASSPORT SCANDAL

Richard P. Stegler, the German-American, who, with his wife, accuses Captain Boy-Ed, military attache of the German embassy in Washington in connection with the passport scandal in which he has been indicted by a federal grand jury in New York, was released on bail the same day Mrs. Stegler had a harrowing experience with two reporters of the New York Staats Zeitung. Just after she got out of court she hurried to her husband and the two were photographed together.

Stegler and his wife say that the German attache wanted him to go to England as a spy for the German government and was to pay Mrs. Stegler \$150 a month for life if he was killed.

The other day two German reporters, she said, invited her to a room in a hotel, saying they would help her husband. When she got there they tried to have her sign an affidavit clearing Captain Boy-Ed. They said in court she had disrobed before one of them. Then they called a policeman, charging she hit one of them with a seltzer bottle and a cane. In court the magistrate dismissed the case against her and said she might have sent the reporters to the workhouse for thirty days, but the evidence was not quite strong enough.

Reichsbank to Increase Dividend. BERLIN, March 17.—According to newspaper reports the next dividend of the Reichsbank will be 10.24 per cent, as compared with 8.43 per cent the last previous rate. The improvement is due to the heavy discounting of government bills and to the abolition of the note tax upon the outbreak of the war.

The Bottle Came Back. VIRGINIA, Minn., March 17.—A. B. Coates has just received a bottle filled with the product that made Louisville, Ky., famous. The bottle looked familiar. Investigation proved it was the same bottle that he and a party of friends had emptied while dropping down the Nile river. Before throwing the bottle into the murky waters, Coates slipped his card into it and corked it. Apparently some one picked it up and sent it to Louisville, where it was originally made. The distillery apparently thought it a good enough joke to carry it a little farther.

Compels All Impurities To Abandon System

Blood Troubles Can not Remain If Properly Treated.

There is in S. S. S., the famous blood purifier, a property that absolutely compels harmful influences to disintegrate and lose their identity. No matter what they are called nor how destructive they are there is in S. S. S. a powerful, searching counter influence that annihilates the most eruptive germ, causes the mucous linings to convert it into an inert substance that is quickly thrown out of the blood and out of the body by the skin, lungs, kidneys, bowels, and destroyed in the liver.

There is not a single advance in medicine today that in any sense is an improvement over S. S. S. Surgery is a wonderful, masterful science, but when it comes to purifying the blood S. S. S. stands alone. Thousands of doctors have pronounced it. Their patients do not always know it is S. S. S., because they leave the treatment to the doctor implicitly. But fair-minded doctors long ago realized that in the vegetable nature of S. S. S. were certain ingredients that to the blood in sickness were just as essential as the flesh-building elements of the grains, meats, fats and sugars of our daily food. The average doctor is humane and of trained intelligence. He has seen the recoveries from worst cases of blood trouble by the use of S. S. S. Get a bottle of S. S. S. today if any druggist. Accept no substitute. And if you wish proper advice on any form of blood trouble, write to the Medical Adviser, The Swift Specific Co., 102 Spruce Bldg., Atlanta, Ga. It is worth while doing so.
