

MICHELIN

Twelve Tire Tests No. 6

This series of twelve tests is designed to take the uncertainty out of tire buying.

Tube-Shape

Perhaps you have noticed that some inner tubes become creased or cut or otherwise injured without any seeming cause. Such troubles are due nearly always to the fact that inner tubes, with the exception of Michelins, do not fit properly when inflated inside their casings.

Look at the photographs reproduced below. The tube on the right is a Michelin, the only tube made circular or ring-shaped to fit the casing perfectly and naturally. The tube on the left is typical of all other makes. Both are inflated to the same pressure. Compare the two.

Michelin Tubes are used by most motorists and endorsed by practically every tire dealer. They are unsurpassed in quality and yet are reasonable in price.

This tube is typical of all makes other than Michelin. Such tubes are simply straight pieces of tubing cemented at the ends. Notice the shape this tube takes when inflated.

This tube is a Michelin—the only tube made ring-shaped like the casing, thus insuring perfect fit, without distinctive folds, wrinkles or thin spots.

Both of these tubes are inflated to the same pressure.

COLLEGE ATHLETICS FACING OBITUARY

Stars of Gridiron Have Become Heroes of Air and Battlefield.

(By United Press.) PORTLAND, Ore., June 8.—Representatives of colleges in the Pacific coast conference met here today to discuss college athletics in war time. The original plan was to try to bolster college sports, but the gathering resembled a coroner's inquest and the indications were their report would partake of an obituary.

No college activity has been so hard hit as athletics. The general reason given is that college men's interests have changed to the one big adventure—war.

Stars of the gridiron have become heroes of the air and the battlefield. Those who remain behind look on what once were gripping sports as child's play.

Enlistments and the draft have taken the stars. Those who remain behind want to fight rather than play.

The coach who in peace vividly cheered her team doesn't often go to the game now. She is knitting socks and making bandages. The incentive for sports is lacking.

Athletes have died of anemia despite the efforts of college heads and even the national administration to impart vigor.

The United Press today received reports from every college in Washington and Oregon, and without exception they said athletes were on the wane—gradually dying. Desperate attempts are being made to revive them but the results are not encouraging.

Here are a few of the reports: "Men participating showed decreased interest. Games not well attended."—State College of Washington.

"Most of the athletes became commissioned officers."—Oregon State Agricultural college.

"No football. Winning basketball. Athletic spirit not so good as usual."—College of Puget Sound.

"Lack of men affected athletics."—Oregon Normal, Monmouth.

"Much poorer teams than normal."—Pacific college.

"Reduced quality. Cut out track."—Whitman College, Walla Walla.

"War took our best athletes."—Willamette University.

"Tennis is left."—Albany College.

BRAVES KNIFE TO EARN KHAKI

CHICAGO, June 8.—"I must get in to the war. I want to fight. I don't care if I do die, if I die fighting over there. I must avenge my murdered father and mother."

Ermoylan Markar, a young Armenian of 25, living at 1148 West Erie street, thus stated his case to Judge Charles N. Goodnow, president of the Liberty War Association for Medical and Surgical Relief.

Ask Operation in Order to Fight. Markar was drafted May 29 and sent to Camp Grant, but was immediately sent back after his examination there, when it was discovered he was suffering from a physical defect. Now he wants to be operated upon so as to get into such condition that he will be accepted to fight. So this morning he requested aid from the medical association through Judge Goodnow, and he will be sent to the American hospital this afternoon.

Markar came to this country six years ago. Early in 1915 the Turks massacred all the inhabitants of the little town of Tehunkoosh, in Armenia, among them Markar's aged parents, to whom during his six years in America he had been sending a large part of his earnings.

Notified by Sister. His married sister escaped by a miracle, though her husband was killed. She notified Markar of the tragedy, sending word through the American consul. Since hearing of this he has yearned to avenge his parents. His rejection by the authorities at the camp was a cruel disappointment.

"I can never live down my shame if I don't get in and fight," he says. So he is rejoicing today in the hope of being made fit at the hospital, and soon being overseas in a khaki uniform.

PENDLETON'S DRIEST SPRING IN 28 YEARS

Farmers may expect rain this month, according to data the weather observer has gained from the experience of past years. This is the driest spring recorded since the records have been started, which was in 1890, as there have only been 64 inches of rainfall in April and May combined. But the records show that there have never been three dry months in succession, and it is hoped this year will not break the record.

In 1891 there was only .32 inches of rainfall in May, as against .54 in this May and .46 in April, so that was the driest spring up until now for the past 28 years. But the following, June of that year 2.25 inches of rain which is much above normal fell.

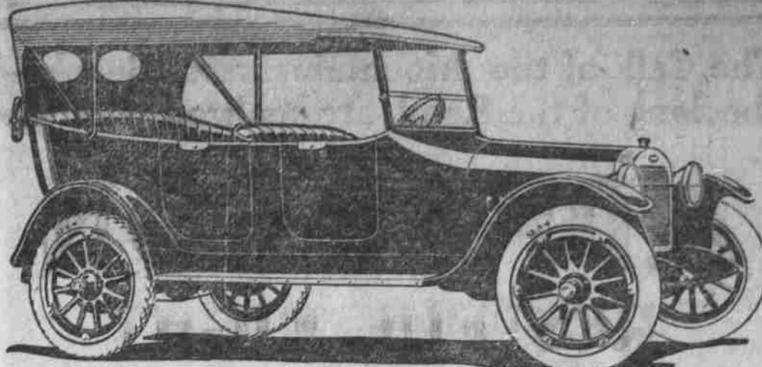

The warmest day in May this year was on the third, when the thermometer registered 85 degrees. The coldest was twenty-sixth, with the thermometer at 29 degrees in the morning. There were four rainy days, 15 clear, 8 partly cloudy and five cloudy during the month.

BUSHEL OF PENNIES HELPS PAY FOR FARM

CLEVELAND, June 7.—James W. Eller, a conductor on the Toledo, Bowling Green & Southern railroad, purchased an eight-acre farm from C. L. Castorline yesterday afternoon and, as part payment on the transaction, he brought to the bank nearly a bushel basket of old copper pennies, 18,000 of them.

Mr. Eller is a coin collector, with a special penchant for the old copper penny, now out of existence.

In the photo, every date in the last

I'll Show YOU REAL High Power!

I've heard men talk about high power in their cars when I knew, all the time, that much of their power was absolutely lost.

Putting a 40 h. p. engine in a heavy automobile is like telling a big strapping man to move a heavy piano alone.

Oakland engineers have not only developed a high-powered engine—one that delivers 44 h. p. at 2600 r. p. m.—but they have placed it in a car noted for its scientific lightweight construction.

To every 48 pounds of this roomy, full-family Oakland Sensible Six, the high-speed overhead valve engine delivers one full working horse power.

I'll be glad to demonstrate this real high power to you and family at any time you say.

SLACKERS STAY IN ROOM TWO YEARS

LONDON, June 8.—In an effort to avoid military service, Arthur and William Webb, brothers, spent every day of the last two years in a bedroom in their home. This fact became known recently at Enfield, a suburb of London, when the two were arrested.

PRISONERS AID CAUSE

(By United Press.)

PHILADELPHIA, June 6.—Inmates of Pennsylvania charitable and correction institutions are enlisted in the army armed with hoes.

Berks county prisoners are cultivating ten acres of garden on the almshouse farm.

Inmates of the state hospital for the insane, Norristown, are raising plus as well as garden truck. Pennsylvania dependents and delinquents who are in

state and county custody will raise more than enough vegetables for their own use.

Y. M. C. A. FIRST AT FRONT

Ralph Harbison, a Pittsburg business man, who was with the Rainbow Division under heavy fire for twenty-six hours, says that when the American troops were rushed to the Picardy battle Y. M. C. A. motor trucks beat the troop trains there and received the soldiers with hot drinks.

"A Stitch in Time Saves Nine"

Apply this good logic to YOUR TIRES

A little cut will make a big blow-out and ruin an otherwise good tire. See us "before she blows"—or after the blow-out don't throw away the tire until you have had us examine it.

A Vulcanized Section A Re-Liner A Re-Tread Cooked On

One of the above may make your old tire work like new and add many miles of use.

The cost is little compared with the additional service the tire will give you.

Do It Now—And Save Future Grief

We are the distributing agency for FIRESTONE TIRES.

We advertise and offer War Savings Stamps for sale with every purchase.

SOUTHERN PACIFIC SUED FOR DAMAGES

EUGENE, Ore., June 7.—The case of Frank R. Alexander administrator of the estate of Edgar A. Billings, against the Southern Pacific company was begun in the circuit court this afternoon. The sum of \$299 damages is asked for the killing of Billings by a troop train on the Southern Pacific near Springfield Junction, a few miles south of Eugene, on October 27, 1917. Attorney R. C. Nelson of Portland is defending the case.

Makes Supreme Sacrifice

A little while cross "somewhere in France" marks the grave of E. Whiteman, a Y. M. C. A. war work secretary who operated a hut close to the Meuse front. He contracted pleuro-pneumonia while serving the soldiers.

GERMANIC NAMES CHANGED BY SIX

SAN FRANCISCO, June 7.—Six persons with Germanic names had their names Americanized before Superior Judge Morgan today. B. F. Wertheimer had his name changed to Worth; Julius and Joseph Pfisterbusch were allowed to assume the name of Bush; L. M. Kaiser, his wife, Lilly, and his brother, L. W. Kaiser, changed their name to Kaye. In all cases the petitioners asked a change for patriotic reasons.

Shell Kills Worker

A German four-inch shell penetrated a Y. M. C. A. dug-out on the Flanders front and killed the secretary, Jack Lunsden.

Tea Service Beverage

Tea is the active service beverage at the British front, according to Y. M. C. A. canteen workers "over there."

WOMEN SUFFER

MOST OF ALL

From these conditions of the blood and nerves in which the combination treatment, Hood's Sarsaparilla before eating and Peptiron after eating, gives so much satisfaction at so little cost as compared with other medicines or physicians' fees.

These two great medicines are especially effective in cases of physical weakness, nervous irritability, run-down conditions in which there is iron deficiency.

Ask your druggist for them.
