

NEW ORGAN LARGEST OUTSIDE PORTLAND

Opening concerts on the mammoth new Murlitzer Hope-Jones orchestral pipe organ being installed at the Oregon theatre will be given next Tuesday and Wednesday evening, with Miss Margaret Faber as organist and Mrs. Warren Hunt, as relief.

The keyboard contains three manuals, with echo, solo and accompaniment features. There are two touches to each key, each playing a different instrument. The pipes range from one foot in length to 32 feet and there is a multitude of them. Every known instrument is played, and any combination of instruments, altogether there being 70 different combinations. Among the instruments played are those of the string orchestra and brass band, the Maramba phone, sleigh bells, cathedral chimes, harp, drums, etc.

There are 5000 electric magnets and over three miles of electric wiring required in the organ, which is the largest musical instrument in the state, outside of one in Portland. The pipes and paraphernalia occupy all the surplus space in the theatre, including the stage, wings, green room and boxes, while the echo is placed in the ceiling. It is the most expensive feature ever installed in a theatre the size of the Oregon, but the motto of the house is "Nothing too costly nor too good for our patrons."
